RULES OF THE UNIVERSITY OF ALLAHABAD.

THE SENATE.

1. Meetings of the Senate shall be held in Muir Central College, unless for special cause the Chancellor or Vice-Chancellor shall direct otherwise.

2. Such motions and amendments only as are immediately connected with the University of Allahabad, or relate to public education and are not inconsistent with Act XVIII of 1887, shall be brought forward and debated in the Senate.

3. No question shall be considered by the Senate that has not in the first instance been considered and dealt with by the Syndicate.

4. The Senate shall hold an Annual Meeting to commence on the 1st Monday in March. The Senate shall meet at other times when convened by the Vice-Chancellor, or, in his absence from Allahabad, by the Syndicate.

5. The Senate shall be convened at such times as the Chancellor may direct. The Vice-Chancellor may also of his own motion, and the Syndicate may, in the absence of the Vice-Chancellor from Allahabad, convene the Senate at any time.

6. At any time between the 15th April and the 31st October, inclusive, the Vice-Chancellor shall convene the Senate on a requisition in writing signed by not less than one-half of the Fellows for the time being Such requisition shall state the business to be brought before the Senate at such meeting, and that in the opinion of the Fellows so signing such business is urgent.

7   Any resolution passed at a meeting of the Senate between the 15th April and the 31st October in any year shall, if not confirmed at the first meeting of the Senate held after such 31st October, thenceforth cease to be of effect   Provided always that the foregoing part of this Rule shall not apply to any resolution on a matter for the consideration of which the Senate has been convened by the direction of the Chancellor

8   At any time between the 1st November and the 14th April, inclusive, the Vice-Chancellor shall convene the Senate on requisition in writing signed by not less than one-third of the Fellows for the time being   Such requisition shall state the business to be brought before the Senate at such meeting, and that in the opinion of the Fellows so signing such business is urgent

9. The Vice-Chancellor shall fix a date for any such meeting of the Senate within one month of the receipt by him of any such requisition duly signed

10   Not less than fourteen days notice of any meeting, including the Annual Meeting, shall be given. Such fourteen days to be computed from the date of

the issue of the notice by the Registrar. Such notice shall be sent in a registered cover through the post to each Fellow at his recorded address, and shall also be exhibited on a notice board in the Registrar's office.

11. A Convocation for conferring degrees shall be held once in every year, on such date as the Chancellor shall appoint.

12. With the notice mentioned in Rule 10, the Registrar shall forward to each Fellow a copy of every motion that is to be proposed at that meeting. Every Fellow intending to propose a motion must furnish the Registrar with a copy of his intended motion in sufficient time to enable the Registrar to forward a copy of the same with notice hereinbefore mentioned.

13. No motion involving a change in or an addition to the Rules shall be considered by the Senate except at an Annual Meeting; and no such motion shall be brought forward unless at least three calendar months' notice thereof in writing, signed by at least ten Fellows, shall have been given within the twelve months immediately preceding such Annual Meeting to the Registrar, who shall at once communicate the same to each Fellow in a registered cover through the post to his recorded address.

THE FACULTIES.

14. There shall be Faculties of Arts and Law and, with the approval of the Governor-General in Council, of Science, Engineering, and Medicine.

15. The Director of Public Instruction and all Principals of affiliated Colleges, who are Fellows of the

University, shall be *ex-officio* members of the Faculty of Arts, in addition to the members who may be elected to that Faculty under the Rules, provided that the number of Fellows on the Faculty of Arts shall not exceed 35 nor be less than 15

16   The number of Fellows on the Faculty of Law shall not exceed thirteen or be less than five

17   In case of the Governor-General in Council approving the constitution of a Faculty of Science, the number of Fellows to constitute such Faculty shall be determined at the first Annual Meeting of the Senate after the notification of such approval

17(a)   The Director of Public Instruction and all Principals of affiliated Colleges, who are Fellows of the University, shall be *ex-officio* members of the Faculty of Science, in addition to the members who may be elected to that Faculty under the Rules, provided that the number of Fellows on the Faculty of Science shall not exceed twenty nor be less than twelve

18   In case of the Governor-General in Council approving the constitution of a Faculty of Engineering, the number of Fellows to constitute such Faculty shall be determined at the first Annual Meeting of the Senate after the notification of such approval

18(a).   The number of Fellows to constitute the Faculty of Engineering shall not exceed nine and not be less than five

19   In case of the Governor-General in Council approving the constitution of a Faculty of Medicine, the number of Fellows to constitute such Faculty shall

be determined at the first Annual Meeting of the Senate after the notification of such approval.

20.   Any Fellow may be a member of more Faculties than one.

21.   The election of a Fellow to a Faculty shall take place at an Annual Meeting of the Senate and not at any other time.   Except as provided by Rule 22, the Senate shall not proceed to consider the question of the election of any Fellow to a Faculty, unless (a) such Fellow has been proposed and seconded for election to the Faculty at a Meeting of the Senate held at least thirty days before and within twelve months prior to such Annual Meeting; or unless (b) two Fellows have at least thirty days before and within twelve months prior to such Annual Meeting given to the Registrar a notice in writing signed by them, stating their intention respectively to propose and second at such Annual Meeting such Fellow for election to the Faculty.

As soon as practicable after the receipt of such notice as aforesaid by the Registrar, he shall communicate the same to the Syndicate.

22.   Any person elected by the Senate at its Annual Meeting in 1889 and approved by the Chancellor as a Fellow may, if proposed and seconded at that meeting for election to a Faculty, be elected a member of such Faculty by the Senate at that meeting.

23.   Except as provided by Rules 25, 26 and 28, each member of the Faculty of Arts may continue to be a member of such Faculty until the fifth Annual Meeting

of the Senate subsequent to that at which he was elect-
ed a member of such Faculty, when he shall cease to be
a member of such Faculty, but he shall nevertheless be
eligible for re-election

24   Except as provided by Rules 25, 26 and 29, and
except as may be provided under Rules 30 31 and 32,
each member of any Faculty, other than the Faculty of
Arts, may continue to be a member of such other
Faculty until the third Annual Meeting of the Senate
subsequent to that at which he was elected a member of
such other Faculty, when he shall cease to be a member
of such other Faculty, but he shall nevertheless be
eligible for re-election

25   A member of a Faculty who has not attended at
least one meeting of the Faculty within any two con-
secutive years after he has been elected a member of
the Faculty shall, at the expiration of such two years,
cease, ipso facto, to be a member of the Faculty, but
he shall nevertheless be eligible for re-election.

26   Any member of a Faculty may retire from
membership of the Faculty on giving a notice to that
effect signed by him to the Registrar

27.   When a Fellow by death, or under Rule 25, or
under Rule 26, has ceased to be a member of a Faculty,
the Registrar shall, as soon as practicable, notify such
fact to the Syndicate, and the Syndicate may there-
upon, but subject to Rule 50, appoint a Fellow to act as
a member of such Faculty until the then next ensuing
Annual Meeting of the Senate at which a Fellow to fill
the place so vacated can be elected

28. Of the members of the Faculty of Arts elected at the Annual Meeting of the Senate in 1889, one-fifth shall cease to be members of the Faculty at the Annual Meeting of the Senate in 1890; one-fifth shall cease to be members of the Faculty at the Annual Meeting of the Senate in 1891; one-fifth shall cease to be members of the Faculty at the Annual Meeting of the Senate in 1892; and one-fifth shall cease to be members of the Faculty at the Annual Meeting of the Senate in 1893.

The members of the Faculty of Arts so ceasing as aforesaid to be members of the Faculty shall nevertheless be eligible for re-election.

At the Annual Meeting of the Senate in 1889, the members of the Faculty of Arts shall determine amongst themselves by lot who shall cease to be members of the Faculty at the respective Annual Meetings in 1890, 1891, 1892 and 1893, in this rule mentioned.

29. Of the members of the Faculty of Law elected at the Annual Meeting of the Senate in 1889, one-third shall cease to be members of the Faculty at the Annual Meeting of the Senate in 1890, and one-third shall cease to be members of the Faculty at the Annual Meeting of the Senate in 1891.

The members of the Faculty of Law so ceasing as aforesaid to be members of the Faculty shall nevertheless be eligible for re-election.

At the Annual Meeting of the Senate in 1889 the members of the Faculty of Law shall determine amongst

themselves by lot who shall cease to be members of the Faculty at the Annual Meetings in 1890 and 1891 respectively

30   In case of the Governor-General in Council approving the constitution of a Faculty of Science, the Senate shall make provision similar to that contained in Rule 29, for the first elected members of the Faculty of Science ceasing to be members of such Faculty

30 (a)   Of the members of the Faculty of Science elected at the Annual Meeting of the Senate, 1895, one-third shall cease to be members of the Faculty at the Annual Meeting of the Senate in 1896, and one-third shall cease to be members of the Faculty at the Annual Meeting of the Senate in 1897.

The members of the Faculty of Science ceasing as aforesaid to be members of the Faculty shall nevertheless be eligible for re-election.

At the Annual Meeting of the Senate in 1895, the members of the Faculty of Science shall determine amongst themselves, by lot, who shall cease to be members of the Faculty at the Annual Meetings in 1896 and 1897 respectively

31. In case of the Governor-General in Council approving the constitution of a Faculty of Engineering the Senate shall make provision similar to that contained in Rule 29, for the first elected members of the Faculty of Engineering ceasing to be members of such Faculty.

31 (a). Of the members of the Faculty of Engineering elected at the Annual Meeting of the Senate in 1894, one-third shall cease to be members of the Faculty at the Annual Meeting of the Senate in 1896, and one-third shall cease to be members of the Faculty at the Annual Meeting of the Senate in 1897.

The members of the Faculty of Engineering ceasing as aforesaid to be members of the Faculty shall nevertheless be eligible for re-election.

At the Annual Meeting of the Senate in 1895, the members of the Faculty of Engineering shall determine amongst themselves by lot who shall cease to be members of the Faculty at the Annual Meetings in 1896 and 1897 respectively.

32. In case of the Governor-General in Council approving the constitution of a Faculty of Medicine, the Senate shall make provision similar to that in Rule 29 for the first elected members of the Faculty of Medicine ceasing to be members of such Faculty.

33. Each Faculty shall elect its own President at the Annual Meeting of the Faculty.

34. The term for which a President of a Faculty is elected shall be one year.

35. A President of a Faculty at or after the expiration of his term of office may be re-elected.

36. On a vacancy occurring in the office of President of a Faculty before the expiration of the term of

his office, the Vice-Chancellor shall select a member of the Faculty to act as President for the remainder of such term.

37   Every meeting of a Faculty shall be convened by the Registrar under the orders of the Syndicate or of the President of the Faculty

38   Each Faculty shall hold an Annual Meeting, to commence on a date between the 1st and 15th of March, to be fixed by the Vice-Chancellor

39   Not less than fourteen days' notice of any Meeting, including the Annual Meeting, shall be given, such fourteen days to be computed from the date of the issue of the notice by the Registrar   Such notice shall be sent in a registered cover through the post to each member of the Faculty at his recorded address and shall also be exhibited on a notice board in the Registrar's office

40   With the notice mentioned in Rule 39 shall be forwarded an *Agenda* paper stating the business to be brought before the meeting, and such business only shall be considered at the meeting

41   At all meetings of a Faculty the President shall take the chair   In the absence of the President the members present shall choose a Chairman   Every question at a meeting shall be decided by a majority of the votes of the members present   In case of an equality of votes the Chairman shall have a second vote.

42. Five members of the Faculty of Arts shall constitute a *quorum*. Three members of any other Faculty shall constitute a *quorum* of such Faculty.

43. Each Faculty shall from time to time report to the Syndicate on the courses of study to be followed by candidates for the examinations of the University, and the examinations to be passed and the other conditions to be fulfilled by candidates for degrees, and on any other question submitted to it by the Syndicate.

44. No proposal which has been rejected by the Syndicate and the Faculty which it concerns shall be considered by the Senate except at an Annual Meeting, and not then unless at least thirty days' notice in writing, signed by at least ten Fellows, of an intention to bring such proposal before the Senate for its consideration, shall have been given within twelve months immediately preceding such Annual Meeting to the Registrar.

THE SYNDICATE.

Five other Fellows of the University, to be elected to the Syndicate by the Senate:—

Provided that any member of the Syndicate who shall cease to be a Fellow of the University or who shall cease to hold the qualification upon which he was elected to the Syndicate shall, *ipso facto*, cease to be a member of the Syndicate.

In the absence from India of the Director of Public Instruction, North-Western Provinces and Oudh, and of any of the Principals of the Muir Central College, Allahabad, the Queen's College, Benares, Thomason Engineering College, Roorkee, Canning College, Lucknow, Agra College, the Muhammadan Anglo-Oriental College, Aligarh, and of the Secretary to Government elected as such to the Syndicate under this Rule, the person duly authorized to act as such Director or Principal or such Secretary to Government shall be deemed to be the Director of Public Instruction or Principal or the Secretary to Government elected as such to the Syndicate under this Rule as the case may be, for the purpose of this Rule.

46.   Until the second Monday in January, 1889, the first Syndicate shall consist of the *ex-officio* members mentioned in Rule 45, and of nine other Fellows to be

elected at the meeting at which these Rules are considered.

47.   The term of an elected member of the Syndicate shall be three years, and he shall be eligible for re-election   Any elected member of the Syndicate who has not attended a meeting of the Syndicate within twelve months, shall cease to be a member of the Syndicate

48   The election of Fellows to the Syndicate shall take place at the Annual Meeting of the Senate   No notice of an intention to propose a Fellow of the University for election to the Syndicate need be given before the Annual Meeting at which the election may take place —

Provided that whenever there is a vacancy in the number of elective members of the Syndicate, the Syndicate may, but subject to Rule 50, appoint a Fellow of the University qualified for election to the vacant member ship to act as a member of the Syndicate until the then next ensuing Annual Meeting of the Senate at which a Fellow of the University to fill such vacancy can be elected.

49.   All meetings of the Syndicate and the Faculties shall be held at Allhabad, unless for special cause the Chancellor or Vice-Chancellor direct otherwise.

50   The Syndicate shall ordinarily meet at such times as they shall fix for that purpose at their Annual Meeting, which shall be held immediately after the Annual Meeting of the Senate   The Syndicate shall meet at some convenient time shortly before each Annual Meeting of the Senate to consider and deal with

questions to be brought before the Senate at its Annual Meeting. The Syndicate shall also meet when convened by the Vice-Chancellor. The Vice-Chancellor shall not convene the Syndicate at any time between the 25th April and the 20th October, except for urgent business, to be certified as such by him. Any resolution passed at a meeting of the Syndicate between the 25th April and the 20th October. in any year shall, if not confirmed at the first meeting of the Syndicate held after such 20th October, thenceforth cease to be of effect, except a resolution on a matter for the consideration of which the Chancellor has directed the Senate to be convened.

51.   Not less than seven days' notice of any meeting including the Annual Meeting shall be given; such seven days to be computed from the date of the issue of the notice by the Registrar, and to be sent in a registered cover through the post to each member of the Syndicate at his recorded address.

52.   With the notice mentioned in Rule 51 the Registrar shall forward to each member of the Syndicate an *Agenda* paper stating the matter or matters to be brought before that meeting.

53.   Four members of the Syndicate shall form a *quorum.*

54.   It shall be the duty of the Syndicate to appoint, suspend, and remove Professors, Lecturers, Examiners, and all other officers and servants of the University, except the Registrar : to fix their salaries and

emoluments; to order examinations in conformity with the Regulations and to fix the time at which they shall be held, to recommend for degrees, honours, and rewards, to keep the accounts of the University, and to correspond on the business of the University with the Government and with all other authorities and persons. A Professor or Lecturer in the University may also be appointed in any other manner and on any terms that may be agreed upon between the Senate and a donor or donors providing the funds for the purpose.

55   Any Fellow or Fellows may make any recommendation to the Syndicate, and may propose any Rule or Regulation for the consideration of the Syndicate Such recommendation or proposal shall be sent in the form of a letter through the Registrar.

THE REGISTRAR.

69.   Pending any grant of arms to the University of Allahabad, the Common Seal of the University shall bear the Royal Arms surrounded by a circular band, the upper half of which band shall bear the words "University of Allahabad," and the lower half shall bear the motto *Quot rami tot arbores.*

RULES OF DISCUSSION IN THE SENATE.

70.   Every motion shall be in an affirmative form ; it shall begin with the word "that," and must be seconded ;

otherwise it will drop. A motion standing in the name of a Fellow who is absent from a meeting may be proposed by any other Fellow

71   When a motion has been seconded, the terms of it shall be stated by the Chairman and the discussion thereof, if any is raised, will then proceed If no discussion is raised, or no amendment thereto is proposed, the motion will at once be put to the vote.

72   Every amendment must be seconded ; otherwise it will drop

73   When an amendment has been proposed and seconded the terms of such amendment shall be stated by the Chairman, and the discussion of the original motion and the amendment thereto will proceed *pari passu* Provided that only one motion and one amendment thereto shall be entertained at the same time.

74.   A motion once brought forward and negatived, or in respect of which an amendment has been carried, shall not be again proposed at the same meeting or any adjournment thereof   A motion substantially identical in part with one already brought forward may be brought forward with the omission of such part   The same rule will apply to an amendment proposed and negatived.

75   No Fellow shall be allowed to speak more than once in the course of the discussion of 'a motion, or of a motion and an amendment, except the proposer of the substantive motion, who will have a right of reply in either case at the close of the discussion. Provided

that a Fellow who has spoken on a motion before the proposal of an amendment thereto shall be entitled to speak once upon such amendment. When the proposer has concluded his reply, no further discussion of the motion, or the motion and the amendment, can take place. Provided always that the mover of an amendment or of the dissolution or adjournment of the meeting or of the adjournment of the discussion, or that the meeting pass to the next business on the *Agenda* shall have no right of reply.

76. A motion for (1) dissolution of the meeting; (2) adjournment of the meeting; (3) adjournment of the discussion; or (4) that the meeting pass to the next business on the *Agenda*, may be made at any time as a distinct question, but not as an amendment nor whilst a Fellow is speaking.

77. If a motion for dissolution of the meeting is carried, the meeting will stand dissolved. If a motion for adjournment of the discussion is carried, such discussion will stand postponed to the next meeting. If a motion that the meeting pass to the next business on the *Agenda* is carried, the substantive proposal and any amendment thereto under discussion cannot further be discussed at such meeting.

78. No amendment can be proposed to a motion for adjournment of the meeting or of the discussion, except one substituting a time other than that proposed for such adjournment. A meeting or discussion continued on adjournment is to be deemed one with that preceding the adjournment.

79   A motion of the kind mentioned in Rule 76 shall be dealt with and disposed of forthwith   If negatived, the substantive discussion will be resumed and continued in the same manner as if no such motion had been made

80   A motion of the kind mentioned in Rule 76 or an amendment thereto, such as is permitted by Rule 78, shall not be proposed or spoken to by any Fellow who has already spoken in the substantive discussion.

81   When one motion of the kind mentioned in Rule 76 has been proposed and negatived, no other motion of the same kind shall be again proposed, except with the leave of the Chairman, and not until he is of opinion that a reasonable interval has elapsed since such former motion was negatived   If a second motion of the kind hereinbefore mentioned is sanctioned by the Chairman, no discussion shall take place upon it, but it shall be put to the vote forthwith

82.   A motion or amendment may be withdrawn by the proposer with the consent of the meeting, which consent shall be presumed, if the proposer states his wish to withdraw the same, and the Chairman after an interval which in his opinion is reasonable announces that it is withdrawn.   Provided that if five or more Fellows rise and object to such withdrawal, the motion or amendment shall at once be put to the vote in the ordinary manner.

83   A Fellow desiring to speak in a discussion must rise in his place at the close of a speech.   If more than

one Fellow rises, the Chairman shall determine which is to be heard, and shall call upon the Fellow selected by name.

84. The Chairman has the same right as any other Fellow of proposing or seconding a motion or amendment, and of addressing the meeting.

85. Any Fellow may at any time in the course of discussion rise and call the attention of the Chairman to a point of order. If a point of order is raised by one Fellow in the course of a speech by another, the speaker shall resume his seat until the Chairman has decided it. If the Chairman is of opinion that the point of order has been raised vexatiously, or for the purpose of mere obstruction or interruption to the discussion or to the business of the meeting, he shall so declare it, and it shall be deemed a breach of order.

86. The Chairman shall be the sole judge of any point of order, and may of his own instance, or at the instance of a Fellow, call any Fellow who is speaking to order. If the Fellow so called to order disregards such call, the Chairman may direct him to sit down. If the Fellow so directed to sit down disobeys such orders, or any Fellow contumaciously disregards or questions any order or ruling of the Chairman, the Chairman may forthwith take the vote of the meeting as to whether such Fellow shall not be suspended from his functions as a Fellow for the meeting. If two-thirds of the Fellows present are in favour of such suspension, the Chairman shall declare the Fellow

offending, suspended, and such Fellow shall be bound immediately to withdraw

87   When a discussion is concluded, the Chairman shall, if no amendment has been proposed, put the motion to the vote   If an amendment has been proposed, he shall first state the terms of the motion and then those of the amendment thereto, and shall then put the amendment to the vote   If an amendment is carried, the motion as altered thereby shall be stated by the Chairman, and may then be discussed as a substantive question to which an amendment may be proposed in manner hereinbefore provided   If an amendment is negatived, the substantive motion shall, in the absence of any other amendment being proposed thereto, be put to the vote   If such amendment is proposed, the discussion will proceed in manner hereinbefore provided

88   On putting a motion or amendment to the vote, the Chairman shall first call for the expression of the opinion of the meeting by a show of hands, and shall declare the result thereof   Any fellow dissatisfied with such declaration may then and there demand a division, by rising in his place and informing the Chairman to that effect   The Chairman shall thereupon select two or more from among the Fellows to act as tellers, and shall hand to them a voting paper or papers ruled in two columns, one headed "for" and the other "against."   The tellers shall then take such voting paper to each Fellow, who shall subscribe his name in one or other of the columns, according as he

is in favour of or against the motion or amendment before the meeting. In case of voting by proxy within sub-section (1) of section 11 of the University Act, a Fellow holding a proxy or proxies shall similarly record the vote or votes by proxy, having first delivered to the Registrar, or in his absence to the Chairman of the meeting, the authority or authorities under which such vote or votes by proxy may be given.

89. When all the Fellows present desiring to vote, including the tellers, have subscribed their names on the voting paper or papers, the tellers shall cast up the numbers of the two columns, and when the totals have been recorded, shall sign their names thereto and hand the voting paper or papers to the Chairman who will thereupon declare the result of the division. When the numbers are equal, the Chairman shall have a second or casting vote, and if he gives it shall record the same on the voting below the signatures of the tellers as follows: I give my casting vote ["for" or "against" the motion or amendment, as the case may be], and shall sign his name and description as Chairman.

90. The Chairman at a meeting of the Syndicate or a Faculty may apply these Rules of Discussion at his discretion.

versity of Bombay

The Intermediate Examination of Arts in the Uni-
versity of the Punjab (passed in English)

37. The Registrar shall authorize the admission of
students who have failed in any of the examinations
mentioned in Bye-law 36 into Second Year Classes in
conformity with the principles embodied in the Inter-
College Rules

38 With reference to Regulation 10 of the Regula-
tions in Arts, students who have attended Colleges
affiliated in Arts to the University of Calcutta, the
University of Madras, the University of Bombay, or the
University of the Punjab, for not less than one academi-
cal year, are admissible into the Second Year Classes of
Colleges affiliated in Arts to the University of Allahabad
for the purpose of the Intermediate Examination in
Arts · provided that they are transferred to these pro-
vinces under a Civil Surgeon's certificate for the re-
covery of their health, or provided that their parents or
guardians migrate or are transferred to these provinces

With reference to Regulation 20, students who have
attended Colleges affiliated in Arts to the aforesaid

Universities for not less than three academical years, are admissible to Fourth Year Classes of Colleges affiliated to the University of Allahabad, for the purpose of the B.A. Examination : provided that they are transferred to these provinces under a Civil Surgeon's certificate for the recovery of their health, or provided that their parents or guardians migrate or are transferred to these provinces. With reference to the same Regulations students who have attended Colleges affiliated in Arts to the aforesaid Universities, and who may join Colleges affiliated to the University of Allahabad for reasons other than those mentioned above, shall be allowed to present themselves for the Intermediate and B.A. Examinations : provided that in calculating their attendance every two days' attendance in a College affiliated to another Indian University shall count as equivalent to one day's attendance in a College affiliated to the University of Allahabad.

39. The Principals of Colleges affiliated in Arts and Law shall be requested to fix their academical years so that the academical years of the Second and Fourth Year Classes and of the Final Law Class may terminate in time to allow the calculation of the 75 *per cent.* of attendance required under Regulations 10 and 20 of the Regulations in Arts and of Regulation 2 of the Regulations in Law respectively to be made before forwarding the certificates.

40. The minimum 75 *per cent.* of attendance required under Regulations 15 and 26 of the Regulations in Arts, from candidates who have failed in the Intermediate Examination in Arts and the

B.A Examination shall be counted only on the fresh year of attendance

41   In the case of candidates who have not been sent up for the B A. or Intermediate Examinations on account of their attendance having fallen short of the required amount, the 75 *per cent* of attendance required under Regulations 10 and 20 of the Regulations in Arts shall be counted on the aggregate of the year immediately preceding the Examination and any one other previous academical year

42   Schoolmasters, in order to be admitted to an Examination, must be of two years' standing as Schoolmasters since their last Examination, and their application should be accompanied with the subjoined form signed by an Inspector of Schools.—

FORM OF APPLICATION FOR SCHOOL-MASTERS

CERTIFIED that *A B* is a Schoolmaster of two years' standing as such since he passed the——Examination, and as such I recommend him to be admitted to the ——Examination

43   Unpaid or honorary teachers are not admissible as teachers to the examinations of the University.

Inspecting Officers of the Education Department and Schoolmasters of Lower Bengal, Bombay, Madras and the Punjab shall not be admitted by grace of the Syndicate to the Intermediate Examination in Arts under Regulation 11 of the Regulations in Arts, or to the B A Examination under Regulation 21 of the same Regulations.

SCHOOLS AND AFFILIATED COLLEGES.

44.   The following rules shall apply to schools preparing candidates for the Entrance Examination :—

(*a*)   That a scholar of an unaided school is not admissible as such to the Entrance Examination, unless the Inspector of Schools for the Province, Circle or State to which the school belongs certifies to the Registrar that the staff of the school is competent to teach the Entrance Course or unless the scholars of such school are admitted as such to the Entrance Examination of another Indian University.

(*b*)   That the manager or proprietor of an unaided school in the North-Western Provinces and Oudh who desires that his school shall be recognized as competent to prepare pupils for the Entrance Examination shall, not later than two weeks after the commencement of each school year, submit to the Inspector of Schools a statement in the form annexed giving the details of the instructive staff which he undertakes to maintain throughout the current school year.   The Inspector will, after such inquiry as he may think needed, inform the manager or proprietor whether or not he will certify the school as competent to prepare candidates for the Entrance Examination, provided the staff as detailed is maintained.

(*c*)   That if the Inspector of a Circle in the North-Western Provinces and Oudh is satisfied by inquiry from the manager or otherwise that the staff as above has been maintained, he will, during the month of December

in each year, send to the Registrar a list of the unaided schools in his Circle which in his opinion are competent to prepare candidates for the Entrance Examination. He will send a copy of this list to each of the schools concerned, and publish it in any convenient manner

(d)   The Director of Public Instruction, North-Western Provinces and Oudh, will forward to the Registrar, during December of each year, a list of the Government and Aided Schools in which the Entrance Class is maintained with his approval

(e)   Candidates who may have studied in uncertified schools shall be shown in the list of candidates as "Private" candidates, and not as pupils of any school

(f)   The Director of Public Instruction, North-Western Provinces and Oudh, shall be requested to afford the assistance of his Department which may be needed to give effect to the above resolution

(g)   The Syndicate may refuse to recognize any school that appears to exercise an injurious influence upon discipline, from the non-observance of the Inter-School Rules, or from any other cause.

(h)   No institution shall apply for affiliation to a higher standard until it has sent up candidates for examination, for at least three years on its present standard.

45   No College shall be affiliated, unless on condition that it adopts and enforces the Inter-College Rules.

46. The following Resolutions by the Syndicate, dated 2nd of March, 1895, amending the Course in English, have been declared Bye-laws of the Syndicate :—

(1) *Entrance Examination :*

  (a) With reference to Regulation 6 (1) of the Regulations in Arts,—that the present provision for *unseen* passages be emphasised by allotting 20 marks, out of a total of 50 for answers in such *unseen* passages ;

  (b) With reference to the same Regulation 6.— that the Paper in English Grammar be set with the object of testing the candidate's *practical* knowledge of the subject as in Parsing and Analysis, and shall not consist of mere rules and technicalities ;

  (c) That if the use of a prescribed Text-book be retained, such Text-book shall be changed annually, in whole or in part, in the same way as in the English Courses for the Intermediate and B.A. Examinations.

INTER-COLLEGIATE RULES.

47. The following Rules are to be observed in all Colleges affiliated to the University of Allahabad :—

1. A student on first joining a College is required to bring with him a certificate as to his conduct, from the Head Master of the High School from which he matriculated, or passed the Final Standard Examination in the case of Europeans.

In the case of students who have matriculated as private candidates, such information regarding previous conduct must be furnished to the Principal as he may think necessary.

2. In the case of students desiring to migrate from one College to another, after having failed in any University Examination held immediately prior to the date of his application for admission, a leaving-certificate showing the subject or subjects in which they failed will be required.

3. A student will be recognized as a member of a College as soon as he has been accepted by the Principal and paid his admission and first month's fee in case of fees being required by the College.

4. If during an academical year a student desires to leave one College to join another after having duly qualified according to Rule 3, he must—(1) give notice

of his intention to leave, (2) make payment of all
College fees due up to date, and in addition pay a fine
of Rs 10, and (3) refund whatever scholarship or bursary
has been paid to him from College funds, unless the
refund of scholarships be specially excused by the
Principal

These payments having been made (or excused) the
Principal will grant a transfer-certificate in the form
hereinafter prescribed. Exemption from the payment
of the fine will be granted in two cases—(1) in the
case of the removal to another district of the parent
or guardian with whom the student has been living
and (2) when a change of air is recommended by a
recognized Medical Practitioner for the improvement of
a student's health. The refund of scholarships, etc.,
will, in such cases also, depend on the decision of the
Principal,—

Provided always that, unless at the commencement
of the academical year, a student will be refused
admission into a college situated in the same city or
district as the College from which his transfer-certificate
was issued, except with the permission of the Principal
of the last-named College

5   A student who has not been permitted to continue

Three papers will be set One paper will be set from the Course in Prose and Poetry prescribed below, together with a simple passage or passages of English from a book not prescribed

A second paper will be in English Grammar and idiom, and a third paper in translation from an Indian vernacular (Urdu, Hindi, Mahratti, Gujerati, Bengali) or other modern language (French, German or Italian) into English, but for such translation there will be substituted English Composition in the case of any candidate whose mother tongue is English.

CHARLES KINGSLEY: Heroes.

CAPTAIN MARRYAT: Masterman Ready (abridged as in Bells's Reading Books).

GOLDSMITH: The Deserted Village.

MACAULAY: Horatius.

History and Geography.

One paper will be set in History, and one paper in Geography.

One question in Map-drawing will be included in the question-paper in Geography.

History—BUCKLEY (ARABELLA): History of England.

HARA PRASAD SASTRI: History of India.

Geography (*General*)—CLARKE: Geographical Reader. (Macmillan.) (Not *Geographic Reader*.)

Geography (*Physical*)—To the extent given in GEIKIE'S Primer of Physical Geography.

Mathematics.

In Mathematics, one paper will be set in Arithmetic and Algebra, and a second paper *in Geometry* and Mensuration.

The Course in Arithmetic includes the four Simple Rules, Vulgar and Decimal Fractions, Reductions, Practice, Proportion, Simple Interest, Discount, and Extraction of Square Root, Compound Interest, Present Worth, Discount and Stocks.

The Course in Algebra includes the four Simple Rules, Fractions, Proportion, Simple Equations, Extraction of Square Root, Greatest Common Measure, and Least Common Multiple

The Course in Geometry includes the first four Books of Euclid, with easy deductions, and at least one-half the questions set shall be such as can be answered from the text-book of Euclid.

The Course in Mensuration includes so much as presupposes a knowledge of the first four Books of Euclid. The Course in Mensuration also includes the Field Book

Classical Languages

In Classical Languages, one paper will be set in a text-book and Grammar, and a second paper in the translation into English of easy passages from a book not prescribed, and in the translation into the Classical Languages from English of easy sentences illustrating grammatical principles.

Sanskrit.

Aditya Ram Bhattacharya Selections in Prose and Poetry. (Omitting Valabadha and Andhamuniputrabadha.)

Raj Krishna Banerji : Upakramanika or any other elementary book in English or in Hindi covering the same ground.

(Sanskrit must be written in the Devanagri character only)

Arabic.

SYYAD AMJAD ALI : Selections in Arabic Prose and Poetry, together with the elements of Arabic Grammar as contained in Mizan Munsha'ib, Sarf Mir, and Nahv Mir.

Persian.

M. MUHAMMAD SHIBLI : Selections in Persian Prose and Poetry.

Greek.

XENOPHON : Anabasis, Books I, II, III.

SMITH : Initia Græca, Vol. I.

Latin.

VIRGIL : Æneid, Books IV and V.

CÆSAR : De Bello Gallico, Books IV and V.

SMITH : Principia Latina, Part I.

Hebrew.

The Book of Genesis.

ARNOLD : First Hebrew Book.

enlarged.

Geometrical Drawing.—Plane Geometry as in Gill's New School of Art Geometry to p. 92.

Model Drawing.—Rectilineal and curved forms in outline and in addition simple every-day objects, such as tables, trestles, *surahis*, &c.

Elementary Physics and Chemistry.

Roscoe: Primer of Chemistry.

Balfour Stewart : " Primer of Physics."

Agriculture with Surveying.
Chain Surveying.

I. Measurement.—Structure and use of chains (Gunter's and 100-feet chains); points to be kept in view in chaining; the duties of the leader and the follower; rectangular and oblique offsets; use of offset rod (latha or gatha); erecting perpendiculars with the chain only; description and use of cross staff and optical square; methods of overcoming obstacles in the chain line, such as building, tank, swamp, &c.; use of chain angles; chaining on a slope; finding distances of inaccessible points with the chain; keeping field-book; checking by tie-lines; liability to errors in chain; provision for error of chain; maximum error allowed in lineal measurement; testing chain's length by standard measuring-rods.

II. Plotting.—Plotting to scale; conventional representations of ground and of objects on the ground; construction and use of simple and diagonal scale; use of compasses and parallel rulers; representative fractions; copying and reduction of plans by squares.

III. Finding areas —Rules of mensuration, use of area-comb (talc square)

Agriculture.

First Book of Agriculture for the use of Schools in Southern India by Charles Benson and C K. Subba Row (Addison & Co , Madras).

INTERMEDIATE EXAMINATION, 1899

A COURSE

English.

There will be one paper in Prose, set from the prescribed Course , and a second paper will be set, half from the Poetry Course and half from unseen passages ; and a third paper will be in Translation from a vernacular into English. The translation is to be as literal as is compatible with correctness of idiom and expression. English Composition will be substituted for Translation in the case of any candidate whose mother-tongue is English.

Scott   Lady of the Lake

Goldsmith   The Traveller.

Milton   Comus.

- ADDISON : as in Golden Treasury Series.

F. HARRISON : Life of Oliver Cromwell.

HELPS : Life of Columbus.

WEST : Elements of English Grammar.

* Arithmetic, Algebra and Geometry.

Arithmetic :

Algebra : Quadratic equations; theory of quadratic equations and expressions; imaginary expressions; arithmetical, geometrical and harmonical progressions; permutations and combinations; binomial and exponential theorems.

Geometry : Euclid,—the definitions only of Book V; Book VI and the first 21 Propositions of Book XI, with easy deductions.

Trigonometry and Geometrical Conic Sections.

Trigonometry, including logarithms; methods of measuring angles; trigonometrical ratios and the simple relations connecting them; relations between trigonometrical ratios of angles differing by multiples of right angles; trigonometrical transformations; solution of triangles; area of a circle; the properties of logarithms; the use of logarithmic tables; properties of triangles.

---

*1. *Principles of Arithmetic*—including scales of Notation. (H. Cox ; Macmillan & Co.)

2. *Arithmetic, General*—omitting Commercial Arithmetic, *i.e.*, Stocks, Discount, Interest, &c.

3. *Mensuration of the simpler solids*—cylinders, parallelopipeds, prisms, areas, pyramids, prismoids and spheres.

Geometrical Conic Sections

MUKHOPADHYA Geometry of Conic Sections

Deductive Logic.

The following Syllabus is prescribed :—First Principles and Laws of Thought ; Logical use of Language ; Terms, Categories and Predicables ; Formal Division and Definition ; Propositions and their Import ; Forms of Immediate Inference ; Syllogism and other varieties of Formal Reasoning ; Fallacies, Functions of Syllogism, Trains of Reasoning, Demonstration and Necessary Truth

Classical Languages.

The Classical Language must be one of the following :—

Sanskrit.	Latin
Arabic	Greek
Persian.	Hebrew

Sentences will be given for translation from English into the Classical Language, and from the Classical Language into English One paper in each such language will also include questions on grammar and idiom

B.Sc. EXAMINATION, 1899.

At the Examination for the Degree of Bachelor of Science, every candidate shall be examined in—

- (I) Mathematics:
- (II) Physics.
- (III) Chemistry.

Mathematics.

(1) Analytical Geometry (limited to rectangular axes).

(2) Differential Calculus (as in Williamson, Chapters I—V and IX).

(3) Integral Calculus—(as in Edwards' Integral Calculus, Chapters I—VI).

(4) Dynamics—Hicks's Dynamics :—

There will be two question-papers only.

Physics.

The Examination in Physics shall consist of two papers and a practical examination.

The following Syllabus is prescribed:—

General Properties of matter—

Law of Gravitation. Elementary cases of attraction, *e.g.*, attractions of a sphere and spherical shell on internal and external points, attraction of a disc and attraction of any closed surface on a point just outside. Definition of Potential and its determination in simple cases. Definition of Equipotential surface and

lines of force, and elementary propositions connected therewith Definition of Elasticity HOOKE'S Law, and determination of YOUNG'S Modulus Definition of Moments of Inertia and Radius of Gyration Calculation of Moments of Inertia of a sphere about any axis, and of a cylinder about axis perpendicular to or parallel to axis of cylinder BOYLE'S Law Air-pump Vibration of simple pendulum and harmonic motion.

Sound—

Nature of sound waves Determination of velocity of sound and its connection with the elasticity and density of the medium DOPPLER'S principle Reflection and refraction of sound Methods of determining the frequency and wave-lengths of notes Interference of sound waves Vibrations of strings and columns of air Experimental methods of analysing complex sounds LISSAJOUS'S figures Application of the equation $y = a \cos \frac{2\pi}{\lambda}(vc - x)$ to problem in interference

Heat—

Construction and theory of thermometers Coefficients of expansion, and their variation with temperature Unit of heat and calorimetry Specific heat Latent heat Vapour pressures and their determination Radiant heat Its reflection, refraction, absorption and emission Conductivity Determination of coefficients of conductivity Indicator diagrams CARNOT'S Heat engine First and second laws of Thermo-dynamics CARNOT'S function and THOMSON'S scale of temperature Determination of mechanical equivalent of heat.

Light—

Determination of the velocity of light. Elementary mathematical formulæ relating to the reflection and refraction of light. Mirrors. Lenses. Dispersion and spectrum analysis. The construction of achromatic lenses. Undulatory theory of light. Rectilineal propagation of light. Deduction of the laws of reflection and refraction. Interference of light. NEWTON'S rings, and colours of thin plates. Diffraction. Double refraction in uniaxal crystals. Plane, circularly, and elliptically polarised light. Interference of polarised light. Rotation of plane of polarisation.

Magnetism—

Method of drawing lines of magnetic force. Magnetic potential. Action of one magnet on another placed broadside or endways. Determination of magnetic moments, horizontal component of Earth's magnetic force, and the dip. Magnetic induction. Coefficients of magnetisation and induction. Permeability. Diamagnetism.

Electricity—

Proof of the law of Electrical repulsion. Specific inductive capacity. THOMSON'S quadrant and absolute electrometers. Calculation of potential, capacity, and energy in simple cases. Frictional and inductive machines. The Electric current. Galvanometer. Determination of resistances. OHM'S Law. JOULE'S Law. Determination of electromotive force and internal resistance of batteries. Properties of a conjugate

system of conductors. Electrolysis and electro-chemical equivalents. Thermo-electrical currents. PELTIER and THOMSON's effects. Electro-magnetism. Electromotive force produced in conductors by altering the magnetic field surrounding them Coefficients of mutual and self-induction RUHMKORFF's coil: Elementary theory of dynamo Units, electrostatic and electro-magnetic Definitions of Coulomb, Ampère, Volt, Farad, Ohm, Watt and Joule

The *practical* Examination will be in the following experiments from GLAZEBROOK SHAW's Practical Physics :—Nos. 1, 3, 4, 7—10, 12, 13, 15—17, 20, 22, 24, 26, 27, 29, 30, 32—34, 36—40, 48, 49, 51—54, 56, 57, 62, 69—78, 80

The following books are suggested for the guidance of lecturers and students, but are not prescribed :—

MAXWELL   Matter and Motion

FOSTER and ATKINSON   Elementary Treatise on Electricity and Magnetism

J. J. THOMSON's Elements of the Mathematical Theory of Electricity and Magnetism

GLAZEBROOK and SHAW   Practical Physics

DANIELL . Principles of Physics

DESCHANEL · Natural Philosophy.

MAXWELL : Theory of Heat

EVERETT   Vibratory Motion and Sound

GANOT   Natural Philosophy

GLAZEBROOK : Heat and Light

GLAZEBROOK : Physical Optics

PRESTON : Theory of Heat.

PRESTON : Theory of Light.

S. P. THOMSON : Electricity and Magnetism.

GRAY : Absolute Measurements in Electricity and Magnetism.

Chemistry.

The Examination in Chemistry shall consist of two papers and a *practical* examination.

The following Syllabus is prescribed : —

A.—Elements, compounds, mixtures, solutions, chemical action, symbols, formulæ, nomenclature, laws of chemical combination, equivalents.

Outlines of elementary crystallography.

The Atomic Theory, GAY LUSSAC's Law, AVOGADRO's Law, DULONG and PETIT's Law. Determination of Atomic and Molecular weights, Isomorphism, Dimorphism, Isodimorphism, &c. Chemical notation, Valency, Graphic formulæ, chemical equations, calculation of formulæ, and percentage composition, Compound radicals. Theories of dissociation in gases and liquids. Chemical affinity. Influence of heat and light on Chemical affinity, Allotropy, Isomerism, Electrolysis. FARADAY's Law, Diffusion, Dialysis, Catalysis, Combustion, Flame, Luminosity, Elements of Thermochemistry, Outlines of spectrum analysis.

Distinction between metals and non-metals, alloys, acids, bases, salts and anhydrides. The constitution of salts. The Periodic Law and the study of the elements on the periodic system.

A fairly complete knowledge of the modes of occurrence, methods of preparation, properties, uses and general characters of the following non-metals, their allotropic modifications, and their principal compounds —Hydrogen Chlorine, Fluorine, Bromine, Iodine, Oxygen, Sulphur, Boron, Nitrogen, Phosphorus, Arsenic, Carbon, Silicon and Argon; also Selenium, Tellurium, Gallium, Rubidium, Cæsium, so far as to determine their location in LOTHAR MEYER'S or MENDELÉEFF'S tables.

A general knowledge of the methods of preparation properties and uses of the following metals and their principal salts —Sodium, Potassium, Ammonium, Lithium, Silver, Calcium, Barium, Strontium, Magnesium, Zinc, Copper, Mercury, Cadmium, Gold, Lead, Tin, Platinum, Aluminium, Antimony, Bismuth, Chromium, Manganese, Iron, Nickel, Cobalt

A knowledge of the methods used in the preparation of the more important acids, salts, &c , employed in arts and manufactures ; and also of the metallurgy of Iron, Copper, Lead, Silver, Gold, Mercury, and Platinum

B —Practical work

1. Analysis of salts by wet and dry processes The salts to contain one acid and one base and to be confined to the following metals and acid radicals —Silver, Mercury, Lead, Copper, Arsenic, Antimony, Bismuth, Tin, Cadmium, Zinc, Iron, Manganese, Aluminium, Chromium, Nickel, Cobalt, Strontium, Barium, Calcium, Magnesium, Sodium, Potassium, Ammonium, Hydrogen, Chlorides, Iodides, Bromides, Fluorides,

Sulphides, Nitrites, Sulphites, Cyanides, Acetates, Oxalates, Phosphates (normal), Chlorates, Sulphates, Nitrates, Carbonates, Borates, Chromates.

2. The preparation of and the recognition of Oxygen, Hydrogen, Nitrogen, Chlorine, Allotropic modifications of Sulphur, Carbon-monoxide, Carbon-dioxide, Marshgas, Ammonia, Hydrochloric acid, Nitric acid, Sulphur-dioxide, Sulphuretted Hydrogen, Nitrous oxide, Nitric oxide.

Preparation of simple salts involving no special difficulty, and use of no special apparatus.

The following books are suggested :—

NEWTH : Inorganic Chemistry.

ROSCOE and SCHORLEMMER : Treatise on Chemistry, Vol. I and Vol. II (Parts I and II).

WATT : Inorganic Chemistry.

KOLBE : Inorganic Chemistry.

JAGO : Inorganic Chemistry (LONGMAN'S Advanced Science Manuals).

FIRST EXAMINATION FOR THE D Sc

Mathematics.

The subjects of Examination are—

Analytical Solid Geometry

The following text-books are suggested —

SMITH's Solid Geometry or the corresponding portions of FROST's Solid Geometry

Elementary Differential Equations, including equations of the first order, similar equations with constant coefficients of any order and partial differential equations of the first order and first degree

EDWARD's Integral Calculus and FORSYTH's Differential Equations may be consulted

Dynamics of a Particle

"TAIT and STEELE" or "WILLIAMSON and TARLETON" may be consulted

Rigid Dynamics in two Dimensions

As in the first four Chapters of ROUTH

The Examination will consist of two papers as follows —

1   Solid Geometry and Elementary Differential Equations

2   Dynamics of a Particle and Rigid Dynamics in two Dimensions

SECOND EXAMINATION FOR THE D.Sc.

Mathematics.

The subjects of Examination are—

Algebra and Trigonometry with Elements of Theory of Functions, as in CHRYSTAL's Algebra and HOBSON's Trigonometry.

Analytical Statics.

Either ROUTH's "Statics" or MINCHIN's "Statics" is recommended.

Dynamics of a Particle.

TAIT and STEELE's "Dynamics of a Particle" or WILLIAMSON and TARLETON's "Dynamics" may be consulted.

Rigid Dynamics.

As in the first volume of ROUTH's "Rigid Dynamics." MACH's "Science of Mechanics" is also recommended.

> *Differential Calculus.*
> *Integral Calculus.*
> *Differential Equation.*
> *Elements of the Calculus of Variations.*
> *Analytical Plane Geometry.*
> *Analytical Solid Geometry.*

A more thorough knowledge of those subjects which have been taken in previous Examinations will now be required.

GRIFFITH MEMORIAL FUND SCHOLARSHIPS

The Griffith Memorial Fund was formed from contributions made by friends and pupils of Mr R T H. Griffith, and it was determined that the income arising from the fund was to be expended entirely on the encouragement of Sanskrit learning, such encouragement being restricted to the students of the Sanskrit College at Benares.

The trust of the fund was accepted by the Syndicate of the University of Allahabad on the 6th November, 1888, and the following rules were finally laid down

The "Griffith Memorial Fund" shall consist of the sum of Rs 6,329-4-11 already realized for the purpose of establishing and maintaining a memorial of Mr R.T.H Griffith, M A , C.I.E, together with such further sum as may hereafter from time to time be collected for the said purposes

the value of *Rs.10* (now reduced to Rs.8—as 4 *per cent.* Government Promissory Notes are reduced to $3\frac{1}{2}$ *per cent.*) *per mensem* and tenable for two years to the student who passes the Intermediate Examination of the Allahabad University and obtains the highest number of marks in Sanskrit among those who take up Sanskrit as their second language. The scholarship is awarded subject to the condition that the student continues his studies for the B.A. Examination.

· (*b*) The Syndicate also awards every second year a scholarship called the "Lumsden Arabic or Persian Scholarship" of the value of *Rs.10* (now Rs.8 only) *per mensem* and tenable for two years to the student who passes the Intermediate Examination of the Allahabad University and obtains the highest number of marks in Arabic among those who take up Arabic as their second language; the scholarship is awarded subject to the condition that the student continues his studies for the B.A. Examination. If no student passes the Intermediate Examination with Arabic as his second language in the year in which the scholarship is awarded, the scholarship will be awarded on the same conditions to the student who passes ·the said Examination and obtains the highest number of marks in Persian as his second language.

(*c*) The Syndicate also every year awards a gold medal of the value of not less than Rs.50 and not more than Rs.60, called the "Lumsden Medal" to the· student who stands highest in the Examination for the Degree of Bachelor of Laws of the Allahabad University.

(c) A competent person to be nominated by the Syndicate of the Allahabad University, who may hold office for three years and be eligible for re-nomination

The Committee shall award the scholarships and prizes in accordance with the results of the Annual Examinations held in the Sanskrit College, Benares.

Provided that the Committee shall award to any student of Sanskrit, whom Mr R. T H Griffith may recommend, any scholarship for which he may be so recommended subject to the conditions contained in the preceding rules.

LUMSDEN MEMORIAL SCHOLARSHIPS AND GOLD MEDAL.

At a public meeting held at Benares on the 2nd August, 1891, it was resolved, in view of the approaching retirement of the Hon'ble J J F Lumsden, C S, Senior Member of the Board of Revenue, N -W Provinces and Oudh, who, during his long connection with these Provinces, and more particularly with the Benares Division, had endeared himself to all classes, that in order to perpetuate his memory, a fund be raised for the purpose of founding a Medal and two Scholarships This fund, amounting to Rs 7,700, has been vested in the Treasurer of Charitable Endowments for the N -W. Provinces and Oudh The interest is paid to the Registrar of the University of Allahabad, and is expended by the Syndicate in the following manner :—

(a) The Syndicate awards every second year a scholarship called the "Lumsden Sanskrit Scholarship" of

the value of *Rs.10* (now reduced to Rs.8—as 4 *per cent.*
Government Promissory Notes are reduced to $3\frac{1}{2}$ *per
cent.*) *per mensem* and tenable for two years to the
student who passes the Intermediate Examination of
the Allahabad University and obtains the highest num-
ber of marks in Sanskrit among those who take up
Sanskrit as their second language. The scholarship is
awarded subject to the condition that the student con-
tinues his studies for the B.A. Examination.

(b) The Syndicate also awards every second year a
scholarship called the "Lumsden Arabic or Persian
Scholarship" of the value of *Rs.10* (now Rs.8 only) *per
mensem* and tenable for two years to the student who
passes the Intermediate Examination of the Allahabad
University and obtains the highest number of marks
in Arabic among those who take up Arabic as their
second language; the scholarship is awarded subject to
the condition that the student continues his studies for
the B.A. Examination. If no student passes the Inter-
mediate Examination with Arabic as his second lan-
guage in the year in which the scholarship is awarded,
the scholarship will be awarded on the same conditions
to the student who passes the said Examination and
obtains the highest number of marks in Persian as his
second language.

(c) The Syndicate also every year awards a gold
medal of the value of not less than Rs.50 and not
more than Rs.60, called the "Lumsden Medal" to the
student who stands highest in the Examination for the
Degree of Bachelor of Laws of the Allahabad Univer-
sity.

(d) If a student holding either of the scholarships discontinue his studies, die, or through misconduct or any other cause be considered by the Syndicate disqualified to hold the scholarship, it will be given for the rest of the term of two years to the next best student of the same year, who fulfils the requirements laid down in classes (a) and (b) above

2 The Syndicate awards one of the aforesaid scholarships alternately every year commencing with the "Lumsden Sanskrit Scholarship" in 1893 and the "Lumsden Arabic or Persian Scholarship" in 1894

3 The Syndicate will, from time to time, invest in Government securities any surplus that may remain over annually, after meeting the cost of the Scholarships of the medal, and incidental charges, and will apply at their discretion the interest received from this source towards increasing the value or number of the scholarships.

STATE SCHOLARSHIPS TENABLE AT OXFORD OR CAMBRIDGE BY NATIVES OF INDIA.*

RESOLUTION.

In Home Department Resolution No. 360, dated 30th June, 1868, a scheme was promulgated for the creation of a certain number of Government scholarships tenable in England by Natives of India It was explained that the object of creating the scholarships was to encourage Natives of India to resort more freely to England for the purpose of perfecting their education and of studying for the various learned professions or for the civil and other services in India. In a subsequent Resolution, dated 18th January, 1870, the circumstances were set forth under which it had been determined to hold this scheme in abeyance. For some time past the Government of India has been in communication with Her Majesty's Secretary of State regarding the re-establishment of a limited number of Government scholarships, tenable in England by Natives of India, and the Governor-General in Council is glad to be able now to announce that it has been decided to bring into immediate operation a scheme which, it is hoped, will have the effect of offering a certain measure of encouragement to the youths of this country to proceed to England for

* These scholarships were instituted by Home Department Resolution No $\frac{1}{45-57}$, dated the 12th February, 1886, No. $\frac{9}{269\,81}$, dated the 23rd August, 1886, and No. $\frac{3}{38\,49}$, dated 30th January, 1885.

the purpose of completing their education either at the University of Oxford or at the University of Cambridge

2   Six scholarships, the cost of which will be defrayed by the Government of India, will be at once established, tenable in England by persons who are Natives of India within the meaning of section 6 of the Statute 33 Vic, Cap 3   The scholarship will be placed at the disposal of the Universities of Calcutta, Bombay, Madras and the Punjab in rotation,* one scholarship being given to each of the first two Universities during the present year (1886), and one scholarship to each of the last two during next year (1887)   In allotting the scholarships in future years the same order will be observed

3   Each scholarship will entitle the holder to an allowance, not exceeding £200 *per annum*, payable from the date of his arrival in England, and will be tenable for *three* years   No candidate should be more than 21 years of age   Each candidate to whom a scholarship may be awarded will be required to proceed to England within a reasonable period from the date of his selection

---

* Under Resolution, dated 15th October, 1888, consequent upon the establishment of the Allahabad University the Government of India has decided "that, with effect from the year 1889, each of the Universities concerned shall participate in the Scholarships in the following sequence" —

Allahabad Madras	} 1894	Madras Punjab	} 1897
Punjab Calcutta	} 1895		
Bombay Allahabad	} 1896	Calcutta Bombay	} 1898

and to reside there for a period of *three* years, unless compelled to return sooner by ill-health.

4. Each scholar will be entitled to receive a sum of £100* for passage money, and a similar sum will be payable within one month before his actual return to India if he should complete the full period of *three* years' residence, or be compelled by sickness to return before the completion of that period.

5. It is intended to reserve to the scholars the power of selecting, once for all, the course of study to be followed by them in England. Each scholar will be required to bind himself by written engagement to submit to such regulations as may, from time to time, be framed by Her Majesty's Secretary of State for the guidance of scholars.

6. If any scholar, not being disabled by sickness, fails to complete a residence of three years in England, or is guilty of gross misconduct or disregard of the orders of Her Majesty's Secretary of State, he will, at the discretion of the Secretary of State, forfeit his scholarship and further be liable to refund the sum drawn by him as passage money.

7. Scholars will be expected to reach England before the opening of the October term at the Universities of Oxford or Cambridge to one of which Universities they will be required to proceed.

---

* *By Resolution of Government of India, dated 2nd February, 1895, it is notified that, in future, Second Class accommodation only, by Railway in India, and on the sea-voyage to London, will be allowed to persons selected to hold Gilchrist or State Scholarships tenable in England.*

RULES FOR THE SELECTION OF CANDIDATES FOR THE STATE SCHOLARSHIPS TENABLE IN ENGLAND BY NATIVES OF INDIA

1. The Syndicate shall in the year in which a State Scholarship tenable in England is placed at the disposal of the University, and as soon as may be reasonably practicable after the results of the Examination in each year for the Degree of B A have been ascertained by the Syndicate, and at any other time or times, as occasion may arise, select for the scholarship a person who is qualified in the manner specified by Rule 2.

2. A person shall be deemed to be qualified for selection by the Syndicate who is (a) a Native of India within the meaning of Section 6 of the Statute 33 Vic, Cap 3, (b) under the age of 22 years on the 31st day of March in the year in which the selection is made; (c) has qualified for the Degree of B A of the University of Allahabad; (d) has satisfied the Vice-Chancellor, or, in case of his absence, the Syndicate, that he is of good moral character by the production of a certificate to that effect signed by the Principal of the College affiliated to the University at which he has studied, or by a Director of Public Instruction, or by an officer employed in the civil administration not inferior in position to a Magistrate of a district, or by any other person whose certificate may be considered sufficient by the Vice-Chancellor, or, in his absence, by the Syndicate, (e) has satisfied the Vice-Chancellor, or, in the case of his absence, the Syndicate, that he has a competent

knowledge of the English language; (*f*) has produced to the Vice-Chancellor, or, in case of his absence, to the Syndicate, a certificate, signed by a medical officer not below the rank of a Civil Surgeon that he is physically capable of undergoing the course of life and study which he will have to follow in England; and (*g*) is willing, with the consent of his family, to proceed to England in order to complete a University education.

3. Any person desirous of being selected by the Syndicate should, at as early a date as possible in the year in which the selection may be made, forward to the Registrar of the University a signed notice to that effect stating that, if selected, he will comply with such regulations relating to the scholarships and the holders thereof as the Secretary of State for India may at any time make, and shall forward to the Registrar such certificates as to his qualifications as he may have been able to obtain.

4. After the selection, the Registrar shall give to the person selected, a copy of the regulations of the Secretary of State for India relating to the scholarships and the holders thereof.

RULES FOR INDIAN GOVERNMENT SCHOLARS IN ENGLAND.

1. Every scholar shall, on reaching England, at once present himself at the India Office and report his arrival in writing.

2   Every scholar shall, without any unnecessary delay, inform the Secretary of State to which University he intends to proceed, and shall at once take steps to enter himself at the College he has selected

3   Every scholar shall, within four weeks of reaching England, submit for the approval of the Secretary of State, a statement showing the general course of study he proposes to follow, and the course approved shall not be changed without the sanction of the Secretary of State

4   Every scholar shall, at the end of each term of residence at University, submit to the Secretary of State, a certificate from the proper College or University authority, showing that his residence, conduct, and progress in study, have been satisfactory during the term

5   Every scholar shall, at all times, obey such instructions as he may receive from the Secretary of State.

6   Subject to a due compliance with the above conditions, the allowance, at the rate of £200 a year, for *three* years, will be paid quarterly in advance by the India Office, commencing from the date of the scholar's reporting his arrival in England, but this allowance shall become payable to him out of the revenues of India, in respect of residence at a University during the same period or any part of it.

7.   Every scholar will forfeit his scholarship, who, not being disabled by illness or prevented by any other cause which the Secretary of State may consider sufficient, fails to complete a residence of *three* years in England according to the terms and conditions approved by the Secretary of State under Rule 3, or who is guilty of misconduct or disregard of the orders of the Secretary of State. If a scholarship be forfeited, the scholar will lose his claim to a free return passage to India, and will further become liable to refund the cost of his free passage to England.

8.   The scholars will be under the special supervision and charge of the Political Aide-de-Camp to the Secretary of State, through whom the necessary orders will be given, and to whom all reports and other communications respecting them should be sent.

(d) Any person who was born in India of parents who were born in India, and who shall have been matriculated under the provisions of clause (b) and who

shall have passed the Examination in Holy Scripture (or in a book offered instead thereof), may be admitted to any part of the Second Public Examination : provided that, if he has not obtained Honours in either the First or the Second Public Examination he shall not be admitted to the Final Honour Examination in the School of Natural Science until he has satisfied the conditions of Statt. Tit. VI. Sect. I. C. § 5. cl. 7; and that if he has not obtained Honours in the Second Public Examination, he shall not be admitted to the Final Honour Examination in the School of English Language and Literature until he has passed the First Public Examination.

(e) Any person who shall have been admitted to the Second Public Examination under the provisions of clauses (c) and (d) shall be entitled to supplicate for the Degree of Bachelor of Arts so soon as he shall have passed the Second Public Examination and shall have kept statutable residence for eight Terms, provided that he has obtained Honours either in the First or in the Second Public Examination.

5.   The Delegates of Local Examinations shall make regulations respecting—

(1)   The registration of persons who have been matriculated under the provisions of this section.

2.   The granting of certificates to such persons showing that they have satisfied the special conditions under which they are admitted to the University Examinations or under which they are entitled to supplicate for the Degree of Bachelor of Arts.

(3) The sending in of names to the Secretary to the Boards of Faculties and the production of certificates to the Secretary to the Boards of Faculties by or on behalf of persons who avail themselves of the privileges granted by this section

6. No person already matriculated in this University shall be admitted as a Candidate in any part of the First Public Examination, other than the Examination in Holy Scripture, under the provisions of this Statute

7 Any University admitted to the privileges conferred by this section of the Statutes may at any time renounce such privileges, and this University may at any time withdraw the same by a vote of Convocation.

CAMBRIDGE UNIVERSITY.

Report of the Council of the Senate on the Affiliation of University of Allahabad, confirmed by the Senate on 21st November, 1895, as per letter, dated Cambridge, 29th June, 1896.

21st October, 1895.

THE COUNCIL OF THE SENATE beg leave to report to the SENATE as follows —

In course of last year the Vice-Chancellor received from the Registrar of the University of Allahabad an application for the affiliation of that University to the University of Cambridge.

The Council have found that the constitution and scheme of examinations of the University of Allahabad closely resemble those of the University of Calcutta, and that the two Universities recognise each other on equal terms, the Examinations and Degrees of the one being accepted as equivalent by the other. The Council, therefore, decided that they would be prepared to recommend to the Senate that the application for affiliation be granted on terms similar to those approved by Grace 1 of 5th March, 1895, for the University of Calcutta; and they communicated with the authorities of the University of Allahabad to this effect. They have now received an acceptance on the part of that University of the terms proposed.

The Council accordingly recommend:

1. That the University of Allahabad be adopted as an institution affiliated to the University of Cambridge.

2. That any matriculated student of the University of Allahabad be entitled to be admitted to the privileges of affiliation who has (1) in accordance with the regulations of that University studied for not less than two years at one or more Institutions for the education of adult students affiliated in Arts up to the B.A. standard; (2) passed the Entrance Examination, and also passed in the first division in the Intermediate Examination in Arts or in the first or second division in the Examination for the Degree of Bachelor of Arts of that University: provided that in one of these

This College, founded by the Talukdars of Oudh in memory of the late Earl Canning, was opened on

the 1st of May, 1864. The institution comprises three departments,—the College proper, a Law Department, and an Oriental Department, in which only Sanskrit, Persian, and Arabic are taught.

Canning College is supported by the Talukdars of Oudh aided by Government. By a *Sanad* duly executed, the Talukdars unanimously endowed the College in perpetuity with a percentage of the revenues of their taluks. This sum, amounting on an average to forty-one thousand rupees *per annum*, is collected by the officers of Government, and is deposited in the Government Treasury for the use of the College. A Government grant-in-aid to the amount of twenty-five thousand rupees is also enjoyed by the College. The total income from endowment, grant-in-aid, invested funds and fees aggregates eighty-one thousand rupees *per annum*.

The institution is open to all classes, and its object, as declared by the rules, is to impart instruction in the English Language and Literature, in Mathematics and Science, in Law and in the Oriental Classical Languages. Its management is vested in a Committee, consisting of the Commissioner of Lucknow, the Deputy Commissioner, the Inspector of Schools, Oudh Circle, District Judge, the Executive Engineer, the Principal, and the representatives of the Talukdars.

The fee for the College classes is—Rs.6 for the Intermediate class, Rs.7-8 for the B.A. class and Rs.9 for the M.A. class. The Committee reserve to themselves the right of admitting Oudh students to the

free list, or of admitting them on a modified fee   The fee for the Law classes is for Arts students Rs 4 for the first year and Rs 6 for the second year and for outsiders Rs 5 for the first year and Rs 7 for the second year

The admission fee is Rs 3 for all classes

In addition to Government scholarships, there are local scholarships to the value of Rs 170 *per mensem*

THE MUHAMMADAN ANGLO-ORIENTAL COLLEGE, ALIGARH

AFFILIATED IN ARTS, 1888, IN LAW, 1889

This institution has been established by the educated and more advanced portion of the Muhammadans of Upper India, under the leadership of Sir Syed Ahmad, Khan Bahadur, K C S I, LL D   The objects in view are to place the benefits of liberal education within the reach of the Muhammadan

community, who have markedly failed to avail themselves of Government educational institutions; and to reconcile the Muhammadans to the study of Western science and literature by founding a scheme adapted to meet the special educational wants of the Muhammadan community. However, the institution is catholic in its character, and is open to students of every creed and race.

This institution was first opened as a school in June, 1875, and in January, 1878, it was converted into a College and was, from the beginning of that year, affiliated to the University of Calcutta up to the Standard of the First Arts Examination. In Arts the College has been affiliated to that University up to the B.A. Standard from the 1st of January, 1881, and in Law it has been affiliated up to the B.L. Standard from the 1st January, 1883.

In the College and School attached to it all subjects are taught in the English language, and Arabic, Persian, or Sanskrit is taken as the classical language.

All the Muhammadan students are taught Theology in Persian or Arabic, according to their sect, *i.e.*, *Sunnis* according to the *Sunni* sect and *Shias* according to the *Shia* sect.

The College is governed by Trustees, for whose guidance laws and regulations have been passed on December 28th, 1889.

VI.
ST. JOHN'S COLLEGE, AGRA.
AFFILIATED IN ARTS, 1888, 1890, 1893; IN LAW, 1891.

This College was established in 1850, and its foundation was chiefly due to the efforts of an influential body of Civilians and Military Officers, who were at

that time members of the Local Committee of the Church Missionary Society, the Hon'ble J. R Colvin, Lieutenant-Governor of the N-W P, being the Patron, and Sir William Muir the President

Their desire was to found a College for the education of the higher classes of Indian youths upon strictly Christian principles, as they felt that such an Institution was greatly needed, in order to create a higher moral and spiritual tone among those classes

In more recent years, owing to the rapid growth of the Indian Christian community, the object of the Institution has become somewhat changed Whilst welcoming, as before, all Hindus and Muhammadans desirous of receiving a liberal education under Christian influences, the College has become recognised more especially as an Institution where the education of Indian Christian youths is made a matter of primary importance The following High Schools of the Church Missionary Society, are affiliated to St John's College, viz : —

1 Robert Money Institution, Bombay
2. St John's Collegiate School, Agra
3. Church Mission High School, Azamgurh
4. „   „   „   „   „   Basti
5. „   „   „   „   „   Jaunpur
6. „   „   „   „   „   Jabalpur
7. „   „   „   „   „   Lucknow
8. „   „   „   „   „   Meerut
9. Jai Narain's College, Benares

The Christian students of these schools are eligible for various scholarships and other concessions, according to merit and circumstances

The buildings and conveniences have been considerably increased in recent years. They consist of the College; the School; Hostels for Christians and Hindus; a College-chapel; a Swimming-bath, &c.

The College consists of two sections, *viz :—*

AFFILIATED IN ARTS, 1888.

This School was commenced in 1850 by the Rev. J. H. Budden, on behalf of the London Missionary Society. In 1871 the large and handsome building now in use was first opened, and has since done most efficient service.

Students were first sent up to the Entrance Examination in 1872; and in 1885, owing to the strong desire of many of the gentlemen of the town, College classes were opened up to the First Arts Examination.

Some branch schools are carried on in connection with the College. Several scholarships have been endowed, one by Sir H. Ramsay, C.B., K.C.S.I., a warm supporter of the School from its commencement, and two by the Raja of Tehri and Garhwal. A number of scholarships are also given by the District Committee to poor village boys, to assist them in studying for entrance into the College at Roorkee, Lahore, or Agra.

KAYASTHA PATSHALA, ALLAHABAD.

AFFILIATED IN ARTS, 1895.

The Kayastha Pathshala was founded in 1872 by the late Munshi Kali Prasad of the Lucknow Bar. In 1878 it was raised to the Middle English Standard and in 1883 to the Entrance Standard of the Calcutta University. In 1894 it was included by the Allahabad University in the list of schools recognised for the purpose of the School Final-Examination. In 1895 it was affiliated to the same University up to the Intermediate Examination Standard. The first year class was opened in July 1895 and the second year in July 1896.

The institution was registered in August 2nd, 1893, under Act XXI of 1860, the chief controlling authority being the President for the time being, assisted by a Committee of Management. Its income is derived from an endowment of property made mainly by the late Munshi Kali Prasad and partly by others, which was estimated to be worth Rs.5,10,583-6-11 on the 30th of June, 1894.

The institution is divided into College and School Departments, the former under the immediate charge and the latter under the superintendence of the Principal.

In the College Department the scale of fees charged ordinarily is Rs.3 *per mensem* payable during ten months in the session. There are 20 free scholarships, ten in the first year and 10 in the second year class, for poor students who have passed the Entrance or the

FIRST PAPER.

F. W. SÜDMERSEN, ESQ., M.A.   ..   ..
J. C. KEMPSTER, ESQ.   ..   ..   } *Examiners.*
C. H. LINTON, ESQ., M.A.   ..   ..

1. Answer the questions in italics which follow these three extracts. You are not required to paraphrase them.

(a) It was a fine sunny morning when the thrilling cry of 'Land!' was given from the mast head. None but those who have experienced it can form an idea of the delicious throng of sensations which rush into an American's bosom, when he first comes in sight of Europe. There is a volume of associations with the very name. It is the land of promise, teeming with everything of which his childhood has heard, or on which his studious years have pondered.

Who wrote the above extract and to what does it refer? Why is the cry said to be " thrilling "? What is meant by " a delicious throng of sensations," and why would an American especially feel those sensations? What associations does the name recall? Why is Europe called " the land of promise " and why is it said to be " teeming with everything of which his childhood has heard?"

(b) Schools, academies, and colleges give but the merest beginnings of culture in comparison with it. Far more influential is the life-education daily given in our homes, in the streets,

behind counters, in workshops, at the loom and the plough, in counting houses and manufactories and in the busy haunts of men.

What is meant by ' culture ' and explain why ' schools, academies and colleges give but the merest beginnings ' of it ? What is ' life-education,' where is it obtained and why is it ' more influential '? How do ' homes and streets' give us ' life-education '? What various occupations are referred to or suggested by ' in workshops, at the loom and the plough, in counting houses and manufactories ' ?

(c)   In the world's broad field of battle,
                In the bivouac of Life,
          Be not like dumb, driven cattle !
                Be a hero in the strife !

Why is the world called a ' broad field of battle ' and ' Life ' a ' bivouac '? What kind of men would you compare to ' dumb, driven cattle '? What figures of speech are employed in this verse?

2. Write the following in simple prose so as to describe the scene here depicted in your own words   You are not required to closely follow the original, and a mere substitution of other words or phrases will not be accepted.

          His house was known to all the vagrant train,
          He chid their wanderings, but relieved their pain,
          The long remember'd beggar was his guest,
          Whose beard descending swept his aged breast,
          The ruin'd spendthrift, now no longer proud,
          Claim'd kindred there, and had his claims allow'd,
          The broken soldier, kindly bade to stay,
          Sat by his fire, and talk'd the night away ,
          Wept o'er his wounds, or tales of sorrow done,
          Shoulder'd his crutch, and show'd how fields were won

3   Narrate the story entitled " An Incident of the French Camp" by Robert Browning in your own words

4. Answer the questions in italics following these two extracts.

(*a*)　As some tall cliff, that lifts its awful form,
Swells from the vale, and midway leaves the storm,
Though round its breast the rolling clouds are spread,
Eternal sunshine settles on its head.

Of whom is this simile an illustration?　Show carefully and in detail that it is suitable to the person of whom it is used.

(*b*)　　　　When I remember all

　　　　　　The friends so link'd together

　　　　I've seen around me fall

　　　　　　Like leaves in wintry weather,

　　　　　　　I feel like one

　　　　　　　Who treads alone

　　　　Some banquet hall deserted,

　　　　　　Whose lights are fled,

　　　　　　Whose garlands dead,

　　　　And all but he departed !

There are two similes employed here.　What are they ? Show by careful comparison the appropriateness of each.

(*c*) Ximenes, though possessed only of delegated power, which, from his advanced age he could not expect to enjoy long, assumed, together with the character of Regent, all the ideas natural to a monarch, and adopted schemes for extending the regal authority.

What is meant by ' delegated power ' and how is Ximenes here said to have acted when he received this power ? What ' ideas ' are ' natural to a monarch ' ? Mention any of the schemes which Ximenes adopted for ' extending the regal authority ' ?

5. Explain the following extracts and answer the questions in italics —

(a) Some of God's greatest apostles have come from the 'ranks.'

What does the word 'ranks' usually mean and what does it mean in this case? Mention any of God's apostles who have come from the ranks?

(b) Perhaps in this neglected spot, is laid
    Some heart once pregnant with celestial fire ;
    Hands that the rod of empire might have swayed,
    Or waked to ecstasy the living lyre

What three classes of men are referred to in the last three lines of this verse?

6. Passages from books not prescribed.

You are required to re write the following passages so as to bring out their meaning fully and clearly, adding anything which would make the meaning clearer and show that you fully understand the passages.

(a)   Under a spreading chestnut tree
           The village smithy stands ;
       The smith, a mighty man is he,
           With large and sinewy hands ,
       And the muscles of his brawny arms
           Are strong as iron bands.

       His hair is crisp, and black, and long,
           His face is like the tan ;
       His brow is wet with honest sweat,
           He earns whate'er he can,
       And looks the whole world in the face,
           For he owes not any man.

       Toiling,—rejoicing,—sorrowing,
           Onward through life he goes ;
       Each morning sees some task begin
           Each evening sees it close ;
       Something attempted, something done,
           Has earned a night's repose

(*b*) The elephant is not used in the present day in India as an engine of war, but as a beast of burden, in the transport of baggage, tents and various stores ; and there are peculiar circumstances in the march of an Indian army which render the elephant extremely serviceable.   Where dense jungles offer impediments which the pioneers could not obviate without great labour and consequent delay, three or four elephants clear the way at once ; trampling down the long grass and bushes, and breaking down the slender trees ; in short levelling all before them : again, where the artillery has to be dragged through heavy roads of clay and mire, their strength and sagacity are in great requisition.   They always apply the force in the most efficacious manner, and assist each other with wonderful sagacity.

نیوٹن بڑا نیکبخت آدمی تھا ـ باوجود اتنے بڑے عالم ہونیکے
اوسمیں ذرہ برابر تکبر نہ تھا ـ اسکی طبیت ایسی نرم تھی کہ اوسے
غصہ کبھی آتاھی نہ تھا ـ اوسکے پاس ایک پیارا چھوٹا سا کتا تھا ـ
ایک دن رانکے وقت نیوٹن کہیں باہر گیا تھا ـ اور اوسکے کمرہ میں
میز پر بتی جل رہی تھی ـ اتنے میں کتے کے جی میں نہ جابیں
کیا آیا کہ وہ یک بیک ایسے زور سے میز پر اوچھل پڑا کہ جلتی ہوئی
بتی گرپڑی اور سب کاغذ جنکو لکھکر تیار کرنے میں نیوٹن نے
کتنی سال لگائے تھے جل کر خاک ہوگئے ـ نیوٹن جب لوٹ کر آیا
تب یہ حال دیکھکر دلیں بڑا رنجیدہ ہوا لیکن غصہ میں آکر کتے
کو کچھہ سزا نہیں دی صرف اتنائھی کہکر رہگیا کہ اے کتے تجھے
جو میرا نقصان ہوا ھی اوسکی تجھیکو کیا خبر ھی *

{ H DIXON, ESQ., M A

1 Define *measure* of a number and find the g c m of —

    (i) Rs 2, 4 as and 10 as

    (ii) $\frac{2}{3}$ and $\frac{4}{5}$

Find the greatest number which will divide 13956 and 14965 and leave a remainder 7 in each case

2 Simplify —

    (a) $\dfrac{(\frac{1}{3})\,2 + (\frac{1}{4})\,3}{(\frac{1}{2})\,2 + (\frac{1}{5})\,3} + \dfrac{12\% \text{ of Rs 5 } 10 \text{ as } 8 \text{ pies}}{\cdot 035 \text{ of Rs } 7 \text{ 12 as.}}$

    (b) $\frac{1}{2} - \frac{1}{3} \div \frac{3}{4}$ of $\frac{3}{5} \div \frac{1}{6} \times \frac{2}{3}$

3 Extract the square root of

$$9 + \cfrac{1}{1 + \cfrac{1}{7 + \cfrac{1}{6}}}$$

and calculate the difference between this square root and $3 + \frac{1}{16}\ \sqrt[4]{2}$ to *three* places of decimals

4 Find the cost in English money of travelling from 1 ien ia to Trieste, a distance of 363 English miles, the average cost per German mile being 13 kreutzers. Given that

    1 German mile = 4½ English miles,

    £1 = 25 5 francs

    3 75 francs = 100 kreutzers

5. What is the present value of a legacy of £149 1s. 3d. due 7 years hence, at $2\frac{3}{4}$ per cent. simple interest?

6. Find the G. C. M. of $2x^5 - 11x^2 - 9$ and $4x^5 + 11x^4 + 81$.

7. Simplify :—

(a) $\dfrac{m-n}{(x-m)(x-n)} + \dfrac{n-p}{(x-n)(x-p)} + \dfrac{p-m}{(x-p)(x-m)}$

(b) $\dfrac{a^2}{(x-a)^n} + \dfrac{2a}{(x-a)^{n-1}} + \dfrac{1}{(x-a)^{n-2}}$

8. Solve :—

(a) $2x + \dfrac{3}{y} = 4$

$3x + \dfrac{2}{y} = 5.$

(b) $\dfrac{1}{x+5} + \dfrac{1}{x+10} = \dfrac{2}{x}$

9. If $a : b = c : d$, prove that

$a(a+b+c+d) = (a+b)(a+c).$

10. The number of months in the age of a man, on his birthday in the year 1875, was exactly half of the number denoting the year in which he was born. In what year was he born?

Translate into Persian the following passages :—

A good man the only true friend.

1   A good man is the best friend, and therefore soonest to be
chosen, longer to be retained, and indeed never to be parted
with unless he cease to be that for which he was chosen   The
good man is a profitable useful person , and that is the band of
an effective friendship   He only is fit to be chosen for a friend
who can give counsel or defend my cause, or guide me right, or
relieve my need or can and will, when I need it, do me good
My friend is a worthy person when he can become to me a
guide or a support, an eye, or a hand, a staff or a rule   There
must be in friendship something to distinguish it from a com
panion, and a countryman, from a school fellow or a fellow
traveller   Those friendships must needs be most perfect, where
the friends can be most useful.   For men cannot be useful but
by worthiness in the several instances.   He that is wise and
virtuous, rich and at hand, close and merciful, free of his money
and tenacious of a secret, open and ingenuous, true and honest,
is of himself an excellent man, and therefore fit to be loved,
and he can do good to me in all capacities where I can need
him and therefore is fit to be a friend.

2   I was hindered in my last, and so could not give you all
the trouble I would have done   The description of a road
which your coach wheels have so often honoured, it would be
needless to give you , suffice it that I arrived safe at my uncle's,
who is a great hunter in imagination   his dogs take up every
chair in the house   so I am forced to stand at this present
writing , and though the gout forbids him galloping after them
in the field, yet he continues still to regale his ears and nose
with their comfortable noise and smell.   He holds me mighty
cheap, I perceive, for walking when I should ride and reading
when I should hunt

3   The musket was first made in Italy in the year 1430. But
the cannon was used in England a hundred years before that

date. M. Barafi, in his lecture before the Scientific Institute of France in 1850, said, that both cannon and the musket were in use in China about 618 years before Christ. As to the powder, there are divergent opinions about it. It is said that it was known amongst the Hindus about the time of Moses; and it is supposed that the Arabs brought it to Europe. But some say that it was invented by a German monk named Schwartz, in the fourteenth century; others say that an Englishman named R. Bacon invented it in the year 1270.

L'insecte ailé boillait des plus vives couleurs :

L'azur, le pourpre et l'or éclalaient sur ses ailes :

Jeune, beau, petit-maître il court de fleurs en fleurs,

Prenant et quittant les plus belles.

Ah ! disait le grillon, que son sort et le mien

Sont différents ! Dame Nature.

Pour lui fit tout, et pour moi rien.

2. Translate into idiomatic French :—

Will you come and take a walk with me ? I am sorry, but it is impossible.

We shall arrive in three days. Do not start until we come.

Are you ill ? Yes we are, but we are better now than we were in London.

I am always scolding you because you envy everything you see.

When I was at school I had three francs a week.

I lived for three years in North America and one finds many of the same prejudices in America and in Europe.

I am going to have a new dress made.

I wish I were in your place.

It is right that it should be done.

Children should obey their parents.

Did your sister go to the ball ? I do not know.

We have not seen each other for a year.

to learn is that of obedience to their teachers. There seems little reason to doubt that native students are capable at times of conduct which in an English School or College would never be attempted. They should be made to realize the fact that their first duty is obedience and remonstrance afterwards. Nothing but the most deplorable results can ever follow insubordination, and it is to be hoped that the lesson taught to these rebellious schoolboys will not be thrown away on schoolboys in general throughout India. Without obedience instant and unquestioning there can be no discipline. The other day a student of the College, who had been chewing betel during lesson hours, was ordered by his teacher to leave the room, and wash his mouth. On his return to the class room he was asked to sit on one of the back benches. This he refused to do, and he began to argue with the teacher regarding the order given. The student said that he had come to the class an hour before the time, and he did not see why he should sit on one of the back benches now that he had washed his mouth. On being ordered to stand up, he walked out of the room, and then a scene of deliberate insubordination followed, which shows that such a spirit is prevalent amongst the class.

(b) The Punjab became a British Province on the 29th March, 1849, and was at once put into the charge of Henry Lawrence and his civilian brother, John. The peace was ensured by a general disarmament, and a settlement of land revenue was made in which the demands of the State were reduced and rendered uniform and certain. Local codes were enacted, roads, canals and cantonments were laid out, and a country which for ten years had been a source of ceaseless alarm became a scene of peaceful industry and a powerful bulwark of the empire.

1. Define "force." What do you mean by the force of gravity? A large stone is suspended from a wooden beam by a piece of rope : state what would happen if there were no such thing as the force which is called cohesion.

2. What is the difference between solids, liquids, and gases? Explain carefully the properties which are peculiar to each.

A square block of ice is heated till it all passes away as steam : write down all the changes which take place.

3. Make a careful drawing of a common water-pump and describe its action in full.

4. Describe an experiment showing that all metals do not conduct heat equally. Explain how you would graduate a centigrade mercurial thermometer.

5. Describe a Grove's battery. Why is this an improvement on Volta's battery? How can you make a magnet from your battery and a piece of soft iron?

6. What is the difference between hard and soft water? A certain kind of hard water can be made soft by boiling. Explain this. Is river water ever hard? If so over what sort of bed does the river probably flow?

7. What is coal, and what is coal gas? Describe an experiment by which coal gas can be prepared. What else can be prepared from coal besides gas?

8. What is the difference between wrought iron, cast iron and steel? For what is each used? How is iron got from hæmatite iron ore?

9. What is the action of plants and animals on the air? If there were no plants, what would happen to all the animals? Give reasons for your answer.

3.   What is the object of ' pickling ' wheat before sowing ? Describe the process fully ?

4.   How are the following crops grown for seed and in what month is the seed usually threshed out ?

    (*a*) Indigo, (*b*) Carrots, (*c*) Hemp (*Crotolaria Juncea*).

5.   What quantity of seed would you sow and what outturn per acre would you expect, under high cultivation, in the case of crops named below ?

        Peas,—barley,—carrots,—oats,—*arhar.*

6 You must have noticed that crops sown close to large and shady trees do not ordinarily thrive well. Why? How could crops be grown in such places with success?

7 Describe the treatment of a cow during the period of gestation and prescribe a dietary for her when she is in milk.

8 Describe briefly the principles underlying rotation of crops

9 In surveying a village you find a stream which you cannot cross over How would you determine its breadth?

10. How would you find the distance between two points which are invisible from each other? Illustrate your answer with a diagram.

DICTATION

A—RAPID WRITING

A THOMSON, Esq   *Examiner*

I

Write out the following story in eleven minutes

A Lion, being fatigued with hunting and the heat of the day, lay down to sleep under the shade of a large tree As some mice were playing there about one happened to run over his body and awake him The Lion, angry at having his slumber disturbed, laid his paw on the little creature and was about to kill him when the mouse begged for mercy so earnestly that the King of the Beasts let him go unharmed "Many thanks to Your Majesty," said the mouse, "I hope to render you good service some day" The Lion smiled for he did not believe the mouse could ever be of use to him. But shortly after as he was roaming through the forest he was caught in a net, set by the hunters, and when he found himself unable to escape he gave a cry of despair so loud that all the forest rang The mouse knew the voice and ran to see what was the matter When he found how the Lion was entangled he exclaimed, "Your Majesty

need have no fear ; I will soon set you free." He then went to work, gnawed through the strings, and let the Lion go ; thus fulfilling the old rule that one good turn deserves another.

II.

Or write out the following in ten minutes.

CHINESE GAMBLING.

While my old teacher and interpreter went to make some purchases we anchored our boats at an island in the canal, on which there was a pretty summer house used as a refreshment room. A party of gamblers were assembled in it evidently enjoying themselves. One man held up his fingers while the others shouted out the number they thought would be held up. Those who guessed right were the winners, but how they were singled out in the awful confusion they made I am unable to tell. The old teacher had been told to buy something as a memento of the place, and we anxiously waited his return. When nearly dusk he made his appearance bringing only a basket of green plums, perfectly unripe which, had I eaten them, would no doubt have given me reason to remember the place. Perhaps he was afraid I might keep something that would afterwards betray our visit and get him into trouble : for in those days the Chinese were very unwilling to have Europeans travelling throughout their country.

B. NEAT WRITING.

I.

Write the following letter in ten minutes in a style fit for despatching.

FROM

    THE TEHSILDAR, SITAPUR,

To

    THE COLLECTOR, ZILA RAMPUR.

        DATED SITAPUR, THE 14TH FEBRUARY, 1898.

SIR,

I am very sorry to report that fever has been very prevalent in this tehsil for upwards of a month and that many are dying.

How was this truth about Contemplation illustrated in the case of Milton himself at the time when he wrote this poem?

She plumes her feathers, &c. Trace the connection between the literal and the figurative meaning

What is the force of to in to ruffled.

3 (a) Say, should the philosopher and divine
        That good which makes each humbler bosom vain?
        Let school taught pride disown the all it can
        These little things are great to little man.

What is 'school-taught pride, and how does it disemble?

How is the last line a rebuke to those who thus disemble?

   (b) And the loud laugh that spoke the vacant mind.

What is the connection between the two?

   And even his failings leaned to Virtue's side

Give a few illustrations.

4 (a) 'Oft last thou said 'If still misspent,
        Thine hours to poetry are lent,
        Go, and to tame thy wandering course,
        Quaff from the fountain at the source '

What does the speaker mean, with regard to Scott's poetry by misspent? What is the nature of the advice here given to the poet? Why does his friend think it necessary? What reasons does Scott give for not following the advice?

   (b) And still I thought that shattered tower
        The mightiest work of human power

Why did it seem so to him?

   (c) Whose doom discording neighbours sought
        Content with equity unbought.

Describe the character here represented. What is 'equity unbought' opposed to?

5.   His crook, his scrip, his oaten reed,
        And all Arcadia's golden creed.

What does Arcadia represent in poetry, and why? What do the **crook, scrip,** and **reed** typify? Why is the creed called **golden?** Why does the poet not believe in it?

6. Give the precise meaning, in connection with the context of the words in thick type :—

      And force him to return his **purchase** back.

      And the **brute** earth would lend her nerves, and shake.

      The nodding **horror** of whose shady brows

      For most do taste through **fond** intemperate thirst.

      This fav'rite good beget's **peculiar** pain.

      Their **level** life is but a smouldering fire.

      And **passing** rich on forty pounds a year.

      And makes **one** blot of all the air.

                Be not **over-exquisite**

      To cast the fashion of uncertain evils.

      And yet more **med'cinal** is it than that Moly.

      List mortals if your ears be **true.**

7. (*a*) Dew-drops are the gems of morning
        But the tears of mournful eve !
        Where no hope is, life's a warning
        That only serves to make us grieve
                When we are old ;—
        That only serves to make us grieve
        With oft and tedious taking-leave,
        Like some poor nigh-related guest,
        That may not rudely be dismist,
        Yet hath out-stayed his welcome while,
        And tells the jest without the smile.

What are the ideas suggested by **gems** and **tears**?

Where no hope is......old. Paraphrase these lines so as to bring out the meaning.

Trace each point in the analogy between 'old age' and 'the poor nigh related guest.'

(b) And as the captains of industry have, at last, begun to be aware that the condition of success in that warfare, under the form of peace, which is known as industrial competition, lies in the discipline of the troops and the use of arms of precision, just as much as it does in the warfare which is called war, their demand for that discipline, which is technical education, is reacting upon science in a manner which will, assuredly, stimulate its future growth to an incalculable extent.

Explain the analogy, in all its details, between industrial competition and warfare.

What is meant by reaction? What is the nature of the reaction here referred to?

<div style="text-align:center">SECOND PAPER.</div>

T C JONES, Esq., M A   ..   Examiner

1 I imagine him to be such a man as may often be met with, who from his narrowness of mind and distinctness of prejudice, is supposed to be high principled and direct in his dealings , and whose untried reputation has great favour with many people until placed in power some day, he shows that to rule well requires other things than one-sidedness in the ruling person , and is fortunate if he does not acquire that part of renown, which consists in notoriety, by committing some colossal blunder, henceforth historical from its largeness.

(a) Explain clearly the meaning of the phrase in thick type in the above passage

(b) Distinguish the meanings of 'reputation,' 'renown' 'notoriety'

(c) Give briefly the general sense of the passage

2. Explain the portions of the following in thick type :—

   (a) He was accordingly thought **deficient in distributive justice.**

   (b) The facts **stand out in bold relief** dry and unattractive.

   (c) The Arabs of that district were **the middle men** in this affair.

   (d) Columbus was one of those men of divining minds, **who must have general theories on which to thread their observations.**

   (e) All who are **conversant with that period** must wish that her proclamation could be proved to have gone **to the root of the matter.**

   (f) **"The stones rose up against him and his brothers"** says the historian Herrera emphatically.

   (g) **The circulating medium became so depreciated** that provisions were scarcely procurable.

3. Explain the following passages carefully, and point out their relation to the context.

   (a) His incurable weakness was that he never threw off the Machiavelian or Medicean " prince," and never understood the nature of Englishmen.

   (b) Towards the close of his life that Biblical language was already the external shibboleth of a sect. He had not the sense of poetic harmony, which prevented Milton from using it.

   (c) For years before the Civil War the future Protector of the Commonwealth had become known far and wide as ' the village Hampden with the dauntless breast.'

4. (a) What was the real point at issue between Charles I, and the Parliament ?

   (b) Assuming that Cromwell was mainly responsible for the execution of Charles I what can you urge in his defence ?

(c) "The regicides killed Charles I, only to make Charles II, king."

Criticize this statement, setting forth clearly the chief results of the execution of Charles I

5 Harrison writes that—

"Cromwell was a Puritan of the Puritans."

Characterise the Puritanism of Cromwell's times, and show how it affected Cromwell's own character and conduct.

6 (a) What do you understand by the "Socratic method of Cross-examination"? Give an example of it from the dialogue between Socrates and Euthyphron

(b) What was Socrates' real object in Cross-examining?

7 What is meant by the "Platonic doctrine of Reminiscence"? In what connection does it occur in the Phædo? Do you notice any difference between the Socrates of the "Apology" and the Socrates of the "Phædo"?

तुझे एक कौड़ी भी न मिलेगी। इतना समझाने पर भी

उसके मन में एक भी बात न घसी। उसने जाना कि मेरे मन में डर पैठाने के लिये बाप वंशी की राह से मुझे ऐसा कहता है। पर उस के बाप के मरने के पीछे वे सब बातें सच्ची दिखाई दिईं। अर्थात् उसे एक कौड़ी भी न मिली। तब तो बहुत खिन्न हुआ और बड़े पछतावे में पड़ा। निदान वह उसी दिन से अपने दुर्व्यसन छोड़ कर सुमार्ग में चलने लगा॥

ब्रौन को अपने बड़े भाई की सुचाल देख बड़ा आनन्द हुआ। उसने एक दिन अपने मित्रों को नेवता दिया। फिर भोजन के पदार्थों से भरे हुए थार सब के आगे ला रक्खे और एक मुदा हुआ थार अपने भाई के आगे रख कर बोला कि भाईजी यह थार आप खोलिये। भाई के कहने के अनुसार उसने वह थार उघारा जो देखता क्या है कि उस में खाने पीने का पदार्थ तो कोई नहीं परंतु सारा थार कागज़ पत्रों से भरा है। उन्हें देख चकित हुआ।

ब्रौन ने अपने भाई से कहा कि आप देखते क्या हैं पिता जी ने जो कुछ धन मेरे साधीन किया था उसके हिसाब के ये कागज़ पत्र हैं। तुम्हारी चाल मुझे सुधरी सी जान पड़ती है। इससे इस कागज़ पत्र समेत सम्पूर्ण धन तुम को समर्पण करता हूं। मैंने इस में से एक कौड़ी भी नहीं उठाई॥

हम संसार में मनुष्य के कई कई स्वभाव हैं। किसी का
ऐसा स्वभाव होता है कि वे अपने स्वार्थ की ओर दृष्टि न
रखकर प्रयोग उस में धन का खर्च या न दी किन्हा
धन व विगाड़ जिसमे दूसरे का हित भी हम काम में
मन में परिश्रम करते हैं। ऐसे मनुष्य उत्तम गिने जाते हैं।

कुछ मनुष्य ऐसे होते हैं कि जिस में अपनी कुछ भी
धानि न भी ऐसे काम में यदि दूसरे का हित अपने साथ
में होता किन्तु दूसरे के हित में अपने को कुछ लाभ
देखते तो उसके करने में लगते हैं। परंतु जिस में दूसरे
का हित हो अपने की कुछ लाभ न होते ऐसे कर्मों में जो
मत्तत नहीं होते ऐसे स्वभाव के मनुष्य, मध्यम कहे जाते
हैं।

परंतु कितने मनुष्य ऐसे होते हैं कि दूसरे का कार्य
विगाड़ने में भी अपनी स्वार्थ साध लेते हैं। वा ज्ञान बन
कर दूसरे का नाश करके अपना मतलब गाठते हैं। ऐसे
मनुष्य अधम हैं। परंतु रहक बिचार की कोई मनुष्य
ऐसी दुष्ट प्रकृति के होते हैं अपनी कुछ दृष्टसिद्धि भी
न होती हो पर दूसरे का अपकार करने में नहीं चूकते
यघा तक कि उस में उनका कुछ नुकसान भी हो तो हर्ष
करते हैं ॥

(For Candidates whose mother-tongue is English.)

Write an Essay on the following subject —

'The Choice of Books.'

MATHEMATICS.

(Arithmetic, Algebra and Geometry)

BABU S C MUKARJI, M.A. Examiner.

1 (a) Prove the test of divisibility of a number by 9

 (b) State the principles upon which the ordinary method of finding the G C M. of two numbers is based

 (c) Shew that 325 and 234 are amicable numbers

2. (a) Transform 1007·375 from the scale of eight to that of ten.

(b) It is desired to put a cubical case, whose content is 4019·679 cubic feet, through a square hatchway whose area is 37791·36 square inches : shew whether this can be done.

3. A reservoir with slanting sides whose base is 50 feet by 40 feet and top 75 feet by 60 is 15 feet in perpendicular depth. Find the number of gallons it will hold.

4. (a) Solve $\left.\begin{array}{l} xy + \dfrac{1}{xy} + \dfrac{x}{y} + \dfrac{y}{x} = 13 \\ xy - \dfrac{1}{xy} - \dfrac{x}{y} + \dfrac{y}{x} = 12 \end{array}\right\}$

(b) Find the greatest and least real values of x and y which satisfy the equation $x^2 + y^2 = 6x - 8y$.

5 (a) Find the sum of an *infinite number* of terms of a Geometrical progression, the common ratio being a proper fraction.

(b) The sums of n terms of two arithmetic series are as $3n + 31 : 5n - 3$; shew that their ninth terms are the same.

6. (a) Assuming the number of permutations of n things r together, find the corresponding number of combinations.

(b) Determine the sum of all the numbers that can be formed with all the digits 4, 7, 8, 9.

7. (a) In a Binomial expansion, prove that the coefficient of the rth term from the beginning is equal to the coefficient of the rth term from the end.

(b) Find the term independent of x in the expansion of

$$\left(3x^2 - \frac{a}{3x^3}\right)^{10}.$$

8 (a) Define *Homologous terms*, *Duplicate ratio*, and a **solid angle**

(b) Describe an equilateral triangle equal to a given pentagon.

9 If a straight line is perpendicular to a plane, then every plane which passes through the straight line is also perpendicular to the given plane

10 Divide a triangle into two equal parts by a straight line at right angles to one of the sides.

(Trigonometry and Geometrical Conic Sections)

BABU M. N DATTA, M.A   .. *Examiner*

1 Define the circular measure of an angle.

The three angles of a triangle have the same measure when one is measured in degrees, another in grades, and the third in circular measure find the number of *degrees* in the third angle
[Take $\pi = 3\frac{1}{7}$]

2 Trace the changes in the sign and value of the expression $\cos x - \sin x$, as x varies from $0°$ to $180°$

Find the angle in the second quadrant whose sine is the same as that of $123\frac{1}{2}°$, and find all the positive values of x less than $180°$ which satisfy the condition

$$\sin 7x - \sin x = \sin 3x$$

3 (a) Prove geometrically that $\sin 2A = 2 \sin A \cos A$.

(b) Establish the following relations :—

(i) $\tan 50° + \tan 40° = 2 \sec 10°$

(ii) $\tan \frac{A}{2} \tan \frac{B}{2} + \tan \frac{B}{2} \tan \frac{C}{2} + \tan \frac{C}{2} \tan \frac{A}{2} = 1$

when $A + B + C = 180°$

(iii) $\sin^2 A = 3 \cos^2 \frac{B}{2}$ when $\sin (A - B)$, $\sin A$, and $\sin (A + B)$ are in Harmonical Progression

4. Prove that in any plane triangle :—

    (i) $\dfrac{a}{\sin A} = \dfrac{b}{\sin B} = \dfrac{c}{\sin C}.$

    (ii) $\tan \dfrac{B-C}{2} \tan \dfrac{A}{2} = \dfrac{b-c}{b+c}.$

5. Two sides of a triangle are 45 inches and 25 inches respectively, and the angle subtended by the greater is 120° ; find the other angles. Is this an "ambiguous case" ?

<p style="text-align:center">Given $L \sin 28°45' = 9\ 6821349$</p>

<p style="text-align:center">diff. for $1' =\ \cdot0002302$</p>

<p style="text-align:center">$\log 2 = \cdot3010300$; $\log 3 = \cdot4771213.$</p>

6. Two observers, one mile apart, observe a balloon, in the vertical plane passing through them both, at elevations of $22\frac{1}{2}°$ and $67\frac{1}{2}°$ respectively. If $\tan 22\frac{1}{2}° = \dfrac{2}{5}$, find the height of the balloon above the ground in yards. Show that there are two solutions.

7. Prove that the locus of the middle points of any system of parallel chords of a Parabola is a straight line parallel to the axis.

A Parabola is traced on paper ; show how you will find its focus and directrix.

8. If the tangent at any point Q of an ellipse meets any diameter CP produced in T, and if QV be the ordinate to that diameter, prove that $CV.CT = CP^2$. State the results when the diameter coincides with either axis.

9. What are Conjugate Diameters ?

Show that the sum of the squares on any two conjugate semi-diameters is constant.

10. What is an Asymptote to a curve ?

If through any point on a Hyperbola a straight line parallel to either axis be drawn meeting the asymptotes, the rectangle under its segments is equal to the square on the semi-axis to which it is parallel.

DEDUCTIVE LOGIC.

Babu Hari Keshav Santal, B.A.   .. *Examiner*

1   Define Logic clearly bringing out its nature as a Science How far is it correct to say that Logic is concerned with Language ?

2   What is meant by the distribution of a term in a proposition ? If it be known concerning a proposition that (*a*) one and only one term is distributed, and (*b*) neither term is distributed, determine the subject and the predicate of each a proposition

3   How many propositional forms are ordinarily recognised by Logic ? What additions to the ordinary scheme were proposed by Hamilton and on what grounds ? Justify or controvert the Hamiltonian scheme.

4   What is meant by Logical opposition ? Carefully distinguish contrary and contradictory opposition. Why is it desirable in controversy to refute a statement by its contradictory rather than its contrary ?

Give the contradictory of each of the following propositions —

(*a*) Few distinguished men have had distinguished sons

(*b*) Two-thirds of the candidates passed.

(*c*) None but traitors would do so base a deed.

(*d*) Macaulay is always clear

5   Define inference and carefully distinguish mediate and immediate inference.

From the assertion "the virtuous alone are happy," what can we learn, if anything, about (1) the happy, (2) the unhappy, (3) the virtuous, and (4) the vicious ? Describe in each case the nature of the process you employ in determining your answer

6. By reference to fundamental principles of thought alone in how many ways can you establish the truth of the proposition " No triangle has one side equal to the sum of the other two " ?

7. Define **Reduction**. Why is Reduction at all necessary ? Frame a Syllogism in **Bramantip** and reduce it indirectly.

8. Examine the following arguments, stating them in syllogistis form where possible, and pointing out fallacies, if any .—

(a) If truthfulness is never found save with scrupulousness, and if truthfulness is incompatible with stupidity, it follows that stupidity and scrupulousness can never be associated.

(b) Some who are truly wise are not learned ; but the virtuous alone are truly wise ; the learned, therefore, are not always virtuous.

(c) That many persons who commit errors are blameworthy is proved by numerous instances in which the commission of errors arises from gross carelessness.

(d) Plato lived after Socrates, and Aristotle after Plato, and so Aristotle lived after Socrates.

ENGLISH POETRY

First Paper.

M. MACMILLAN, Esq., M.A.   , Examiner.

1   How does Byron describe (1) the Apollo Belvidere, (2) the fall of the Veline, (3) the ball at Brussels and the subsequent advance of the British army?

2   How does Iago contrive to make Othello jealous? What general principles in the art of deceit may be derived from his practice?

3   By what means does Rosalind undertake to cure Orlando's "quotidian of love"? Give an account of the scene in which she applies her remedy. Explain "quotidian of love."

4   By what comparisons does Milton try to give his readers an idea of the numbers and power of Satan's army and of the grandeur of Pandemonium?

5   Paraphrase the following passage :—

Thrones, Dominations, Princedoms, Virtues, Powers,—
If these magnific titles yet remain
Not merely titular, since by decree
Another now hath to himself engrossed
All power, and us eclipsed under the name
Of King Anointed ; for whom all this haste
Of midnight march and hurried meeting here,

This only to consult, how we may best,
With what may be devised of honours new,
Receive him coming to receive from us
Knee tribute yet unpaid, prostration vile !
Too much to one ! but doubled how endured—
To one and to his image now proclaimed ?

6. Explain the following passages with reference to the context and add any grammatical or other notes that seem to be required :—

(a) Bell, book and candle shall not drive me back,
When gold and silver becks me to come on

(b) Unkind remembrance ! thou and eyeless night
Have done me shame : brave soldier pardon me,
That any accent breaking from thy tongue
Should scape the true acquaintance of mine ear.

(c)   If I do prove her haggard,
Though that her jesses were my dear heart-strings
I'd whistle her off and let her down the wind
To prey at fortune.

(d) Young Ferdinand whom they suppose is drowned.

(e) You are three men of sin, whom Destiny.
(That hath to instrument this lower world
And what is in't) the never-surfeited sea
Hath caused to belch up you, and on this island
Where man doth not inhabit.

(f) Our torments also may, in length of time
Become our elements.

(g) For then he was inspired and from him came,
As from the Pythian's mystic cave of yore,
Those oracles which set the world in flame.

(h) Parting day dies like the dolphin.

(i) She upon her wedding day
Carried home my tenderest lay
From her lap I now have heard
Gleeful, chirping, Rose the third.

7 (1) Relate in your own words the story of Susan told
in the following poem, and particularly explain the mean
ing of "note of enchantment" —

At the corner of Wood Street, when daylight appears,
Hangs a thrush that sings loud, it has sung for three years
Poor Susan has passed by the spot and has heard
In the silence of morning the song of the bird.
'Tis a note of enchantment, what ails her? She sees
A mountain ascending, a vision of trees,
Bright volumes of vapour through Lothbury glide,
And a river flows on through the vale of Cheapside
Green pastures she views in the midst of the dale,
Down which she so often has tripp'd with her pail,
And a single small cottage, a nest like a dove's,
The one only dwelling on earth that she loves.
She looks and her heart is in heaven, but they fade
The mist and the river, the hill and the shade
The stream will not flow, and the hill will not rise,
And the colours have all passed away from her eyes!

(2) Give in your own words the thoughts expressed in the
following stanzas —

Yet did I love thee to the last,
As fervently as thou,
Who didst not change through all the past
And canst not alter now

The love where Death has set his seal
Nor age can chill nor rival steal,
Nor falsehood disavow
And, what were worst, thou canst not see
Or wrong or change or fault in me

I know not if I could have borne
  To see thy beauties fade ;
The night that followed such a morn
  Had worn a deeper shade :
Thy day without a cloud hath past,
And thou wert lovely to the last
    Extinguished not decayed ;
As stars that shoot along the sky
Shine brightest as they fall from high.

Why would the night following such a morn have worn a deeper shade ? Quote from your reading or your personal experience examples illustrating the principle implied.

SECOND PAPER.

A. H. PIRIE, ESQ.   ..   ..   *Examiner.*

1. (a) How does Canon Browne propose to satisfy the desire of University Extension students for a degree ?

   (b) Give the substance of Mr. Morley's answer to the question " What is Literature ?"

   (c) What lesson regarding Bimetallism does Max Müller derive from the study of antiquity ?

2. " University teaching is characteristically structural, catholic, equalising, chastening, historical, personal, spiritual."

Explain the meaning of each of the above epithets as applied to University teaching.

3. (a) Bring out the full meaning of the following antithesis in plain language :—

" With the great rulers upon earth, head and crown drop together and are overlooked. It is true, we read of them in history ; but we also read in history of crocodiles and hyænas.

With great writers, whether in poetry or prose, what falls away is scarcely more or other than a vesture. The features of the man are imprinted on his works, and more lamps burn over them, and more religiously, than are lighted in temples or churches"

(b) Describe, the character of Peter the Great of Russia as revealed in Landor's dialogue.

(c) Justify Forster's opinion that—

"Landor ranks with the class of writers who are too wise for the foolish and too difficult for the idle"

4. (a) Mark Pattison says —

"Milton's attitude towards Nature is not that of a descriptive poet, if indeed the phrase be not a self-contradiction"

(1) What was Milton's attitude towards Nature?

(2) In what sense is the phrase descriptive poet a self contradiction?

(b) "Language only as an instrument, not as an end in itself; many living languages instead of the one dead language of the old school; a knowledge of things, not of words; the free use of our eyes and ears upon the nature that surrounds us; intelligent apprehension, instead of loading the memory—all these doctrines, afterwards inherited by the party of rational reform, were first promulgated in Europe by the numerous pamphlets of Comenius"

Explain and illustrate the educational doctrines mentioned in the above passage.

5. (a) Show that the subject of the Fall of Man was not so much Milton's choice as his necessity.

(b) Account for the fact that Paradise Lost is more admired than read.

6. (a) Explain and illustrate the meaning of —

(1) Imagination, if it be subject to reason, is its "slave of the lamp"

(2) Our prejudices imprison us : and, like madmen, we take our jailors for a guard of honour.

(b) Give the substance of Helps' advice as to the treatment of suitors.

7. Explain the system of Verse Tests by which the Chronological order of Shakespeare's Plays has been determined.

8. Show, by writing the substance of the following extracts in plain language, that you understand their meaning :—

(a) My friends let me very strongly recommend you to give up the hope of finding the principle of life in dead bodies ; but to take all pains to keep the life pure and holy in the living bodies you have got ; and farther, not to seek your national amusement in the destruction of animals, nor your national safety in the destruction of men ; but to look for all your joy in kindness, and for all your strength to domestic faith, and law of ancestral honour.

Ruskin.

(b) For people who are of that eager spirit that they must contend with something, or somebody, there are always the great men of former days to contend with, and, if possible, to surpass : and also, there is nature to be wrestled with, who will not yield her " open secrets " without much compulsion, and who is an antagonist always at hand, offering full scope for our utmost energy and mettle.

Helps.

(c) Manners have been somewhat cynically defined to be a contrivance of wise men to keep fools at a distance. Fashion is shrewd to detect those who do not belong to her train, and seldom wastes her attentions. Society is very swift in its instincts, and, if you do not belong to it, resists and sneers at you, or quietly drops you. The first weapon enrages the party attacked ; the second is still more effective, but is not to be resisted, as the date of the transaction is not easily found. People grow up and grow old under this infliction, and never suspect

the truth, ascribing the solitude which acts on them very injuriously to any cause but the right one

Emerson

(d) The Age of Romance has not ceased, it never ceases, it does not, if we will think of it, so much as very sensibly decline "The passions are repressed by social forms, great passions no longer show themselves" Why, there are passions still great enough to replenish Bedlam, for it never wants tenants, to suspend men from bed posts, from improved drops at the west end of Newgate A passion that explosively shivers as under the Life it took rise in, ought to be regarded as considerable, more, no passion, in the highest day of Romance, yet did The passions by grace of the Supernal and also of the Infernal Powers (for both have a hand in it), can never fail us

J G JENNINGS, ESQ, M.A.   *Examiner*

' When I hear of the distinction between the poet and the thinker, I really see no difference at all for the poet is really such by dint of superior vision, by dint of a more deep serene vision,—and he is a poet solely in virtue of that "

Write an essay, on the outline given below, on —

The Poet as Thinker

1   The processes of thought common to prose and poetry, and those, if any, peculiar to the latter

2   Poetic insight, the nature of poetic inspiration

3   The contributions of poetry to knowledge

4   Poetry and ethics, ideals

N B—Illustrate each section of your essay as far as you can by references to the poems of the Course

PHILOSOPHY.

FIRST PAPER.

(*Mental Philosophy.*)

DR. G. THIBAUT, Ph.D. ..   ..   .. *Examiner.*

1. Define Consciousness and Self-consciousness. Indicate the
principal respects in which *fields of consciousness* differ among
themselves. Describe the influence of Attention on intellectual
operations, feelings and volitions.

2. Distinguish between Sensation and Perception. Charac-
terize the special position held, among perceptions, by the
perceptions of Touch and Sight. Describe the development of
the perceptions of Touch.

3. Distinguish the task of Logic as conceived by Bosanquet
from that of Psychology. According to Ladd ' the primitive
form of Judgment is˜ the conscious affirming of relations of
resemblance and difference between the contents of conscious-
ness.' Fully explain this definition and review it in the light
of Bosanquet's theory as to the nature of Judgment.

4. Discuss the question whether the ordinary logical scheme
of the types of Judgment adequately represents the principal
kinds of our experience.

5. We read in Ladd's Primer ' Sensations do not ordinarily
arise unless some of the organs of sense are excited by certain
of those manifold forces of nature which are adapted to excite
them.' Fully consider the position maintained here, from the
Berkeleian point of view. What criticism is passed by
Bosanquet on systems of subjective Idealism, and how far does
such criticism apply to Berkeley's doctrine ?

6. (a) Show in what way Berkeley disposes of the dis-
tinction made between sensible and absolute extension and
motion.

(b) What is Berkeley's meaning in maintaining that we have not ideas but notions of other finite spirits and the infinite divine spirit ?

7   Give an account of the historical antecedents of Berkeley's system. Point out to what extent the doctrines of Berkeley and Malebranche agree and wherein they differ

8   Clearly expound the divergence of Hume's view of the idea of Causation from the Common Sense view

Attempt a criticism of Hume's theory

P K Roy, Esq., D.SC   *Examiner*

*1   Describe the nature of Ethics as a science and distinguish it from Psychology.

2   What are the objects of our moral judgments ? Discuss the question and illustrate your answer by concrete examples

3   Explain the doctrine that self realization is the supreme end of life

4   Explain and criticise Mill's theory of the origin and development of the idea of Justice

5   Explain and criticise Butler's conception of the constitution of human nature.

6   Explain —

   (a) Plato's classification of virtues.

   (b) Aristotle's doctrine of the ultimate end of human action

   (c) The Stoic formula of " living according to nature "

7. Give a systematic account of the Ethico-political system of Hobbes.

In spite of these obstacles, the last ten years have seen some progress in female education. Remarkable instances have not been wanting in which native ladies have attained literary and academic distinction: several have passed the University Entrance Examination, and two or three have obtained degrees. The instruction offered has been chiefly of an elementary character. The progress has been especially marked in Southern and Western India, where women are less secluded than in the North. While in 1871 there were about 10,000 girls receiving school instruction in Madras, the number rose to 59,000 in 1886. In Bombay, the number similarly increased from about 9,000 to 49,000. In Bengal, the number of girls at school was 5,900 in 1871 and 80,000 in 1886.

Prominent among these was Mahomed Shaffi, of Umballa, who had grown rich as meat contractor for the troops before Delhi, to whom war meant more money, and who heartily entered into the conspiracy. The plot thickened, almost every Mussulman of importance having been sounded, and the time was nearly ripe for a general rising, to be aided on this occasion by the armies of the faithful enrolled under the banners of the Syuds of Malka and Sittana. To a Mussulman Inspector of Police belongs the honour of exposing the whole plot and nipping rebellion in the bud. At the risk of his reputation, his

position, his pension, and by the all but certain sacrifice of his only son, a boy of sixteen, Mahomed Hyat Khan, after securing copies of the correspondence, he exposed the whole conspiracy. Mahomed Shaffi and the Patna Wahabis were seized. The former tried and sentenced to death, escaped martyrdom by a legal flaw, and all were transported. This ended the hopes of rebellion in India, and the Punjab Government decided by a bold stroke to destroy the Wahabi colony at Malka, root and branch.

That the British infantry soldier is more robust than the
soldier of any other nation, can scarcely be doubted by those
who, in, 1815, observed his prowerful frame distinguished
amidst the united armies of Europe ; and notwithstanding his
habitual excess in drinking, he sustains fatigue and wet, and
the extremes of cold and heat, with incredible vigour. When
completely disciplined, and three years are required to accom-
plish this, his port is lofty and his movements free, the whole
world cannot produce a nobler specimen of military bearing,
nor is the mind unworthy of the outward man. He does not
indeed possess that presumptuous vivacity which would lead
him to dictate to his commanders, or even to censure real
errors although he may perceive them ; but he is observant

and quick to comprehend the orders, full of resource amidst difficulties, calm and resolute in danger, as I knew them, surpassed and careful of the officers in moments of imminent peril

The results of the field battles, and the united testimony of impartial writers of different nations, have given the first place in most the European infantry to the British.

HISTORY.

FIRST PAPER.

C. A ANDREWS, ESQ., M.A.   ..   .. *Examiner*.

1. Explain the origin and significance of the term "Holy" when applied to the Roman Empire. Trace the origin and development of the mediæval belief in an Ideal State consisting of a World-Monarchy and a World-Religion ; and explain the theoretical and historical basis on which this belief rested.

2. In the conflict between the Emperor and the Pope, define the Pope's position, and describe the various advantages and sources of strength which he possessed. Show that both theoretically and practically the strife for power between them was irreconcilable.

3. How did the early Rennaisance contribute to the partial restoration of the Imperial authority, and diminish the influence of the Papacy. What was the precise effect of (1) the Revival of Learning, and (2) the Reformation,—on the theory of the Empire.

4. Institute a contrast between the Eastern and Western Empires in the time of Charlemagne, and point out the resemblance and inter-relation between the two Empires and the two Caliphates. What beneficial effects had the Crusades upon European civilization ?

What appear to have been the motives of the policy of Hastings, and how was it affected by financial considerations?

2. Notice the principal inaccuracies and misrepresentations of Burke, Mill and Macaulay with reference to the Rohilla War. Why was Colonel Champion dissatisfied with his position, and what is the nature of his evidence as to the conduct of the Nawab of Oudh?

3. Compare the position of a Zemindar before and after the Perpetual Settlement. What powers for coercion of defaulting tenants were given to the Zemindars? How does Act X of 1859 amend the Perpetual Settlement?

4. Describe the reforms of Cornwallis in the administration and the judicial system of Bengal.

5. To what extent did Cornwallis in his second Governor-Generalship reverse the policy of Wellesley, and why?

6. "The conception of capital involves two fundamental attributes that of 'productiveness' and that of 'prospectiveness.'" Explain this. Distinguish Consumption Capital from Auxiliary Capital

7. What are the elements of the Cost of Production, and of what sort of commodities does it regulate the value?

Point out the ambiguity of Mill's use of the term Cost of Production. What terms does Marshall propose to substitute?

8. What analogies can be drawn between industrial organisation on the one side, and the physical organisation of the higher animals on the other?

9. Examine the relation between the price of agricultural produce and the rent of land.

Show that the rent of a mine should be calculated on different principles from that of a farm. What do you understand by Quasi Rent?

(b) If $x = a(\theta - \sin\theta)$

$y = a(1 - \cos\theta)$

find the values of $\dfrac{d^2y}{dx^2}$.

10 Define a minimum value of $\phi(x)$ and shew that if $\phi'(x) = 0$ and $\phi''(x)$ is positive, $\phi(x)$ is a minimum value of $\phi(x)$.

Find whether there are maximum or minimum values of

$$2x^4 + bx^3 - 3x^2 + 36x - 13$$

and if there are determine them

W N FFENNELOWES, Esq., M.A.   *Examiner*

1 Enunciate and prove the proposition known as the Triangle of Forces. Construct geometrically the direction of two forces 2P and 3P which may be balanced with a force 4P whose direction and point of application are given.

2 Shew that any system of forces acting on a rigid body in one plane may be reduced to a single force and a single couple. A rod is placed in any given place on which one end on a smooth floor and the other end against a smooth wall. Find a single force and a single couple which together will keep it at rest in that position.

3 If a right cone be cut by a plane perpendicular to its axis find the distance of the centre of gravity of the frustum thus cut off from the vertex of the cone.

4 Two equal weights are attached to a string that is laid over the top of two inclined planes having the same altitude

and placed back to back, the angles of inclination of the planes being 30° and 60° respectively; and the weights are on the point of moving; show that the coefficient of friction between each plane and weight is $\dfrac{1}{2+\sqrt{3}}$.

5. A body is projected horizontally with a given velocity; prove that it will describe a parabola and find the position of the focus.

Two bodies are projected from the same point, one later than the other by t seconds, so as to describe the same parabola. If V be the initial velocity and a the angle of projection, show that the particles are nearest to each other when in the same horizontal line, and that this occurs at an interval of time $\dfrac{V\sin a}{g} - \dfrac{t}{2}$ after the projection of the second body.

6. A heavy ball of elasticity e falls from a height of n ft. upon a plane inclined at an angle a to the horizon, rebounds and strikes the plane again. Show that the distance between the two points of impact is $4ne\,(1+e)\sin a$.

7. Find the moment of inertia of a sphere about any diameter.

8. Find the value of the following integrals—

$$\int \frac{dx}{1+\cos x} \qquad \int \frac{dx}{x^4 - x} \qquad \int \sin 3x \cos^4 x\,dx.$$

9. Show that the expression $x^{m-1}\,(a+bxn)\,p$ admits of integration immediately or by simple substitution, (1) when p is a positive integer, (2) when $\dfrac{m}{n}$ is an integer, (3) when $\dfrac{m}{n}+p$ is an integer.

Integrate $x^{\frac{7}{4}}\,(a+bx^4)^{\frac{1}{5}}$ with respect to x.

10. Find the length of the curve $(y-b)^3 = 27ax_2$ between the points whose abscissæ are 0 and a.

(N.B.—Not more than three questions are to be attempted in any of the Sections A, B, and C. Full marks will be given for eight questions neatly and fully answered.)

A

1. State the law of gravitation in words and Mathematical symbols, and if any constant is involved in its expression, find its value in terms of the units of measurement you adopt.

Assuming that the earth is a perfect sphere of uniform density, establish that its action at any external point is exactly equal in all respects to that of an equal mass concentrated at its centre.

2. Define potential and equipotential surfaces. What are lines and tubes of force?

Prove that in a tube of force which does not cut through attracting matter the product of a cross section into the resultant force perpendicular to the section is constant throughout the tube.

An urn is cylindrical contains of radius a is placed inside an urn to enclose relational conductor of internal radius b so as to have their axes coincident. The inner cylinder is charged to potential V, and the outer to potential 0. Find the lines of force, and the force at any point between the two cylinders and if all the charge on a length l of the inner cylinder.

3. Define a simple pendulum. Prove that its oscillations are synchronous and find an expression for the period of a complete oscillation.

Shew that a pendulum t to be hung would on time at $\frac{1}{4}$, $\frac{g}{g_1}$ inversion.

4. Define elasticity. Establish the equation due to change of length or of volume is measured.

Prove that the work done in producing extension is equal to the product of the average resistance overcome into the space through which it is overcome.

B.

1. What is meant by the interference of sounds? Give two examples and explain them fully.

2. Explain fully any methods by which you could determine exactly the wave length in air and vibrational number of a given sound, as for example, that produced by a standard tuning fork.

3. State and establish Doppler's principle.

A train passing through a station at the rate of 36 miles per hour is sounding a whistle which emits a sound the vibrational number of which is 1200 when the train is at rest. Find the apparent change in the pitch of the sound to an auditor in the station.

4. What is meant by a free vibration and what by a forced vibration? Explain fully the nature of the vibratory motion in a string fastened at both ends, and oscillating freely and show that it may be explained as due to two waves of equal period and amplitude moving in opposite directions.

5. Give in brief the evidence that sounds are usually complex and can be resolved into simple harmonic elements.

Work out the simple harmonic component sounds that may be present in the sound produced by a closed or stopped pipe.

C.

1. Explain fully what is meant by the mechanical equivalent of heat. How did Joule determine its value?

Find the heat equivalent of a cannon ball weighing 96lbs. moving with a velocity of 1250 feet per second.

2 What is meant by ebullition ? Give reasons for the statement that water boils under different pressures at different temperatures

Explain briefly the method of measuring the elevation of high stations above the sea by the use of this principle

3 Explain how there is a variety of meanings to the term "specific heat of a body" What two important cases are usually considered ?

Describe Bunsen's ice calorimeter for the determination of the specific heat of a body

4 What is meant by the spheroidal state ? How do you explain it ? Mention experiments which support your explanation.

SECOND PAPER.

BABU HARI DAS GAPGARI, M.A   *Examiner*

(Not more than four questions to be attempted in Section A and not more than six in Section B Full marks will be given for eight questions completely answered)

A

1 What is the measure of deviation of a ray refracted through a prism ? When is the deviation a minimum ? Give a proof of your statement.

2 Trace the position of the images of a bright point by a lens consisting of a sphere of glass of radius 2 inches and refractive index 1 5 when the point moves from an infinite distance up to the sphere.

3. Find the focal length of a single lens that is optically equivalent to two thin lenses in contact and local lengths f and f' respectively

When a luminous point is placed on the principal axis of a convex lens (A) and at a distance a from it, an image is formed at a distance 12 inches from it on the other side. If a second lens (B) is placed close to A the image is 18 inches off. Determine the focal length of the lens B and state whether it is concave or convex.

4. Explain how the primary rainbow is produced and point out how the angle between the incident and emergent rays in the case of one of the rain drops may be calculated. Would the phenomena of the primary bow be as they are if the refractive index of water were as great as 2·5 ?

5. Explain the theory of Rowland's concave diffraction grating. What are the advantages of this form of grating ?

6. Enumerate the different kinds of polarized light. Explain how they may be produced and distinguished from each other and from common light.

B.

1. Define magnetic dip and describe the method of determining it.

Assuming that the earth's magnetism is due to a very small magnet at the centre of the earth, shew that $\tan D = 2 \tan L$ where D is the magnetic dip at a place whose magnetic latitude is L.

2. Describe a method of determining the magnetic moment of a magnet in absolute measure.

3. A given electric charge is to be divided between two or more Leyden jars of the same] or different capacities. Prove that the work spent in charging the jars is least when they are all charged to the same potential.

4. Define *electrical potential*. Trace any analogy you can between electrical potential and temperature.

A sphere of 10 centimeters radius is charged with 100 units of electricity   It is surrounded by an insulated spherical conductor of 15 centimeters radius charged with 90 units of electricity   Determine the potentials of the spherical surfaces

5   Distinguish between the conduction of electricity in a metal and in an electrolyte   Describe fully the phenomena attending electrolytic conduction.

6   State Faraday's law of the induction of currents produced by changes in the magnetic field   What is the coefficient of self induction of a circuit ?

Show that the coefficient of self induction per unit length of a long, straight solenoid is $4 \pi^2 n^2 a^2$ where a is the radius of the solenoid and n the number of turns per unit length

7   A circular coil of 20 centimetres diameter composed of 25 turns of insulated copper wire is made to revolve about a vertical diameter at the rate of 600 revolutions per minute   Assuming the horizontal intensity of the earth's magnetic force at the place of observation to be 18 find the electromotive force developed in the coil at the moment when it coincides with, and also when it is at right angles to, the magnetic meridian.

8   Define the absolute unit of electrical potential in the electrostatic and electromagnetic measures.

The Volt is defined as equal to 10^8 absolute electromagnetic C G S Units.   What would be the number of foot-gram second units contained in one Volt ? 1 ft. = 30·5 c.m.   1 gram = 14 5 grains.

PRACTICAL EXAMINATION

J MURRAY, Esq., M.A.   Examiner

1   What is meant by the C G S system of units ? Define the unit magnetic pole on this system.   What number denotes on the "foot lb-second" system a pole which has strength 5 on the C G S system ?

2. Give full experimental details of an accurate method of determining G.

3. How would you find the focal length of a double concave lens ?

4. Explain how you would compare (*a*) the strengths of two magnetic fields, (*b*) the magnetic moments of two magnets.

5. Describe in detail any method of determining (in Ergs) the difference of potential between two points in a conductor carrying a current.

CHEMISTRY.

First Paper.

A. Pedler, Esq., M.A., F.R.S.   ..   .. *Examiner.*

1. Explain clearly what is meant by the terms atom, molecule, atomic weight, and molecular weight. Describe briefly what experiments could be made to ascertain whether the formulæ CO & SO_2 correctly represent the molecular composition of carbonic oxide and sulphurous anhydride.

2. Indicate as fully as you can the differences between :—

  (*a*) Mechanical mixtures and chemical compounds.

  (*b*) Solution and chemical action.

  (*c*) Chemical change and physical change, and

  (*d*) Chemical decomposition and dissociation.
     Give examples.

3. State precisely the reasons which may be assigned for including in the same family of elements (*a*) phosphorus and arsenic, (*b*) chlorine and fluorine, and (*c*) oxygen and chromium.

4. Describe carefully the preparation of *pure* nitrogen. Indicate its properties as fully as possible.

5   Describe the preparation of a strong solution of hydroxyl
Give the reactions, if any, of this substance with ozone, argentic
oxide, plumbic sulphide, manganese dioxide, lime water and
charcoal.

6   Each of the following substances is treated with water,
explain what action, if any, takes place —anhydrous sod c
sulphate, phosphoric chloride, silicic chloride, sodic chloride,
anhydrous cupric sulphate, silicic fluoride, ammonia gas, boric
fluoride, sulphur trioxide, borne sulphate and nitrogen tetroxide

7   Describe the methods by which iodic and periodic acids
are best prepared   Discuss the atomicity of Iodine, specially
with reference to these bodies.

8   State briefly, with equations when possible, the action
of dilute (a) sulphuric, (b) hydrochloric and (c) nitric acids on
each of the following substances —marble, zinc, platinum, silver,
quartz, sodic carbonate, iron, charcoal, lead and magnesium.

9   Discuss the methods by wh ch oxygen can be produced
on a large scale as required for manufacturing purposes.

SECOND PAPER.

BABU ABHAYA CHARAN SANYAL, M A.   *Examiner*

(N B —Ten questions are to be attempted   One from Section A,
one from Section B, one from Section C, and seven from Section D)

A

1   Show by a comparison of their compounds in what re
spects the elements carbon, silicon, tin and lead may be said to
constitute a natural group.

2   A relation is found to exist between many of the elements
and their atomic weights. State the nature of this relation,
and mention not less than three of such properties   Show by
taking any series of elements, that this relation does exist.

B.

3. Describe the process of extracting silver from argentiferous galena.

4. Describe the Bessemer process of manufacturing steel.

C.

5. 0·325 gram of zinc yield 127·3 c.c. of hydrogen measured over water at 25° C. and under a pressure of 750 m.m. Calculate the equivalent weight of zinc from these data. (Pressure of aqueous vapour at 25° C.=23·5 m.m.).

6. The chloride of the metal has the following percentage composition :—

Metal	..	..	47·79
Chlorine	..	..	52·21
	Total	..	100·00

and 6·8 grams of the chloride require 17 grms of silver nitrate to precipitate the chlorine. The specific heat of the metal is 0·0956. Find its atomic weight and identify it. (Ag=108).

D.

7. What is an alum ? Give the outlines of any process for the manufacture of common alum, and express the chemical changes involved therein by equations. Alum is used as a mordant. What do you understand by this ?

8. Point out the resemblance between the corresponding compounds of magnesium, calcium and zinc. By what characteristic tests are the salts of magnesium distinguished from those of calcium and of zinc ?

9. Describe the changes which occur when the following substances are heated in contact with air :—(a) lead nitrate, (b) ferrous sulphate, (c) microcosmic salt, (d) lead sulphide, (e) a mixture of mercuric sulphide a d iron, and (f) silver sulphide.

10. Describe the action of sulphuretted hydrogen on the following solutions —(a) arsenic acid, (b) alum, (c) potassium dichromate, (d) silver nitrate, (e) magnesium sulphate and (f) ferric chloride.

11. Describe the preparation of white lead and of nitre.

12. Describe the preparation of potassium permanganate from manganese dioxide. State what takes place when the salt is (a) heated strongly, (b) boiled with a strong solution of caustic potash, and (c) added to a sulphuric acid solution of ferrous sulphate.

13. Mention the special properties which platinum possesses. What substances should not be fused in platinum crucibles and why? How is platinic chloride prepared? What double salts does it form with alkaline chlorides?

14. You are given a sample of barium sulphate. Describe in detail how you would prepare sulphuretted hydrogen from it.

15. You are given a British sovereign. How would you prepare gold chloride from it? Express by equations the reactions which take place when the following substances are added to an acid solution of auric chloride (a) oxalic acid, (b) sulphurous acid, and (c) acid solution of antimonious chloride.

M.A. EXAMINATION, 1898.

ENGLISH.

First Paper.   ＼

M. Macmillan, Esq., m.a.   ..   .. *Examiner.*

(Candidates should not attempt more than eight questions.)

I. What opinions are expressed or implied in *Paradise Regained* on (a) true kingliness,—(b) the value of popular opinion,—(c) glory,—(d) riches,—(e) Hebrew Poetry,—(f) Greek Poetry and Philosophy ?

Are any indications of the author's approaching old age discernible in the poem ?

II. Illustrate from *Samson Agonistes, Paradise Regained,* and the *Sonnets* the prevalence of the autobiographic element in Milton's poetry.

III. What are the principal points in which *Samson Agonistes* differs from the dramas of Shakespeare ?

IV. What are the chief thoughts expressed in the *Sonnets* on Fairfax, Cromwell, and the Massacre in Piedmont ? Explain the historical allusions in these poems.

V. Comment upon the following passages :—

   (a) The way he came not having marked return
      Was difficult by human steps untrod.

How should this passage be punctuated ?

   (b)   Where the shadow both way falls
     Meroe, Nilotic isle.

   (c) Means I must use, thou say'st, prediction else
     Will unpredict and fail me of the throne,

(*d*) A kingdom they portend thee, but what kingdom,
   Real or allegoric, I discern not,
   Nor when, eternal sure, as without end,
   Without beginning ; for no date prefixed
   Directs me in the starry rubric set

(*e*) And as an evening dragon came
   Assailant on the perched roosts
   And nests in order ranged
   Of tame villatic fowl, but as an eagle
   His cloudless thunder bolted on their heads.

(*f*) For evil news rides post while good news baits

VI   Draw a comparison between Cleopatra and Juliet.

VII   What practical lessons to guide us in our daily life
may be derived from *The Tempest, Coriolanus,* and *Romeo and
Juliet* ? Why did Shakespeare introduce such a repulsive char-
acter as Caliban unto *The Tempest* ?

VIII   How does Shakespeare represent the mental conflict
that raged in the breasts of Macbeth and Lady Macbeth ?

IX.   What was the position of political affairs at Rome in
the days of Coriolanus ? How far does the play of *Coriolanus*
reveal Shakespeare's political sentiments ?

X.   (1) Briefly explain the following passages with refer-
ence to the context —

(*a*) If it were done, when 'tis done, then 'twere well
   It were done quickly

(*b*) Where be the sacred vials thou shouldst fill
   With sorrowful water ? Now I see, I see,
   In Fulvia's death, how mine received shall be

(*c*)   Antony
   Shall be brought drunken forth, and I shall see
   Some squeaking Cleopatra boy my greatness.

(d) A torch for me : let wantons light of heart
Tickle the senseless rushes with their heels,
For I am proverb'd with a grandsire phrase ;
I'll be a candle-holder, and look on.

(e) Sir, you may thank yourself for this great loss,
That would not bless our Europe with your daughter,
But rather lose her to an African,
Where she, at least, is banished from your eye.

(f)   Shall remain !
Hear you this Triton of the minnows ? Mark you
His absolute 'shall' ?

(2) Comment upon the words in **thick type** in the fol-
lowing :—

(a) When **him** we serve's away.

(b) Ere human statutes purged the **gentle** weal.

(c) **Shall's** to the Capitol ?

(d) Come **thee** on.

(e) **Your** serpent of Egypt is bred now of **your** mud by
the operation of **your** sun.

SECOND PAPER.

M. MACMILLAN, ESQ., M.A.   ..   .. *Examiner.*

(*Candidates should not attempt more than eight questions.*)

I. Illustrate the leading characteristics of Wordsworth and
Shelley by reference to their poems and draw a contrast between
the two poets and their poetry.

II. Explain the following passages with reference to the
context and mention the poem from which each passage is
extracted :—

(a) O Lady ! we receive but what we give
And in our life alone does nature live.

(1) Heard melodies are sweet, but those unheard
    Are sweeter

(c) If hopes were dupes, fears may be liars :
    It may be, in yon smoke concealed,
    Your comrades chase e'en now the fliers,
    And but for you possess the field.

(d) Who counsels peace at the momentous hour,
    When God hath given deliverance to the oppressed,
    And to the injured power !

(e) His wise and hearts supplied our fears,
    And his overthrow our course.

(f) Sophocles long ago
    Heard it on the Ægean, and it brought
    Into his mind the turbid ebb and flow
    Of human misery ; we
    Find also in the sound a thought,
    Hearing it by the distant northern sea.

III   Discuss the truth of the statement that—

"In his comprehension of the varied aspects of human
nature, in his power of dramatically presenting them, Browning
stands alone among the poets of a great poetic age."

What poems of other nineteenth century poets manifest this
power ?

IV   What is Tennyson's attitude towards modern science in
In Memoriam ? In what context and in what terms does he refer
to the theory of evolution and the teachings of geology ?

V   What do you consider to have been the main purpose
with which *In Memoriam* was conceived ? To what means and to
what extent is this purpose accomplished ?

Explain—

(a) The tide flows down, the wave again
    Is vocal in its wooded walls ;
    My deeper anguish also falls
    And I can speak a little then.

(b) So rounds he to a separate mind
    From whence clear memory may begin,
    As thro' the frame that binds him in
    His isolation grows defined.

VI. Compare the social condition of England in the four-teenth century as described in Chaucer's Prologue with the social condition of modern and ancient India.

VII. Translate the following passages into nineteenth century English :—

> (a) Al ful of chirkyng was that sory place.
> The sleer of himself yet saugh I there,
> His herte-blood hath bathed all his here ;
> The nayl y-dryven in the shode a-nyght :
> The colde deth, with mouth gapyng upright.
> Amyddes of the tempul set meschaunce,
> With sory comfort and evel contynaunce.
> Yet saugh I woodnes laughyng in his rage ;
> Armed compleint, outehees, and fiers outrage.
> The carnigne in the busche, with throte i-korve :
> A thousand slayn, and not of qualme i-storve ;
> The tiraunt, with the pray bi force i-raft ;
> The toun distroied, there was no thing i-laft.
> Yet saugh I brent the schippis hoppesteres ;
> The hunte strangled with the wilde beeres :
> The sowe freten the child right in the cradel ;
> The cook i-skalded, for all his longe ladel,

> (b) His purchace was bettur than his rente.

> (c) Seynt Julian he was in his countre.
> His breed, his ale, was alway after oon ;
> A better envyned man was nowher noon,

> (d) The goute lette hir nothing for to daunce,
> Ne poplexie schente not hir heed ;
> No wyn ne drank sche, nother whit nor reed,
> Hir bord was servyd most with whit and blak,
> Milk and broun bred, in which sche fond no lak,
> Saynd bacoun, and som tyme an ey or tweye,
> For sche was as it were a maner deye.

Give the meaning and etymology of *anon,—bikight,—blire,—
daunger, — feyne, — licke wake — scheruce, — thirle, — gwosf,—
forpysed.*

VIII   Give an account of the flexional suffixes used by
Chaucer which have since his time become rare, disappeared, or
undergone transformation.

IX.   On what grounds may a very high position be claimed
for Spenser among the English poets ?   Give an account of the
contents, language and metre of his great work

THIRD PAPER

M J WHITE, ESQ., M A   *Examiner*

I   Mention and describe a few of the customs of Utopia that
may be considered Utopian in the ordinary sense of the word.

Give a summary of several passages in Utopia that prove
Sir Thomas More to have been a statesman in advance of his
age.

II.   Give the precise meaning of the words and phrases in
thick type.   Trace the origin of this meaning in each case

Had I forethought so much, or doubted any such *sequele*
A curious desire to see newes.   He can *awaye with no
myrthe nor sporte*   As concernyng my kynsfolke I passe not
greatly for them   That shoulde be counted for verye desertes
I chaunced upon *leude overthwarte* judgments   He *was of a
meane* stature   The rude and *uplandish plowmen* of the
countreya.   Which plucked downe *fermes* and townes of hus-
bandry   Better be called *happie or welthy* then notable or
famous.   No sooner taken with the maner they should be
punished.   Were so fallen into povertie and become so impotent
and *unweldie*   Brynge thus touched on the *quicke* and hit
on the *gaule*   Three *storyes* one over another   Sturdy and
valiaunte beggers   *Ruche* men, in whose *debte and daunger*

they be not. Such ·nigeshe penny-fathers. The grosser that any interpretation of the lawes is. If they by coveyne be wiped beside their goodes.

III. (a) Trace the influence of Bacon's political experiences on his moral standard. Illustrate from the Essays.

(b) Bacon's remarkable talent for discovering analogies seems to have inspired him with too much regard to them as arguments. Give a few examples.

(c) Compare Bacon's Essays with those of Addison as regards subject-matter and·style.

IV. (a) Reduce things to the first institution and observe wherein and how they have degenerated, but yet ask counsel of both times ; of the ancient time what is best ; and of the latter time what is fittest.

Explain the nature of the advantage we derive from following the first of these precepts. In the second, why do we learn what is *best* in the one case and what is *fittest* in the other ?

(b) In choice of Committees for ripening business for the Council it is better to choose indifferent persons, than to make an indifferency by putting in those that are strong on both sides.

Why is the former plan preferable ?

(c) Crafty men contemn studies ; simple men admire them ; and wise men use them. For they teach not their own use : but that is a wisdom without them, and above them, won by observation.

Explain the connection between the character of the men and their treatment of studies in each case. What is the force of *without* and *above?* Give an illustration of studies not being able to teach their own use, and another of the use being won by observation.

V   What is the general characteristic of the Elizabethan
Prose writers from Ascham to Hooker? What was the origin
of it? In connection with this explain Bacon's remark—

"These modern languages will at one time or other play the
bankrupt with books."

VI   How may the high literary excellence of the Authorized
version of the Bible be accounted for?

VII   Clarendon is a striking example of the remark that in
some cases men's merits are their own and their faults those of
their time

Show that this is true as to Clarendon's style in the History
of the Rebellion.

VIII   (a) Compare Thackeray, as an historical novelist, with
Scott

(b) What is the type of character intended to be represented
by Esmond? Show how this character is exhibited in its
different phases in the course of the development of the story

(c) What is meant by unity in a work of fiction? Illustrate
from Esmond

FOURTH PAPER.

M J WHITE, ESQ., M A.   Examiner

I   What is Carlyle's conception of the Hero? Show how
he maintains that the Hero is always intrinsically the same,
with differences which depend on the time and the environment
he finds himself in.

II   Explain the nature of his doctrine of Hero-Worship, and
point out the tendencies and theories of his age to which it was
more directly opposed.

III.   What were the truths he meant to enforce in the following passages, and what connection have they with the rest of his teaching ?

(a) Men of Letters are a perpetual priesthood.

(b) Understanding is a hand that can handle any tool.

(c) The Eighteenth was a sceptical century ; in which little word there is a whole Pandora's box of miseries.

(d) Destruction of old forms is not destruction of everlasting substances.

(e) Quackery gives birth to nothing: gives death to all things.

(f) Let us honour the great empire of Silence.

IV.   Translate the following passages into simple language :—

(a) Most lives, though their stream is loaded with sand and turbid with alluvial waste, drop a few golden grains of wisdom as they flow along. Often times a single cradling gets them all, and after that the poor man's labour is only rewarded by mud and worn pebbles.

(b) Every man's heart has a regular mode of action ; but I know a great many men whose *brains*, and all their voluntary existence flowing from their brains, have a *systole* and *diastole* as regular as that of the heart itself. Habit is the approximation of the animal system to the organic. It is a confession of failure in the highest function of being, which involves a perpetual self-determination, in full view of all existing circumstances. But habit, you see, is an action in present circumstances from past motives. It is substituting a *vis a tergo* for the evolution of living force.

(c) What do you think opens the souls of poets most fully ? Why, there must be the internal force and the

external stimulus. Neither is enough by itself. A rose will not flower in the dark, and a fern will not flower anywhere I don't think that there are many poets in the sense of creators ; but of those sensitive natures which reflect themselves naturally in soft and melodious words, pleading for sympathy with their joys and sorrows, every literature is full. Nature carves with her own hand the brain which holds the creative imagination, but she casts the over sensitive creatures in scores from the same mould.

(d) These parenthetical passages, unless your audience is of superior intelligence, will confuse them. Many people can ride on horseback who find it hard to get on and get off without assistance. One has to dismount from an idea, and get into the saddle again at every parenthesis.

V. (a) From a modern platform speech one would infer that before the present generation the schoolmaster had never been thought of, and that the English of past ages had been left to wander in darkness. The problem was understood in Old England better probably than the platform orator understands it, and received a more practical solution than any which on our new principles has yet been arrived at.

What is the problem ? Why should the platform orator be spoken of contemptuously ? What was the practical solution of Old England, and why are the new principles no solution at all ? What do you consider the outcome of all Froude's speculations on this subject ?

(b) So far, perhaps, the finest result of scientific activity lies in the personal character which devotion of a life to science seems to produce.

Describe the type of character to which Froude here refers.

(c) The same mass of iron may be in the condition of a heap of dust, each particle separate from the rest, or it

may be in the condition of solid metal, in tenacious and in-
destructible cohesion. It is with a man as it is with the
iron atom. It is only in permanent combination that human
beings develop their finest qualities.

What is the social and political truth here symbolized ? and
what is the theory it is intended to refute ?

(d) In the primitive anarchy there is no law, but that of
strength and courage. In the modern anarchy the superiority
is with cleverness and energy. Of morality there is equally
little in both.

What is the evil of which Froude complains? and what is
the origin of it ?

VI. (a) What is the origin of ellipsis and tautology in
speech

(b) Point out a discrepancy that sometimes occurs between
the grammatical and psychological predicate. Give an example.
What form of expression was introduced to avoid this dis-
crepancy ?

(c) Explain the force of the following case-forms :—

   She is daughter to this duke.

   The curse of curses is our curse to love.

   A prince of power.

   A very little thief of occasion.

   He that kills me six or seven dozen of Scots at a break-
   fast.

   Their tempered youth with aged fathers awe.

VII. Give a few illustrations of the difference between Old
English Syntax and Middle English Syntax.

FIFTH PAPER.

J. G. JENNISON, ESQ., M.A.   . .   .   Examiner.

I   Man is all symmetry,
Full of proportions, one limb to another,
And all to all the world besides,
Each part may call the farthest, brother,
For head with foot hath private amity,
And both with moons and tides

Nothing hath got so far
But man hath caught and kept it as his prey ;
His eyes dismount the highest star ;
He is in little all the sphere
Herbs gladly cure our flesh, because that they
Find their acquaintance there

Put these stanzas into your own words, carefully following
the thought in the original, and omitting no idea expressed
there   Briefly explain the central idea.

II   From harmony, from heavenly harmony
This universal frame began ;
When Nature underneath a heap
Of jarring atoms lay,
And could not heave her head,
The tuneful voice was heard from high,
Arise, ye more than dead.

Then cold and hot and moist and dry
In order to their stations leap
And Music's power obey
From harmony, from heavenly harmony,
This universal frame began ;
From harmony to harmony
Through all the compass of the notes it ran,
The diapason closing full in Man

Express briefly in your own words the meaning of these
stanzas   Carefully explain the three lines in **thick type** and
examine in detail the figure used in them.

III.   First, what is true ambition ? The pursuit
        Of glory nothing less than man can share.
        . . . .
        The Visible and Present are for brutes,
        A slender portion and a narrow bound !
        These Reason, with an energy divine
        O'erleaps and claims the Future and Unseen ;
        The vast Unseen, the Future fathomless !
        When the great soul buoys up to this high point,
        Leaving gross Nature's sediments below,
        Then, and then only, Adam's offspring quits,
        The sage and hero of the fields and woods,
        Asserts his rank, and rises into man.

Put this passage into your own words, carefully following the thought in the original. Briefly explain the general meaning.

IV.   What is done wisely is done well. Be bold
        As thou art just. 'Tis like a truant child
        To fear that others know what thou hast done,
        Even from thine own strong consciousness ; and thus
        Write on unsteady eyes and altered cheeks
        All thou wouldst hide. Be faithful to thyself,
        And fear no other witness but thy fear.
        For, if, as cannot be, some circumstance
        Should rise in accusation, we can blind
        Suspicion with such cheap astonishment
        Or overbear it with such guiltless pride,
        As murderers cannot feign. The deed is done,
        And what may follow now regards not me.

Express the several ideas of this passage in your own words.

V.   Men of nice honour, without one grain of common honesty (for such there are), are wonderfully combustible. The honourable is to support and protect the dishonest part of their character. The consciousness of their guilt makes them both sore and jealous.

Explain this passage Express the phrase in **thick type** in
your own words, and comment on the paradox which it contains

VI Man is a being of high aspirations, "looking both before
and after," whose "thoughts wander through eternity," dis
claiming alliance with transience and decay, incapable of im

" He was dressed in a long dark robe of purple silk, with, I
think, some gold embroidery work on it , his head was uncover-
ed save by his own curly, but now somewhat grizzled, hair,
which he wore rather longer than was usual with Abyssinians,
and not plaited in rows according to the general custom   His
complexion was darker than that of most men of the Tigré
mountains, being of a rich chocolate colour , but whatever he

colour, the owner of that powerful, cruel, and intelligent face would be bound to make his name known in any country either as a leader or as a destroyer of men. Attention was riveted to one striking peculiarity—a pair of gleaming tawny eyes of a much lighter colour than the skin of the face. To these flashing yellow orbs, whose effect was aided by a brilliant row of white regular teeth, was no doubt due much of the terror with which Ras Alula was generally regarded. I had seen such eyes in the head of a tiger and of a leopard, but never in that of a human being." Another writer more prosaically describes him as "5ft. 9in. in height, well built, broad-shouldered, deep-chested, muscular, and an athlete." He was copper-coloured, more like some of the races of the Sudan than of Abyssinia, and one thing peculiar about him was that he was a monogamist.

That mode, which prevailed in Europe, of the knights of
hostile armies challenging one another to single combat, during
a truce, was very common in the East. I shall give one remark-
able instance. The gallant Sultan Jalaluddin, whose father
Mohammad, king of Kharazm, was driven from his dominions
by Changiz Khan, having afterwards recovered part of his
kingdom, marched about the year 1228 against the Georgians :
when a truce having been agreed upon, in order to adjust, if
possible, terms of accommodation, the great men of both armies
sent mutual defiances, and many combats were fought. Jalal-
uddin disguising himself like a private knight, entered the lists
when a well-mounted Georgian appeared against him, but, at
the first career, he unhorsed him, and successively three of his
sons who wished to retrieve the family honour. A champion of
uncommon size then approached. He was surnamed Pil-afgan

his blows fell with such force and rapidity, that Jalálud hín, apprehensive lest his horse should fly off, or sink under him, sprung to the ground, and aimed his lance with such address, that he pierced the Georgian's forehead, and extended him lifeless on the ground.

HISTORY

First Paper.

M PROTHERO, ESQ., M.A.   *Examiner*

1 What are the special characteristics of the Ricardian school of Political Economy, and what are the obligations under which the science lies to German writers?

Mention some peculiarities of the modern school of thought in Political Economy

2 To what doctrine of Adam Smith have the Germans given the name of "*Smithianismus*"? Explain Adam Smith's theory of the "natural organisation of industry"

3 In what sense can the term Law be applied to a Law of Economics? What is meant by saying that "Economics is a Hypothetical Science"?

4 State the Law of Diminishing Return and Carey's argument against it

5 How far is it true that "Rent does not enter into the cost of production"? What is Quasi Rent, and upon what does the Quasi Rent of a business depend?

6 What is a market?

Distinguish Short-period Normal Supply Price from Long period Normal Supply Price

7 Explain the Law of Substitution, and show how it tends to apportion earnings to efficiency between Trades

8 Discuss the economic effect of a law establishing an Eight Hours Working Day

9 How does Bagehot account for the unpopularity of English Political Economy

10 Prove that the statement, that labour and capital circulate readily, leaving the less and resorting to the more profitable employments, does not apply to "the pre economic eras."

Second Paper.

M. Prothero, Esq., M.A.   ..   .., *Examiner.*

1. " Democracy is a form of Government." Explain the importance of this principal, and shew that Democracy is one of the most difficult forms of Government. Discuss the influence upon it of Representation, Party and Corruption.

2. What did the Romans understand by Nature, the Law of Nature, and Natural Right? How did these conceptions influence Rousseau? Give some account of Rousseau's political theories.

3. Point out how the idea of Law differs in ancient and modern times. Why is it so important to a nation at what stage of its history its Customary Law is first reduced to a Code? Enumerate and explain the operation of the agencies by which Law is brought into harmony with the requirements of Society.

4. Trace the early history of Wills, pointing out,

    (*a*) Their object in early Roman Law.

    (*b*) The difference between

        (i) Ancient and Modern Wills.

        (ii) the Patrician and Plebeian forms of Will.

    (*c*) How the early form of Will was modified by the Prætorian Edict and the Jurisconsults.

5. Sketch the growth of Primogeniture.

6. How does Mill prove the importance of Originality to Society? How does Society endeavour to check Originality? Why does Mill object to State Education?

7. " Mill confounds the proposition that variety is good with the proposition that goodness is various." Explain this.

8   Show the incompatibility with all Government of that principle that no coercion, except what is self protective, is justifiable. In what particulars does the British Government in India act contrary to this principle

9   Distinguish Rights in rem from Rights in personam and classify Rights in rem.

10   What are the requisites of ownership? How is it acquired, and how is it affected by Usurpation or Prescription?

THIRD PAPER.

J G JENNINGS, Esq, M A .   Examiner

(Only 7 of the following questions should be answered, the questions (1, 7, 10, 12) marked with an asterisk must be attempted)

*1   Give an account of the Second Macedonian War, and examine the policy of the Romans towards Greece at this period Illustrate your answer by means of a map

2   Give an account of the circumstances which led to the acquirement of Sicily by Rome, and describe the system of government under which it was placed as a Roman province

3   Sketch the lives of Tiberius and Caius Gracchus, giving some account of the political condition of the Roman commonalty and of the Italians in their time

4   Examine the nature of the Roman imperial sovereignty in the times of Augustus, Vespasian, and Diocletian severally, and account for the changes effected

5   Trace the Teutonic origins of Feudalism and in this connexion concisely explain the chief changes introduced among the Franks by their settlement in Gaul

6   Give an account of the events which substituted the Carlovingians for the Merovingians as Frankish kings, and concisely explain the character of the revolution.

*7. Describe the events which led to the coronation of Charles the Great as Emperor; and explain the relations of Emperor and Pope during his reign. Illustrate the first part of your answer by means of a map.

8. Explain the composition and the powers of the Frankish National Assembly under Charles the Great.

9. Examine the effects of the Norman conquest upon Feudalism in England.

*10. Describe the circumstances in which the Parliaments of 1265 and 1295 were respectively called; and discuss the claims of each to be considered the first complete English Parliament.

11. Give an account of the events which led to the Spanish Succession War, and briefly trace the course of the war.

*12. Examine the foreign policy of the elder Pitt.

FOURTH PAPER.

J. G. JENNINGS, ESQ., M.A. .. .. *Examiner.*

(*Only 7 of the following questions should be answered; the questions (2. 3. 6, 7) marked with an asterisk must be attempted.*)

1. Concisely recount the events which established the Ghorian dynasty in Hindustan, and describe the political condition of the Hindu states north of the Nerbudda at the time.

*2. Give a short account of the reign of Sher Shah, and describe his internal policy.

*3. Recount briefly the events which brought about the fall of the Bahmini kingdom in the Deccan, and the rise of the smaller kingdoms that issued from it. Illustrate your answer by means of a map.

4. Describe briefly the events which led to the subjugation, complete or partial, of Ahmednugur, Beejapore, and Golconda by Shah Jehan, explaining the inter-relations of these states, the Mahrattas, and the Emperor at the time.

5 Recount the chief events in the life of Raghoonath Rao and examine his policy.

*6 Carefully explain the inter-relations of the several Mahratta chiefs at the time of the Treaty of Salbye. Illustrate your answer by means of a map.

*7 Give an account of the changes effected by Warren Hastings in the administration of justice in Bengal.

8 Explain the relations of the Emperor, the Vizier of Oudh, the Mahrattas, and Hafiz Rahmat Khan on the eve of the Hastings Rohilla War.

9 Carefully review the changing relations of the Mahrattas with Mysore under Hyder Ali.

10 Describe the Bengal land revenue system at the time of Hastings' appointment as Governor, and give an account of the changes effected by him in that system.

MATHEMATICS

First Paper.

(Algebra, Trigonometry and Theory of Equations.)

T C LEWIS, ESQ., M.A.   *Examiner*

1 Find the condition that the 3 roots of the equation

$$ax^3 + bx^2 + cx + d = 0 \text{ may be in A P}$$

If x_1, x_2, x_3 be the 3 roots of this equation in A P prove

that $x_1 + \dfrac{d^2}{ac x_1{}^2}$, $x_2 + \dfrac{d^2}{ac x_2{}^2}$, $x_3 + \dfrac{d^2}{ac x_3{}^2}$ are also in A P

2 Solve the equations

$$ (x^2 - y^2 + 2 = 2(x^2 + y_2^1 - 1) $$
$$ 2(x^2 + y^2 + 1) = 14 x y_2^1 - 1) $$

Note.— The first of these equations gives by factors two alternative equations of the second degree

3. Find the whole number of combinations that can be formed of n different things.

Every one of n circles in a plane cuts every other, and no three intersect in a point. Prove that they divide the plane into $n^2 - n + 2$ parts.

4. Show that $\lfloor p - 1 + 1$ is divisible by p, if p is a prime number but not otherwise.

Every prime number of the form $4n + 1$ is expressible as the sum of two squares.

5. Find the radius of the circle touching the side BC, and the sides AB, AC produced of the traingle ABC.

If O be the centre of this circle, prove that

$$a.AO^2 - b.BO^2 - c.CO^2 = abc.$$

6 Sum the series

(1) $\sin a + \sin (a + \beta) + \sin (a + 2\delta) + \ldots + \sin (a + n\beta)$

(11) $\cos \theta + \dfrac{\cos 2\theta}{1 \cdot 2} + \dfrac{\cos 3\theta}{1 \cdot 2 \cdot 3} + \&c.\ ad\ inf.$

and express in a single term the coefficient of x^n in the expansion of $e_x \sin x$ in ascending powers of x.

7. Find the expansion of $\tan x$ in ascending powers of x as far as the term involving x^5.

Show that if x be very small, the expression

$x - \dfrac{4}{15} \sin x + \dfrac{1}{15} \tan x - \dfrac{8}{5} \tan \tfrac{1}{2} x$ is at least of the seventh order.

8. Give a sketch of the method of proving that

$$\cos x = \left(1 - \frac{2^2 x^2}{\pi^2}\right)\left(1 - \frac{2^2 x^2}{3^2 \pi^2}\right)\left(1 - \frac{2^2 x^2}{5^2 \pi^2}\right)\ldots\ldots$$

and deduce from this identity that

$$1 + \frac{1}{9} + \frac{1}{25} + \frac{1}{49} + \&c.\ ad\ inf. = \tfrac{1}{8}\pi^2.$$

9. If each negative coefficient of a rational algebraic equation be taken positively and divided by the sum of all the positive coefficients which precede it, prove that the greatest of the fractions thus formed, increased by unity, is a superior limit of the positive roots.

Show how to find inferior limits to the positive roots, and also superior and inferior limits to the negative roots.

10. Find all the commensurable roots of the equation.

$$3x^6 - 22x^5 - 29x^4 + 34x^3 - 40x^2 + 12x - 84 = 0$$

11. Explain, in general terms, Horner's method of approximating to a root of an algebraic equation

In finding an odd root of a number by this method, show that the first application of the trial divisor gives too large a result. Employ the method to find the cube root of 67 to three places of decimals.

12. State a rule for the expression of a determinant in terms of its minors.

Calculate the value of
$$\begin{vmatrix} 1 & 1 & 1 & 1 & 1 \\ 1 & 2 & 3 & 4 & 5 \\ 1 & 3 & 6 & 10 & 15 \\ 1 & 4 & 10 & 20 & 35 \\ 1 & 5 & 15 & 35 & 70 \end{vmatrix},$$

and solve the equation
$$\begin{vmatrix} x & a & b & c \\ a & x & c & b \\ b & c & x & a \\ c & b & a & x \end{vmatrix} = 0.$$

SECOND PAPER.

(Differential and Integral Calculus, and Differential Equations.)

T C. LEWIS, ESQ., M.A.   ..   ..   *Examiner.*

1. Enunciate and prove Leibnitz's Theorem.

If $u = \sin^{-1} x \log\left(x + \sqrt{x^2 - 1}\right)$, find the value of $\dfrac{d^5 u}{dx^5}$ when $x = 0$.

2. Change the independent variables from x, y to r, θ in the equation,

$$\frac{d^2 \phi}{dx^2} + \frac{d^2 \phi}{dy^2} = 0,$$

where $r = (x^2 + y^2)^{\frac{1}{2m}}, \quad m\theta = \tan^{-1} \dfrac{y}{x}.$

3. Define the terms *maxima* and *minima*.

Prove that $\phi \left\{ f(x) \right\}$ is necessarily a maximum or minimum when $f(x)$ is a maximum or minimum.

Given the whole surface of a cone, including its base, find its height and vertical angle when it has a maximum volume.

4. Show how to distinguish between a cusp and a common multiple point.

Trace the curves

(i) $(x^2 - a^2)^2 = ay^2(3a + 2y)$,

(ii) $y^4 - x^4 + 2bx^2 y = 0$.

5. Find an expression for the radius of curvature at any point of a curve whose equation does not give one of the variables explicitly as a function of the other.

At every point of a curve a constant length a is measured along the tangent. Show that the radius of curvature ρ' of the curve so obtained is given in terms of ρ, that of the original curve at the corresponding point, by the equation

$$\frac{1}{\rho'} = \left(1 + a\frac{d}{ds}\right)\frac{1}{\sqrt{a^2 + \rho^2}}.$$

6　Reduce the following to rational algebraical differentials

$$\frac{dx}{\sqrt{a^2+x^2}} \qquad \frac{dx}{\sqrt{(x-a)(x-b)}} \qquad \frac{\cos\theta\,d\theta}{a+b\cos\theta+c\cos^2\theta}$$

and integrate

$$\int \frac{x^2+x+1}{(x+1)\sqrt{(x^2-1)}}dx, \qquad \int \frac{d\theta}{(a\cos\theta+b\sin\theta)^2}$$

7　Find an expression for the area of a surface whose equation is given

Show that the area of that part of the sphere $r=1$, enclosed by the cone $\tan\dfrac{\theta}{2} = \sqrt{3}\cos\phi$, is π

8　Prove that the volume of any closed surface can be expressed in the form $\frac{1}{3}\iint (lx+my+nz)dS$, when x, y, z are the co-ordinates of any point of the surface, and l, m, n the direction cosines of the normal there.

Apply this to the ellipsoid.

9　Prove that

$$\int_0^\infty \frac{\cos rx}{1+x^2}dx = \frac{\pi}{2}e^{-r}$$

$$\int_0^\infty \frac{\sin rx}{x}dx = \frac{\pi}{2}$$

If a and b are both positive, then

$$\int_0^\infty \frac{e^{-bt}}{a^2+x^2}dx = \int_b^\infty \frac{\sin a(x-b)}{ax}dx$$

10　Integrate

$$y\left\{ \sqrt{x^2+y^2}-x(1+y)\right\}dx + x\cdot(1+x)dy = 0$$

$$x\,dy + 2\,y\,dy\,dx + x\,dx^2 = 0$$

Find the singular solution of the latter equation and discuss its nature

11.　Show how to integrate the general linear differential equation with constant coefficients.

Integrate

$$\frac{d^2y}{dx^2}+2\frac{dy}{dx}+3y=e^x\ (\sin 2x+4\cos 2x)$$

$$\frac{d^3y}{dx^3}-\frac{d^2y}{dx^2}-8\frac{dy}{dx}+12y=e^x\ (4x-7).$$

12.　Explain how to solve the equation

$$P\frac{dz}{dx}+Q\frac{dz}{dy}=R,$$

where P, Q, R are known functions of x, y and z.

Integrate　　$(x+z)\frac{dz}{dx}+(y+z)\frac{dz}{dy}=x+y.$

THIRD PAPER.
(*Analytical Plane and Solid Geometry.*)

T. C. Lewis, Esq., M.A.　　　　..　　　　..　*Examiner.*

1.　Find the length of the perpendicular drawn from a given point to the line whose equation is $Ax+By+C=0$, the co-ordinates being oblique ; and explain the double sign which appears in the result.

Show that the equation to the straight line which bisects the angles between the two lines $ax^2+2bxy+cy^2=0$ is

$$(a\cos\omega+b)x^2+(c-a)xy-(b+c\cos\omega)y^2=0,$$

where ω is the angle between the axes.

2.　Show that three normals can be drawn from any point to a parabola, and distinguish between the positions for which all three normals are real, and those where only one is real.

A circle is drawn through the feet of the normals from (x,y), if (f, g) be the centre of this circle, show that

$$2f - e = 2a \quad 2 = 4y$$

2   Given the general equation to a conic, determine its area in terms of the coefficients of the equation

An ellipse is described so as to touch the sides of a trapezium, two of whose sides are parallel   Show that when the area of the ellipse is a maximum the centre of the ellipse bisects the line joining the middle points of the parallel sides of the trapezium

4   If any two triangles be such that the lines joining corresponding angles meet in a point, then the intersections of corresponding sides lie on a straight line

Show that any two homologous triangles are polar reciprocals with respect to some conic S, that the hexagon formed by their sides is inscriptible in another conic S', and that the four inter sections of S and S', and the vertices of either triangle lie on a conic

5   Two triangles are either circumscribed about or self con jugate to a conic, show that their six vertices lie on a conic

If three triangles are circumscribed about the same conic the three conics which pass each through the vertices of two triangles intersect in the same point

6   Find the envelope of two straight lines whose direction cosines are given by the equations

$$lx + \beta m + \gamma n = 0, \quad a\lambda^2 + b\mu^2 + c\nu^2 + 2\int \mu\nu + 2\beta \nu\lambda + 2c \ \lambda\mu = 0$$

may be at right angles to one another

Find the envelope of all planes drawn through a fixed point (f, g, h) which intersect the quadric $4x^2 + 2Dx + \ldots = 0$ in rectangular hyperbolas.

7. Find the equation of the tangent plane and the equations of the normal at any point of the quadric

$$\frac{x^2}{a^2}+\frac{y^2}{b^2}+\frac{z^2}{c^2}=1$$

and show that all the normals which pass through a fixed point lie on a quadric cone.

8. Find the ratio in which the straight line joining two given points is cut by the quadric $U=0$, and deduce the equations of the tangent cone whose vertex is a given point, and the polar plane of a given point.

9. Show how to find the directions of the rectilinear generators which pass through a given point on the surface of a quadric.

Any point on the surface of a hyperboloid of one sheet is defined by the intercepts α, β, which the generators through it cut off on the generators through a fixed point. Show that the equation to the section of the hyperboloid made by any plane through the fixed point will be of the form

$$\frac{f}{\alpha}+\frac{g}{\beta}+h=0.$$

10. Define the terms *lines of curvature*, *geodesic* on a surface, and show that the lines of curvature through any point are at right angles to one another.

FOURTH PAPER.

(Statics and Dynamics.)

W. N. BOUTFLOWER, ESQ., B.A.   .. *Examiner.*

1. Show that if a rigid body be acted on by any forces, these forces can be reduced to a single force and a couple whose plane is perpendicular to the direction of the force.

A circle is drawn through the feet of the normals from (x, y), if (f, g) be the centre of this circle, show that

$$2f - a = 2x \quad g = 2y$$

3   Given the general equation to a conic, determine its area in terms of the coefficients of the equation

An ellipse is described so as to touch the sides of a trapezium two of whose sides are parallel. Show that when the area of the ellipse is a maximum the centre of the ellipse bisects the line joining the middle points of the parallel sides of the trapezium

4   If any two triangles be such that the lines joining corresponding angles meet in a point, then the intersections of corresponding sides lie on a straight line

Show that any two homologous triangles are polar reciprocals with respect to some conic S, that the hexagon formed by their sides is inscriptible in another conic S', and that the four intersections of S and S, and the vertices of either triangle lie on a conic

5   Two triangles are either circumscribed about or self conjugate to a conic, show that their six vertices lie on a conic

If three triangles are circumscribed about the same conic, the three conics which pass each through the vertices of two triangles intersect in the same point

6   Find the condition that two straight lines whose direction cosines are given by the equations

$$l + B \mu + C \nu = 0, \quad a l^2 + b \mu^2 + c \nu^2 + 2 f \mu \nu + 2 h l + 2 c \lambda \mu = 0$$

may be at right angles to one another.

Find the envelope of all planes drawn through a fixed point (f, g, h) which intersect the quadric $Ax^2 + \ldots + 2Dx + \ldots = 0$ in rectangular hyperbolas

7.   Find the equation of the tangent plane and the equations of the normal at any point of the quadric

$$\frac{x^2}{a^2}+\frac{y^2}{b^2}+\frac{z^2}{c^2}=1$$

and show that all the normals which pass through a fixed point lie on a quadric cone.

8.   Find the ratio in which the straight line joining two given points is cut by the quadric $U=0$, and deduce the equations of the tangent cone whose vertex is a given point, and the polar plane of a given point.

9.   Show how to find the directions of the rectilinear generators which pass through a given point on the surface of a quadric.

Any point on the surface of a hyperboloid of one sheet is defined by the intercepts α, β, which the generators through it cut off on the generators through a fixed point. Show that the equation to the section of the hyperboloid made by any plane through the fixed point will be of the form

$$\frac{f}{\alpha}+\frac{g}{\beta}+h=0.$$

10.   Define the terms *lines of curvature, geodesic* on a surface, and show that the lines of curvature through any point are at right angles to one another.

FOURTH PAPER.

(Statics and Dynamics.)

W. N. BOUTFLOWER, ESQ., B.A.   .. *Examiner.*

1.   Show that if a rigid body be acted on by any forces, these forces can be reduced to a single force and a couple whose plane is perpendicular to the direction of the force.

A rigid body is acted on by three equal forces who are lines of action are the axis of x and the lines whose equations are $x = a$, $y = a$ and $x = a$, $y = a$, the latter forces acting towards the positive direction of the axis of z find the equations of the central axis of the system.

1. A heavy uniform rod rests on a rough horizontal table and all the elements are equally supported by the table, find the least horizontal force which when applied perpendicularly to one end of the rod will stir it.

3. A piece of uniform string has its two ends fastened to two fixed points and is at rest under the action of a force directed to another fixed point, investigate the differential equation in r and θ which determines the form assumed by the string

A piece of uniform string on a smooth horizontal plane passes round two smooth vertical pegs fixed to the plane, and is at rest in the form of a rectangular hyperbola under the action of a force at the centre of the curve, find the law of the force

4. If V denote the potential of an attracting mass, prove that at an internal point (x, y, z) about which the density is ρ the function V satisfies the equation $\dfrac{d^2 V}{dx^2} + \dfrac{d^2 V}{dy^2} + \dfrac{d^2 V}{dz^2} + 4\pi\rho = 0$

5. Integrate the equation $\dfrac{d^2 x}{dt^2} + \kappa x = 0$.

Assuming that the equation to a cycloid whose plane is vertical and vertex downward is $s = a \sin \psi$, prove that the time of descent of a particle from rest from any point of the curve to the lowest point is always the same.

6. A particle is describing a curve under the action of a central force F, if u and θ be its co-ordinates at any time, prove that its path is determined by the equation $F = h^2 u^2 \left(\dfrac{d^2 u}{d\theta^2} + u \right)$

If the law of the force be $F = \mu u^3$, obtain the equation giving the apsidal distances.

7. Investigate the motion of a particle constrained to move on a surface of revolution whose axis is vertical under the action of gravity only ; and show that the projection of the particle on a horizontal plane describes equal areas in equal times about the point in which the axis of revolution meets the plane.

8. Enunciate and explain D'Alembert's Principle.

Show that the motion of a free system of particles relative to its centre of inertia is the same as if this point were fixed in space, the applied forces being unaltered as regards magnitude, direction and point of application.

9. Find the moment of inertia of a sphere about an axis which touches its surface.

Three perfectly rough, equal and uniform spheres rest in contact with each other on a perfectly rough horizontal plane. A fourth sphere of equal radius and density is placed gently so as to rest upon them. If motion be then allowed to take place, find the position of the upper sphere at the instant when the other spheres separate from it.

W. N. BOUTFLOWER, ESQ., B.A.   ..   .. *Examiner.*

1. Investigate the general differential equation for determining the pressure at any point of a fluid at rest ; and when a given quantity of elastic fluid is contained in a vessel and is at rest under the action of given forces, show how the constant introduced by integration is to be determined.

2. A cone whose vertical angle is $2a$ and density ρ floats with its axis vertical in a fluid whose density varies as its depth ; if σ be the density of the fluid at a depth equal to the height of the cone, and the equilibrium be stable, prove that

$$\cos^2 a < \frac{4}{5} \sqrt{\frac{4\rho}{\sigma}}$$

3   A right cone with a perfectly flexible curved surface and a rigid horizontal circular base is filled with fluid which rotates with a given angular velocity, find the tension perpendicular to the meridian at any point, and the force tending to detach the conical surface from the base

4   Obtain an equation for the steady motion of liquids in the form

$$p + r\frac{v^2}{2} = C - V$$

where p is the pressure, v the velocity, ρ the density, V the potential energy per unit of volume, and C a constant for the same stream line

5   Investigate an expression for the deviation of a ray of light refracted through a prism in a principal plane and show that it is least when the ray passes symmetrically through the prism

Two prisms of equal refracting angles are placed with one face of each in contact and their other faces parallel, and a ray passes through the combination in a principal plane, prove that the deviation will be from the edge of the denser prism

6   Prove that if a small oblique pencil is reflected at a spherical surface of radius r the distance v of its primary focus from the surface is given by the equation

$$\frac{1}{v} + \frac{1}{u} = \frac{2}{r\cos\phi}$$

where ϕ is the angle of incidence and u the distance from the surface of the origin of the pencil

7   Describe the Astronomical telescope and explain the advantages of Ramsden's eye piece

Draw the course of a pencil of rays from a very distant object through such a telescope, the distance between the lenses of the eye piece being $\frac{2}{3}$ of the focal length of either, and the emergent rays falling on the retina of the eye in parallel lines, and explain your diagram

8. Describe the transit-circle.

What observation would you make in order to determine the right ascension of a heavenly body assuming the instrument to be in proper adjustment? How would you detect an error in collimation?

9. Define a sidereal, a solar, and a mean solar day, and explain from what causes their lengths differ?

Assuming the length of a sidereal year to be 365 days, 6 hrs. 9 min. 10·7 secs. in mean solar time; find approximately the difference between a sidereal and a mean solar day.

10. Obtain equations for the determination of the right ascension and declination of a star in terms of its latitude, its longitude, and the obliquity of the ecliptic.

If the change due to precession in the declination of a given star in a time of given length be a maximum, prove that the star's right ascension at the end of the time is unchanged in magnitude but of opposite sign.

11. Explain what is meant by the aberration of a star and show that the effect of aberration will be to make the stars when referred to the celestial sphere describe small ellipses about their true places.

In the case of a planet show how to find the effect of aberration upon its proper position, and state whether the aberration of a planet ever vanishes.

1. How would you test the unison of two tuning forks by Lissajou's figures? Describe the arrangement of your apparatus and say what you would see in the case of two tuning forks whose frequencies are 256 and 256·25.

3 A right cone with a perfectly flexible curved surface and
a rigid horizontal circular base is filled with fluid which rotates
with a given angular velocity, find the tension perpendicular
to the meridian at any point and the force tending to detach
the conical surface from the base

4 Obtain an equation for the steady motion of liquids in the
form

$$p + r\frac{v^2}{2} = C - V$$

where p is the pressure, v the velocity, ρ the density, V the
potential energy per unit of volume, and C a constant for the
same stream line

5 Investigate an expression for the deviation of a ray of
light refracted through a prism in a principal plane and show
that it is least when the ray passes symmetrically through the
prism

Two prisms of equal refracting angles are placed with one
face of each in contact and their other faces parallel, and a ray
passes through the combination in a principal plane, prove that
the deviation will be from the edge of the denser prism.

6 Prove that if a small oblique pencil is reflected at a spheri-
cal surface of radius r the distance v of its primary focus from
the surface is given by the equation

$$\frac{2}{v} + \frac{1}{u} = \frac{2}{r \cos \phi}$$

where ϕ is the angle of incidence and u the distance from the
surface at the origin of the pencil.

7 Describe the Astronomical telescope and explain the
advantages of Ramsden's eye piece.

FIRST PAPER.

A. W. WARD, Esq., M.A.   ..   .. *Examiner.*

1. How would you test the unison of two tuning forks by Lissajou's figures? Describe the arrangement of your apparatus and say what you would see in the case of two tuning forks whose frequencies are 256 and 256·25.

2 A wave of sound $s = a \cos \frac{2\pi}{\lambda}(et + x)$, is reflected by the plane of yz, find the positions of the maximum and minimum variations of density

If the sound were inaudible how could you determine its wave length ?

3 In the case of a sound wave establish the equation,

$$\frac{d^2 y}{dt^2} = a^2 \frac{d^2 y}{dx^2}$$

Interpret the general solution,

$$y = F(x - at) + f(x + at)$$

and explain why the simpler form,

$$y = e \cos \frac{2\pi}{\lambda}(at - x)$$

is sufficient for most purposes

4 Give an account of Tyndall's experiments on the conversion of radiant heat into sound

5 A small pencil of light is refracted obliquely at a spherical surface of radius R, if r_1, r_2 be the distances of the source and the focal lines from the refracting surface, i and r the angles of incidence and refraction, prove that

$$\frac{\mu \cos^2 r}{r_1} + \frac{\cos^2 i}{r} = \frac{\mu \cos r - \cos i}{R}$$

$$= \frac{\mu}{r_2} - \frac{1}{r}$$

6 Account for the phenomenon known as the loss of the half undulation

Calculate the intensity of a plane wave of light reflected from a thin plate, and the position of the bands

7 Calculate the thickness of a quarter wave plate of quartz, given that the refractive indices are 1 544 and 1 553   Take λ as 5900 tenth metres

How would you produce a plane wave of elliptically polarised light in which the ratio of the axes should be $1 : \sqrt{3}$?

8   Explain Huygen's principal and employ it to account for the rectilinear propagation of light.

9.   Give Stokes' explanation of fluorescence and explain how by means of fluorescent solutions, the ultra violet spectrum can be examined.

How is fluorescence connected with absorption and how is the latter connected with anomalous dispersion?

10.   Write a short essay on the relation between light and magnetism, and give a brief account of the electromagnetic theory pointing out any matters of dispute in the undulatory theory of light which have now been settled.

Second Paper.

A. W. Ward, Esq., m.a.   ..   ..   *Examiner.*

1.   Define a simple shear and prove that if k be the resistance to compression and n the rigidity, then Young's modulus for the stretching of a rod by appended weights is $\dfrac{9kn}{3k+n}$.

Upon what coefficients do the speeds of propagation of light waves, sound waves, and extension waves depend?

2.   Prove that the attraction of a homogeneous solid sphere of mass M on an external point distant r from the centre is $\dfrac{M}{r^2}$

What unit of force is employed in this statement, and how has it been determined in terms of commoner units?

3.   Describe Joule's method of accurately determining the temperature of the air.

4.   Investigate a formula for the steady flow of heat through a long bar heated steadily at one end. If θ be the temperature at a distance x from the hot end, show that $\dfrac{d^2\theta}{dx^2}=\mu^2\theta$

where μ is a constant for the rod.

Hence show that, if in Ingenhausz's experiment wax be melt- ed off to distances l_1, l_2, l_3 of the various rods, then

$$\frac{k_1}{l_1^2} = \frac{k_2}{l_2^2} = \frac{k_3}{l_3^2} =$$

where k is the coefficient of conduction, and all the rods have the same cross section, perimeter, and coefficient of emission

5   How would you experimentally show —

(a)   The interference of two rays of radiant heat

(b)   That thin plates of tourmaline give out the same rays when hot that they absorb when cold.

(c)   The existence of dark lines at the ultra red end of the solar spectrum

6   Explain clearly the term available energy   If a system consist of a number of bodies at different pressures and temper atures contained within a vessel from which neither matter nor heat can escape, explain by what process of reduction to thermal and mechanical equilibrium the greatest amount of energy can be converted into work

7   If L be the latent heat of expansion, prove that

$$L = (v_1 - v_0)\frac{p^2 dp}{d\theta}$$

Calculate the latent heat of steam from the following data

Volume of 1 gram of steam at 100° C and 760 mm = 1651c cms,

,,   ,,   ,,   water ,,   ,,   ,,   ,, = 1   ,,

Tension of aqueous vapour at 100° is 78·2 73mm.

Density of Hg=13 6, J=4 175×10²

(Numerical reductions need not be made, but the result should be left in a form suitable for logarithmic computation)

8. Prove by any method the first thermodynamic relation,

$$\frac{dv}{d\vartheta} (p \text{ const.}) = \frac{d\phi}{dp} (\vartheta \text{ const.})$$

and interpret the result.

9. Find the relation between the volume and pressure when a gas is allowed to expand adiabatically, and describe any experimental method of determining the ratio of the specific heats.

10. Deduce Dulong and Petit's law from the Kinetic theory of gases.

In a monatomic gas the energy of a molecule is entirely translational, find the ratio of the specific heats. Mention any well known monatomic gases.

THIRD PAPER.

J. MURRAY, ESQ., M.A.   ..   ..   *Examiner.*

(N.B.—*No more than eight questions need be attempted.*)

1. Find an expression for the energy of an Electric distribution in terms of the charges and potentials of the various conductors in the field. Show that this energy may be considered as residing in the dielectric medium and explain how it is distributed.

2. Find the induced electric distribution when a small charged body is placed near (*a*) an infinite plane, (*b*) a sphere, both sphere and plane being connected with the earth.

3. Distinguish between the magnetic susceptibility and the magnetic permeability of a substance. Describe experiments which shew that the value of the latter under given conditions depends, in general, on *previous* values of the magnetizing field, as well as on its value at the given instant. Especially consider the case of soft iron.

4. Find the energy of a magnetic shell, in a magnetic field. Deduce an expression for the mechanical force tending to move

the shell in any specified manner. How would you verify that the magnetic action of any electric circuit is identical with that of a magnetic shell, of a particular strength, bounded by the electric circuit?

5   Define the E. M. F acting round an electric circuit. Shew that the E. M. F acting round a circuit containing a galvanic battery can be calculated from thermo-chemical data, particularly considering the case of Clark's standard cell.

6   State Ampère's law for finding the magnetic action of an element of a current on a magnetic pole. Thence calculate the galvanometer constant of a tangent galvanometer whose coil has a rectangular section.

7   Shew how the currents in each of a connected system of conductors of known resistances containing known E. M. F's may be calculated. Determine the current in the galvanometer when the battery is placed in one of the proportional arms of a Wheatstone's Bridge.

8   Describe the ballistic galvanometer. Shew (with mathematical details) how to use it to determine the time integral of a transient current.

9   (a) Describe Kelvin's Ampère balance.

(b) Explain Carey Foster's method of calibrating the wire in a slide-wire bridge.

10.   Shew generally how the coefficient of self induction of a coil may be calculated if its dimensions are known. What is a *Henry* ? Describe a method of comparing the coefficients of self induction of two coils

11   Define (a) the activity, (b) the mean current of an alternating dynamo. Prove that the *true* mean current is very approximately nine-tenths of the current indicated by a dynamometer included in the circuit. Shew that this relation holds whether the self induction of the circuit is negligable or not

12.   Give some account of Hertz's experiments on the properties of Electric Waves.

PRACTICAL.

First Paper.

J. MURRAY, ESQ., M.A. .. .. *Examiner.*

1. Determine experimentally the relation between the period of oscillation of the given simple pendulum and its length. Plot your results.

2. (*a*) Determine the sensibility curve of the given balance.

   (*b*) Find the radius of the given wire.

3. Find the rate of loss of weight with fall in temperature of the given vessel of water.

Second Paper.

(*N.B.—Two* experiments to be selected.)

1. Given the wave length of sodium light to be 5890 tenth metres, find the wave lengths of all the lines visible in the given apparatus.

2. Compare the frequencies of the given forks.

3. Find in C. G. S. units the strengths of the given magnetic fields.

Third Paper.

1. Find how the resistance of the given wire varies with the temperature.

2. Assuming the electro-chemical equivalent of copper, find H.

First Paper.

A. PEDLER, ESQ., M.A... .. .. *Examiner.*

1. Discuss the various methods which have been and are at present used in determining the molecular weights of compounds and the atomic weights of elementary bodies. Indicate the degree of reliance which can be placed on each method,

2 How would you apply the general methods described in the answer to the previous question to the determination of the molecular weights of Sulphur trioxide, Sulphur dioxide, Phosphorus chloride and Potassic chloride, and of the atomic weights of Nitrogen, Iodine, Mercury and Silicon?

3 Describe briefly the manner in which the theory of quantivalence or atomicity was developed, and indicate its principal features and cases   What are its limitations?

4 What do you understand by the term chemical affinity? Indicate the nature of the attempts which have been made to measure it, showing how our views have gradually changed with reference to this subject

5 Discuss briefly the nature of the following phenomena Allotropy, Isomerism, Isomorphism, Substitution, Combination by addition, Exothermic reactions and Endothermic reactions

6 State clearly our present views with reference to the nature of solutions, and indicate the workers to whom our knowledge is due.

7 Explain clearly what is meant by "electrolytic dissociation," and support the theory by as many facts as you can. What are the principal characteristics and laws of electrolytic dissociation, and contrast it with ordinary dissociation?

8 Write a concise account of the discovery of Chlorine, of its principal methods of manufacture on a large scale, and of its uses

9 Give the methods of preparation of all the oxides and oxacids of Chlorine, Iodine, Nitrogen, Boron and Selenium. Indicate any special facts with reference to each process described.

SECOND PAPER

A PEDLER, ESQ, M.A.   Examiner

1 Explain the methods of preparing Silicic acid in its several forms Discuss the general formulæ of the Silicates, mentioning several specific instances of each class, and indicate the acids from which they are derived

2. Describe the compounds of the halogens with Nitrogen, stating exactly how each is prepared. Give the properties of the bodies described, and their composition so far as you are able.

3. Discuss the oxides and oxyacids of Arsenic, giving their formulæ and the reasons on which the formulæ are based, and also their physical and chemical properties. Describe the methods used for their preparation and the tests by which they can be detected.

4. Describe how you would prepare the following compounds on a small scale :—Ferrous sulphate, Stannic chloride, Aluminic chloride, Silver nitrate, Magnesic carbonate, Cuprous chloride, Barium dioxide, Lead dioxide, Auric oxide, and Boric nitride.

5. Describe the glass manufacture and the composition of the different kinds of glass made. Describe also the manipulation employed in glass working.

6. State how each of the oxides of Manganese is prepared, and give its properties and uses. Give the tests for the various classes of Manganese salts. Give the reactions between a solution of potassic permanganate made acid with sulphuric acid, and each of the following substances : (a) Sulphurous acid, (b) Ferrous sulphate, (c) Oxalic acid, (d) Potassic nitrite, (e) Ethyl alcohol and (f) Aldehyde.

7. Describe the metallurgy of Zinc by at least two processes, and give its properties and uses. Also describe the principal salts of the metal, their composition and properties.

8. Describe the metallurgy of Silver by three methods. Explain fully the usual methods of silvering and plating. How would you detect and estimate Silver ?

9. Describe how Potassium chromate and bichromate are made on a large scale, and give their properties and uses. Discuss the composition of the various Chromates, Chlorochromates and similar compounds.

10 How is Platinum found in nature, and how is the pure metal prepared? What are its principal compounds and their properties? Discuss the composition of the various classes of Ammoniacal platinum compounds.

1 Trace the development of the theory of compound radicals from the time of its introduction into Organic Chemistry

2 Give a brief history of the part played in the history of Chemistry by Van Helmont, Berzelius, Stahl and Dalton.

B.

3 A mixture of silver acetate and butyrate afforded on analysis 62·75 per cent of silver Calculate the proportion of the salts in the mixture. (Ag = 108)

4 0·98 gram of a thoroughly dried organic base of the following percentage composition —

Carbon	71·50
Hydrogen	6·66
Nitrogen	4·91
Oxygen	16·84
Total	100·00

was ignited with soda lime and the evolved gas passed through dilute hydrochloric acid The acid solution was then precipitated by platinic chloride in excess, and the precipitate thoroughly washed, dried and ignited The residue thus obtained weighed 0·195 gram. Determine the molecular weight and formula of the base, and identify it (Pt. = 195)

C.

5. Point out the chemical relations of ethylene and glycol. By what means can the former be transformed into glycol?

6. Point out the relations of glycolic and lactic acids, and specify the reactions in which they are commonly formed.

7. By what methods can ethylamine be prepared and distinguished from ammonia?

8. Describe the effect produced upon carbon compounds by the following reagents, and the mode of operating in each case : (a) chromic acid, (b) hydrocyanic acid, (c) alkaline hydroxides, and (d) phenyl-hydrazine.

9. Describe and explain some examples of reactions by which closed chains of carbon may be produced from open chain compounds and *vice versâ*.

10. What proofs can be given that glycerine is a triatomic radical, and that its constitutional formula is $C_3 H_5 (O H)_3$?

11. Explain the general methods by which anhydrides of alcohols can be obtained.

12. Give an account of the general characters and chief reactions of ethereal salts and contrast them with those of metallic salts.

13. How are zinc compounds of the alcohol radicals prepared? Give examples of their uses in Organic Synthesis.

14. How is anthraquinone generally prepared? Show by its reactions that it is a double ketone.

15. Describe exactly the manner in which you would carry out the several operations involved in the preparation of aniline from benzene, and of ethyl aldehyde from alcohol. Give a sketch of the apparatus.

PHILOSOPHY

FIRST PAPER.

P. K. ROY, ESQ., M.A.   ..   *Examiner.*

1   Explain and criticise —

"The assumption that the mind is a real being which can be acted upon by the brain, and which can act on the body through the brain, is the only one compatible with all the facts of experience" Ladd

2.   Explain and examine Berkeley's theory of Perception. What, according to him, is the distinction (1) between Sensation and Perception, and (2) between Perception and Imagination?

3   Explain and criticise Reid's theory of original and natural suggestion.

4   Explain and examine Hume's theory of power, force, energy and necessary connection

5   Explain and examine —

"We must hold then that there is a consciousness for which the relations of fact, that form the object of our gradually attained knowledge, already and eternally exist, and that the growing knowledge of the individual is a progress towards this consciousness." Green

6   Give an account of the psychological theory of Plato and Aristotle

7   What is meant by Substance? Trace the history of the idea of substance from Locke to the present day

SECOND PAPER.

P. K. ROY, ESQ., M.A.   .   *Examiner.*

1   What is the relation of Reason to Experience? Discuss the question, with special reference to the theory of Kant

2. Explain and criticise the different theories of Space.

3. Explain and examine :—

" It is we therefore who carry into the phenomena which we call Nature, order and regularity, nay we should never find them in Nature, if we ourselves or the nature of our mind had not originally placed them there." Kant.

4. Explain Kant's proof of the possibility of a Causality through freedom, in harmony with the universal law of natural necessity.

5. Explain what Plato means by Ideas, and compare his Idea of the Good with Kant's Ideal of Pure Reason.

6. Give a critical account of Liebnitz's system of Philosophy and compare it with Des Cartes's system.

7. Explain and examine Green's theory of the relation between man and nature.

Third Paper.

A. Venis, Esq., M.A.   ..   .. *Examiner.*

1. Define Logic. In what sense does Sigwart hold logic to be a Formal Science.

2. Exhibit the essential elements in any simple but complete judgment considered as a conscious process. Make clear the meaning of 'Objective Validity of Judgment.' Unfold the ground or principle that justifies the judgment—The sun shines.

3. Discuss the real import of the **universal** and the **particular** judgment with which the Aristotelian and the traditional logic were concerned. Why, and how, does Sigwart correct the ordinary view in regard to this point ?

4. Carefully review Mill's criticism of the Aristotelian Syllogism and Sigwart's counter-criticism.   •

5 Shew the aim, scope and postulates of Methodology as a part of Logical Science

6 Sigwart distinguishes between Induction as a psychological fact and Induction as a logical method. State his reasons for so doing Explain fully his statement that "The Induction of Bacon is in no way opposed to the Organon of Aristotle"

7 Lay out the main points in Mill's theory of Induction, and carefully examine the objections that have been urged against it

8 Determine the use and the limits of (1) analogical proof and (2) the method of difference

Fourth Paper.

A VEMS, Esq , M A   . Examiner

1 Aristotle says :—'We are not inquiring merely in order to know what Virtue is but in order to become good men'

Examine his statement as a description of the nature and the function of Moral Philosophy

2. Examine closely the notion of Moral Obligation as it may appear in the systems of Plato and Aristotle, and as it is treated under modern theories of Evolution and Perfection.

3 State, and explain each part of, Aristotle's definition of Virtue, and also shew the arguments by which he proves that Virtue is essential to Well Being

4 Briefly contrast Plato's treatment of the Virtues (in the 'Republic') with Aristotle's (in the 'Ethics') How do these thinkers criticise a theory of pleasure? Is their criticism valid against modern hedonistic systems

5 Discuss the Kantian and the Utilitarian maxims of conduct Examine Green's reasoning against the latter

6. State as clearly as you can what you understand by Moral Progress. Illustrate your points by a careful comparison of the Greek ideal, as presented by Plato and Aristotle, with that of modern times.

7. Perfectionism moves in a circle, thus : —

The goodness of man lies in devotion to the ideal of humanity ; and the ideal of humanity consists in the goodness of man.

Fully discuss the question whether this really is an illogical circle.

8. State Plato's views (as in the 'Republic') in regard to the origin of law and the functions of Statesmen. Discuss the Platonic analogy between the individual and the State. How were his political views influenced by this analogy ?

9. What do you understand by **Friendship** (as in Books VIII and IX of the 'Ethics') : and what part does it take in the moral system of Aristotle ?

FIFTH PAPER.

A. VENIS, ESQ., M.A. ..   ..   .. *Examiner.*

Explain and criticise *one* of the following :—

1. The different theories of the External World.

2. The different theories of the nature of Axioms.

3. The different theories of the nature of Conscience.

(Solid Geometry and Elementary Differential Equations)

T C Lewis, Esq., M A   Examiner

1   Find the cosine of the angle between the lines

$$\frac{x}{l_1} = \frac{y}{m_1} = \frac{z}{n_1} \text{ and } \frac{x}{l_2} = \frac{y}{m_2} = \frac{z}{n_2}$$

Find the equations to the line through a given point which is equally inclined to three given lines.

2   Find the length of the perpendicular from the point (f, g, h) on the plane $lx+my+nz-p=0$

Find the equations to the two planes through the points (f_1, g_1, h_1), (f_2, g_2, h_2), which are at a given distance p from the point (a, b, c).

3   Determine the circular sections of the ellipsoid

$$\frac{x^2}{a^2} + \frac{y^2}{b^2} + \frac{z^2}{c^2} = 1.$$

If b be the mean axis, the length of the diameter conjugate to the circular sections is $2(a^2+c^2-b^2)^{\frac{1}{2}}$, and that of the diameter perpendicular to them is $2\left(\dfrac{1}{a^2} + \dfrac{1}{c^2} - \dfrac{1}{b^2}\right)^{-\frac{1}{2}}$

4   Define the polar plane of a point relatively to a quadric, and find its equation

Show that the locus of the feet of the perpendiculars drawn from the points on a fixed diameter of a central quadric to their respective polar planes is an equilateral hyperbola.

5. Find the axes and area of any plane central section of an ellipsoid.

6. What is a right conoid?

Find the general functional and differential equations of a conoidal surface.

Show that the only conoid of the second degree is a hyperbolic paraboloid.

7. Integrate the equations

(i) $(1+2x+3y)dx = (2+3x+4y)\,dy.$

(ii) $(y^2+2xy)\,dx+(x^2+2xy)dy = 0.$

(iii) $\operatorname{Sin} x\,dy+y\,dx = \sqrt{1+\operatorname{Sec}^2 \frac{x}{2}}\,dx.$

8. Show how to find the orthogonal trajectories of a system of plane curves depending on one parameter.

Find the orthogonal trajectories of a series of rectangular hyperbolas which have one diameter given in position and magnitude.

9. If $F(z)$ be a rational integral function of the nth degree, and $a_1,\ a_2,\ a_3 \ldots\ldots\ a_n$ be the roots of the equation $F(z) = 0$, show how to integrate the equation

$$F\left(\frac{d}{dx}\right)y = e^{a_1 x}+e^{a_2 x}+\ldots\ldots\ldots\ldots\ldots\ldots+e^{a_n x}$$

Integrate the equations:

(i) $\dfrac{d^2 y}{dx^2} - 6\dfrac{dy}{dx}+8y = x^4+e^x+e^{2x}$

(ii) $\dfrac{d^6 y}{dx^6}+y = \operatorname{Sin}\dfrac{3x}{2}\operatorname{Sin}\dfrac{x}{2}.$

10   Investigate a method of solving the equation

$$P \frac{dz}{dx} + Q \frac{dz}{dy} = R$$

P, Q, R being functions of x, y and z

Solve the equations —

(i) $f - (y) \left(1 + \frac{dz}{dx}\right) = 1 + \frac{dz}{dy}$

(ii) $(y + z - x) \frac{dz}{dx} + (z + x - y) \frac{dz}{dy} = x + y - z$

SECOND PAPER.

(Dynamics of a Particle and Rigid Dynamics)

W N BOUTFLOWER, Esq., B A   .,   Examiner.

1   A particle describes a curve with variable velocity, investigate an expression for the acceleration in a direction making a fixed angle β with the normal at any point of the path.

Prove that if this acceleration is constant, the curve is an equiangular spiral.

2.   Explain fully what is meant by a conservative system of forces, and show that if a rigid body be acted on by such a system, the change in its kinetic energy as it passes from one position to another is independent of the path described.

3   One end of a string is attached to a fixed point on a smooth horizontal table and the other end to a particle of mass m on the table. If the string be extended beyond its natural length, and then let go, find the subsequent motion of the particle.

4   A particle describes an orbit under the action of a central force varying inversely as the nth power of the distance of its position at any time from the centre of force, obtain the differential equation to its path and show that this equation is always integrable when the velocity at any point is that acquired in moving from an infinite distance under the action of the force

5. Obtain an expression for the force to the origin under which the hyperbola $r \cos 2\theta = 2\sqrt{2}\, a \cos \theta$ can be described.

6. A particle slides in a vertical plane down a rough cycloidal arc whose axis is vertical, starting from the cusp and coming to rest at the vertex ; prove that the coefficient of friction is given by the equation $\mu^2 c^{\mu\pi} = 1$.

7. Explain D'Alembert's principle in Dynamics in the case of a system of coplanar forces.

Show that when any constraint is introduced into a dynamical system suddenly, kinetic energy is always lost.

8. A plane area receives a motion of translation in its own plane whose components parallel to the axes are a and b; and a rotation θ round the point in the body which at the beginning of the motion coincides with the fixed origin. Determine the co-ordinates of that point about which the area might rotate so as to come into the same position.

9. A uniform rigid sphere of radius a rolling along a horizontal plane strikes a perfectly rough vertical obstacle of height c which is less than a. Find the least velocity the sphere must have if it is to roll over the obstacle without rebound.

10. A uniform beam rests with one end on a smooth horizontal table, and the other end is attached to a fixed point by means of a string of length l; prove that if the beam be slightly displaced from a position of equilibrium, the time of a small oscillation will be $2\pi \sqrt{\dfrac{2l}{g}}$.

_____

THIRD D.Sc. EXAMINATION, 1898.

1. A, B, C, D, E are points in a straight line such that AB. AE = AC. AD = a^2.

Attracting masses μ and $\dfrac{\mu d}{AD}$ are placed at D and C respectively, and there is a distribution of repelling matter along BC and DE of uniform linear densities $\dfrac{\mu}{AD \cdot BC}$ and $\dfrac{\mu}{D\hbar}$ respectively Prove that the force at any point on the surface of the sphere of radius a and centre A is tangential to the surface, the force due to any particle varying inversely as the square of the distance

2   Find the attraction of a solid sphere formed of concentric homogeneous shells on a particle inside it and distant r from the centre

Assuming that the attraction of a point inside the earth and at a distance r from its centre is given by the formula $-\dfrac{4\pi}{m^2}\dfrac{d\rho}{dr}$, where ρ is the density there, and m a constant, show that ρ is proportional to $\dfrac{\sin mr}{r}$

3   If ∇ denote $\left(\dfrac{d^2}{dx^2} + \dfrac{d^2}{dy^2} + \dfrac{d^2}{dz^2}\right)$, prove that if $\nabla = f$ is a solution of $\nabla V = 0$, so also is $x\dfrac{df}{dy} - y\dfrac{df}{dx}$

Prove that the solution of $\nabla \nabla V = 0$ is

$$V = \Sigma\left(1 + Br^2 + \dfrac{C + Dr^2}{r^{2n+1}}\right)Q_n,$$

where Q_n is a spherical solid harmonic of degree n.

4   Find an expression for the potential of a solid of revolution at an external point

5   Define Electric Potential, Electromotive force, and Surface density and prove that if R be the resultant force, and σ the surface density at any point of a conductor, $R = 4\pi\sigma$

The equipotential surfaces due to a certain distribution of electricity are the family of cylinders given by the equation

$V = \dfrac{a^2 \cos 2\theta}{r^2} + \dfrac{b^2 \sin 2\theta}{r^2}$, the generating lines being parallel to the axis of z: If electricity be distributed over one of these surfaces so as to produce the same effect at all external points as the actual distribution, the surface density will be equal to $\dfrac{1}{2\pi} \dfrac{\sqrt{a^4 + b^4}}{r^3}$.

6. What is an electric image ?

Prove that the image of a concentric ring surrounding a spherical conductor is another ring within the sphere.

7. Two concentric spheres A and B (radii a and b, $a < b$) are placed at a great distance from two other concentric spheres C and D (radii c and d, $c < d$). A charge E is given to sphere A and C is put to earth. The spheres B and D are then put in electrical connexion. Prove that the potential of D is independent of a, and find what charge must be given to D in order that its potential may be unchanged by the connexion.

8. Find an expression for the potential of one small magnet on another in the form

$$\frac{mm'}{r^3} (\cos \alpha - 3 \cos \theta \cos \theta')$$

where α is the angle between the directions of the two magnets and θ and θ' are the angles between these directions and the line joining the centres of the magnets.

9. State Lenz's Law for the induction of electric currents.

If a circular wire were insulated and placed above any parallel of latitude of the earth, and then made to contract so as to take up a position immediately over a higher parallel of latitude, in which direction would an electromotive force appear in the circuit.

If the circuit were to contract so as to have always the form of a small circle touching in the same point the parallel of latitude on which it originally lay, and so that its pole moves from the pole of the earth with a constant velocity, prove that when the radius is ρ, and the latitude of the pole λ, the electromotive force is proportional to $(2\pi\mu\cos\rho\ \rho+\cos\sin\lambda\ \rho)\sin\rho$

SECOND PAPER.

(Fourier's Series and Spherical Harmonics)

A. W. WARD, ESQ., L.A. . . . . *Examiner.*

(1) Prove that for all values of x from $x=0$ up to l,

$$\phi(x) = \frac{1}{l}\int_0^l \phi(\tau)\,d\tau$$

$$+ \frac{2}{l}\sum_1^\infty \cos\frac{n\pi x}{l}\int_0^l \cos\frac{n\pi\tau}{l}\ \phi(\tau)d\tau$$

Find an expression which from $x=0$ to $x=l$ shall be equal to kl, from $x=l$ to $x=2l$ shall be equal to $k\ (3l-2x)$, and from $x=2l$ to $x=3l$ shall be equal to $-kl$

Prove that —

$$\sec\frac{x}{r} = 1 + \frac{2}{\pi}\sum_0^\infty \left[\left\{\sin\frac{2n+1}{2}\ \frac{x}{r}\right\}\left\{\int_0^{\pi}\frac{\sin\frac{2n+1}{2}\theta}{\cos\frac{1}{2}\theta}\,d\theta - \frac{2}{2n+1}\right\}\right]$$

2 If $f_1(x, y, z) = f_2(x, y, z) = \beta$ and $f_3(x, y, z) = \gamma$ represent a set of co-orthogonal surfaces, prove that Laplace's equation may be written,

$$\frac{d}{d\alpha}\left(\frac{h_1}{h_2 h_3}\ \frac{dv}{d\alpha}\right) + \frac{d}{d\beta}\left(\frac{h_2}{h_3 h_1}\ \frac{dv}{d\beta}\right)$$

$$+ \frac{d}{d\gamma}\left(\frac{h_3}{h_1 h_2}\ \frac{dv}{d\gamma}\right) = 0$$

where $h_1^2 = \left(\dfrac{d\alpha}{dx}\right)^2 + \left(\dfrac{d\alpha}{dy}\right)^2 + \left(\dfrac{d\alpha}{dz}\right)^2$; &c.

Hence deduce Laplace's equation in polar co-ordinates.

3. If $\dfrac{1}{\left(1-2\mu h + h^2\right)^{\frac{1}{2}}} = 1 + P_1 h + \ldots + P_n h^n + \ldots\ldots$ prove that P_n satisfies the differential equation,

$$-\frac{d}{d\mu}\left\{(1-\mu^2)\ \frac{dP_n}{d\mu}\right\} + n(n+1)\,P_n = 0,$$

and that P_n is the only rational integral function of μ that does satisfy this equation.

Prove that $P_n = \dfrac{1}{\pi}\displaystyle\int_0^\pi \left\{\mu \pm \sqrt{\mu^2-1.}\cos\rho\right\}^n d\varphi.$

4. Prove that :—

1. $P_n = \dfrac{1}{2^n \lfloor n}\ \dfrac{d^n}{d\mu^n}\ (\mu^2-1)^n$

2. $P_{2n} - 2\mu\,P_{2n-1} + P_{2n-2}$

$$= \frac{1}{4n-1}\ (P_{2n-2} - P_{2n})$$

3. $\displaystyle\int_{-1}^{+1}(1-\mu^2)\left(\frac{dP_n}{d\mu}\right)^2 d\mu = \frac{2n(n+1)}{2n+1}$

Show that the area of the surface of revolution $v = a + b\,P_n$ where b is small is approximately $4\pi a^2 + 2\pi b^2 \left(\dfrac{n^2+n+2}{2n+1}\right)$

5. A small magnetic needle NS free to turn about a vertical axis through its centre δ, is deflected by a fixed magnet $N'S'$ (centre P) placed in the East and West line through O. If

$NS = 2l$, $N'S' = 2s$, $PO = x$, $L\,NOV = \theta$ and $M2s =$ magnetic moment of $N'S'$, show that in the position of equilibrium,

$$\frac{H}{M}\cot\theta = \frac{1}{(r+s)^2} - \frac{1}{(r-s)^2}\Bigg\} \frac{dP_1}{d\mu}$$

$$+ l^2 \left\{ \frac{1}{(r+s)^4} - \frac{1}{(r-s)^4} \right\} \frac{dP_3}{d\mu} + \&c.$$

where $\mu = \cos\chi$, and H is the horizontal component of the earth's magnetic field.

Hence deduce the usual approximate formula and show that it is most nearly true when the angle of deflection is

$$\tan^{-1}\frac{1}{\sqrt{3}}$$

6 Show that the principal moments of inertia in the solid whose bounding surface is

$$r = a\,(1 + P_n)$$

where a is small, are equal, unless $n = 2$. Find their values in the latter case

7 If S_m S_n denote two complete surface harmonics of which the degrees m, n, are neither equal to one another nor such that $m + n = -1$, show that

$$\iint S_m\, S_n\, d\varpi = 0,$$

$d\varpi$ being an element of a spherical surface described from t as centre radius unity, and the integration is extended all over the surface.

Prove that if a function of μ and ϕ can be developed in a series of surface harmonics, such development is possible in only one way

Expand

$$Ax^2 + By^2 + Cz^2 + 2Dyz + 2Ezx + 2Fxy \text{ in surface harmonics.}$$

8. Show that the sum of the principal curvatures at any point of the nearly spherical surface $r = a + \beta Qn$, where Qn is a spherical solid harmonic of order n, and β a small quantity, is

$$\frac{2}{a} + \frac{(n-1)(n+2)}{a^2} \beta \, Qn,$$

9. Find the value of $\displaystyle\int_{-1}^{+1}\int_{0}^{2\pi} \left(\, T_n^\sigma \quad \cos\sigma\phi \right)^2 d\mu \, d\phi$

where $T_n^\sigma = (1-\mu^2)^{\frac{\sigma}{2}} \dfrac{d\sigma \; Pn \; (\mu)}{d\mu\sigma}$

THIRD PAPER.
(Essay.)

A. W. WARD, Esq., M.A. .. .. *Examiner.*

(Not more than two questions should be attempted.)

1. In the ellipsoid of revolution $\dfrac{x^2}{a^2} + \dfrac{y^2}{a^2} + \dfrac{z^2}{c^2} = 1$

(c greater than a), the density of any section at right angles to the axis of revolution is uniform and equal to δ, where δ is a function of z only. If V be the potential at any point on the axis of z, distant R from the centre, R being greater than c, show that

$$\frac{V}{4\pi} = \frac{1}{R} \cdot Q_1 + \cdots\cdots + \frac{1}{R^{2n-1}} \, Q_n + \&c.$$

where

$$Q_N = \frac{c^{2n+1}}{4\pi - 1} \int_0^1 \frac{\left(P_{2n-2} - P_{2n}\right) d\kappa}{(1 - \lambda\kappa)^{\frac{2n+2}{2}}}$$

λ being equal to $\dfrac{c^2 - a^2}{c^2}$

Hence show that if $1 = D_m \; z^m$ where D_m is constant, then

$$Q_n = \frac{D_m}{(2\kappa - 1)} \frac{a^{2n+2n+1}}{(2\kappa + 3)} \times \frac{z^m}{(2\kappa + 3)(2\kappa + 2n + 1)}$$

$$\times \frac{d^m}{d\lambda^m} \left\{ \frac{\lambda^{n-1}}{(1 - \lambda)^{\frac{2n-1}{2}}} \right\}$$

2   Write a dissertation on Ellipsoidal Harmonics and their application.

3.   Write a dissertation on the expansion of arbitrary functions in trigonometrical series, discussing the following points :—

The possibility of expansion in either sines or cosines

The validity of obtaining a differential coefficient term by term.

The validity of a similar integration.

Illustrate your answer by diagrams.

4   Write a dissertation on the variation of gravity at the surface of the earth, on the supposition that the equation of the earth's surface is given by

$$r = a \left\{ 1 + \epsilon \left(\frac{1}{3} - \cos^2 \theta \right) \right\}$$

where ϵ is small and θ is the colatitude.

Prove that

$$g = G \left\{ 1 - \left(\tfrac{5}{3}m - e \right) \left(\tfrac{1}{3} - \cos 2\, \theta \right) \right\}$$

where G is a constant, and $m = \dfrac{\omega^2\, a}{G}$, ω being the earth's angular velocity.

Prove also that if r be the distance of the centre of the moon from that of the earth, θ the moon's North Polar Distance P and Q the moon's acceleration along and perpendicular to the radius sector r, E the mass of the earth

$$P = \frac{E}{r^2} + 3 \left(e - \frac{m}{2} \right) \frac{E a^2}{r^4} \left(\tfrac{1}{3} - \cos^2 \theta \right)$$

$$Q = 2 \left(e - \frac{m}{2} \right) \frac{E a^2}{r^4} \sin \theta \cos \theta .$$

LL.B. EXAMINATION. 1897

JURISPRUDENCE, &c.

G P Boys, Esq, Bar.-at Law   .. Examiner.

1   (a) Distinguish between | a moral right | natural person
                            | a legal right | artificial person

    (b) What do you understand by ' Antecedent rights in personam '? How do they arise ?

2   (a) What criticisms does Holland make upon Bentham's use of the term ' Jurisprudence '?

    (b) Criticise the distinction drawn by Austin between ' particular jurisprudence ' and ' general jurisprudence '

3   (a) " Considerable doubt has of late been thrown upon the doctrine that, apart from the existence of a state and of a sovereign power within it, there can be no law, because all laws are rules enforced by such a power " Explain this passage further

    (b) Describe the nature of International Law Where does Holland place it in his classification of the different kinds of law ?

4   What are the elements of possession ?

    " There is no doubt that the classical Roman jurists recognised two degrees of control over an object. "

    What are the two degrees referred to and how far does the view of the Roman jurists coincide with the modern English theory ?

5   What are the constituent elements of a contract according to Savigny ? Criticise his analysis.

6. Sketch the circumstances leading to the acquisition of sovereignty by the English.

7. Criticise the *Regulating Act* and the subsequent Charter, showing why the Supreme Court as thereby established was a failure, and how far that failure was due to the action of the Company.

8. What bodies of Statute law were in force in 1832?

9. In regard to the High Courts Act, 1861, Professor Cowell says, "As far as the policy of fusing two rival systems of judicial administration was concerned, no great advance was thereby made."

Amplify and explain this passage.

10. Trace the history of revenue jurisdiction, stating the causes of and reasons for the various changes.

CIVIL PROCEDURE CODE AND LAW OF LIMITATION.

F. E. ELLIOT, ESQ.   ..   ..   .. *Examiner.*

1. Give the substance of the rule as to '*Res judicata.*' Explain the expressions, 'directly and substantially in issue'— 'heard and finally decided' 'parties claiming' [under others].

2. Under what circumstances will a *foreign judgment* be no bar to a suit in British India?

3. What are the duties of a Plaintiff with regard to *documents* relied on by him in evidence? What is the consequence of failure to fulfil such duties?

4. State the rules of procedure with respect to *Interrogatories.*

5. What is the prescribed procedure in regard of *Adjournments?*

6   Describe the nature of a suit of *Interpleader*, and state what particulars, in addition to those generally necessary, must be given in the plaint in such a Fee suit?

7   The provisions of the Code with reference to the withdrawal and adjustments of suits are declared not to be applicable to proceedings or applications in any suit subsequent to the decree, with one exception   What is that exception?

8   To what kind of property is the power of a Civil Court to order partition limited? Would such powers extend to ordering a wall to be built separating portions of property of which partition had been decreed? Give your reasons.

9   Under what circumstances may (a) a suit, (b) an appeal be admitted after the expiration of the period of limitation prescribed therefor?

10   What is the rule to determine whether or not time will run against the rest of several joint creditors one or more of whom are minors, or insane?

11   State the general rule as to computation of the period of limitation in the case where a person by or against whom, if he were living, a right to sue would have accrued, dies before such right accrues. What classes of suits are excepted from the operation of that rule?

12   Can execution of a decree against property acquired by an insolvent subsequently to his discharge be granted, though barred by the Limitation Act, under any, and if so what provision of the Civil Procedure Code? Give reasons for your opinion

THE PENAL CODE AND THE CODE OF CRIMINAL PROCEDURE

C DILLON, ESQ , BAR AT LAW   *Examiner*

1   Define the offence of exciting disaffection to the Government of British India.   Is there anything peculiar in the provisions of S. 124A, I. P C , as to the punishment which may be awarded for this offence?

A addresses a riotous assembly, and says in the course of his speech : " Down with all soldiers and doctors 'belonging to plague search parties ; but do nothing to subvert the Government. " What offence has *A* committed ? Give reasons.

2. Define the offence of giving false evidence. Is it necessary that the evidence alleged to be false, should be material to the issue ?

3. Differentiate between a preparation, and an attempt, to commit an offence.

A means to commit a burglary in *B's* house. He has a false key made to facilitate his entrance to the house. Has *A* attempted to commit burglary ?

4. State the rule, as to the exemption of accused persons, from liability, for acts done while of unsound mind. What is the procedure to be adopted by a Magistrate, who believes an accused person to be of unsound mind ?

5. Define ' *wrongful gain,* ' ' *wrongful loss,* ' ' *gaining wrongfully,* ' ' *losing wrongfully,* ' ' *dishonestly.* '

6. What is an ' *offence* ' ?

A bill of exchange is stolen in London, and remitted by the thief to a friend in Bombay, who cashes it. Has any offence been committed by the friend ?

7. State the law as to the causing of death by negligence. *A,* a soldier, goes into the verandah of his barrack with a loaded rifle, and fires at some of his comrades who are at dusk some distance away. He aims at no one in particular, but kills *Z,* one of the soldiers. What offence has *A* committed ?

8. *A* elopes with a young lady of fifteen from school. Has *A* committed any offence ? Draw a charge against *A* mentioning the offence which he has committed.

HINDU AND MUHAMMADAN LAW.

KARAMAT HUSAIN, ESQ., BAR. AT LAW   ..   *Examiner*

1   What is the authority for the proposition that under the Hindu system of law a clear proof of usage will outweigh the written texts of the law ?

2.   What is the law in Bengal, the N W Provinces, Bombay and Madras as to the legality of transfers by a co-parcener of his undivided share in the ancestral property ?

3   What are the causes which justify a Hindu wife's desertion ?

4   What are the degrees of relationship within which marriage is unlawful under the *Mitakshara* law ?

5   Is a Hindu executor entitled to pay a barred debt ?

6.   Specify the higher and the lower limit to which the widow of a co-parcener in a *Mitakshara* family is entitled stating the points to be taken into consideration in awarding maintenance.

7   Define add مدّه,—batil باطل,—fasid فاسد,—fasult فسولت,—akrah اکراه,—lian لعان,—rookba رقبى,—Oamra عمرى,—khalit خلیط,—muslea مشلع, and marazulmaut مرض الموت.

8   If a *Shia* husband takes a *Hanafi* wife, which of the two systems of the Muhammadan law is to govern questions about dower, conjugal rights, divorce, custody of children and inheritance ?

9   What is the effect of *marazulmaut* مرض الموت on the disposing powers, testamentary and non-testamentary, of a *Hanafi* and of a *Shia* ?

10   A *Hanafi* sells a house to a Hindu and a Shia claims pre-emption, which law is to govern the case ?

11   Who can give a minor female in marriage under the *Hanafi* Law ?

12   When can an unborn person inherit under the *Hanafi* Law ?

EQUITY WITH REFERENCE TO TRUSTS, MORTGAGE, AND SPECIFIC RELIEF.

DURGA CHARAN BANERJEE, ESQ., B.A., *Vakil* .. *Examiner.*

1. Explain the terms '*Beneficiary,*' '*Resulting Trust.*' '*Constructive Trust,*' and '*Chose in Action.*' Illustrate the difference between '*Express Trust*' and '*Implied Trust.*'

2. Discuss the maxim " when there is equal equity the Law must prevail."

3. (*a*) What are the essential ingredients for constituting a valid trust?

    (*b*) How far is a trustee liable for breach of trust committed by his co-trustees?

4. Explain clearly the distinction between *mortgage* and *charge.* What do you understand by the terms '*Tacking,*' *Consolidation of Mortgages,*' '*Foreclosure*' and '*Redemption*'? How has the Transfer of Property Act affected the doctrine of '*Tacking*' and '*Consolidation of Mortgages*'?

5. Can a person who has attached the mortgaged property in execution of a simple money decree against the mortgagor redeem the mortgage? Give reasons for your answer.

6. (*a*) Discuss the right of one of several joint mortgagors to redeem his share of the mortgaged property.

    (*b*) Can a usufructuary mortgagee in any case sue for sale?

7. (*a*) What is the procedure for sale of mortgaged property in execution of a money decree obtained by the mortgagee?

    (*b*) *A*, the manager of a joint Hindu family consisting of himself, his two sons *B* and *C*, and brother *D*, mortgages the family property to *M*, on 1st January,

1890, he again mortgages the same property to N on 1st January, 1891, and to P on 1st January, 1892 All these mortgages are simple and payable on 1st October, 1893 What are the remedies of N for recovery of his money due under the mortgage, dated 1st January, 1890? What would be the frame of his suit and who would be necessary parties to it?

8   Can an agreement to refer to arbitration be set up as a bar in a suit by one party to the agreement against his opponent, the other party to the agreement, if so, when?

9   What is meant by a *declaratory decree*? Can a declaratory decree be claimed as a matter of right in every case in which the claimant is entitled to the declaration?

10   What is the difference between *temporary* and *permanent injunctions*?

Can a beneficiary sue for an injunction to restrain the Trustee from committing a threatened breach of trust? Give reasons

RENT AND REVENUE.

H. N WRIGHT, Esq., c s   ..   .. *Examiner*

(N B.—*In marking answers, brevity and conciseness of style will be considered*)

1   Give the definition of the following terms —

   (1) ' rent' under Act XXII of 1885.

   (2) ' Survey number' Act XVI of 1889

   (3) ' subsettlement' under Act XVII of 1876

   (4) ' annual value' (in the case of permanently assessed mahals) under Act XIX of 1873.

2. What persons are entitled to claim ' perfect partition' under Act XIX of 1873 ? In what ways may a partition be made ? Under what circumstances may a partition be disallowed on the ground of incompactness ?

3. What is the power of (1) an Asst. Settlement Officer, (2) a Tahsildar, in regard to referring matters to arbitration under Act XIX of 1873 ? Under what circumstances may an award be (a) remitted to the arbitrators, (b) set aside ?

4. What power is given to the Board of Revenue in the N.-W. P. to review its orders and decrees ? What is the procedure adopted when there is a difference of opinion between the members of the Board (a) in regard to any order or decree coming before them on appeal, (b) as to an order to be made in the course of their non-judicial business ?

5. Can a tenant's crops be distrained under any circumstances for the recovery of a sum in excess of the rent payable in the preceding year ? Can a subtenant's crop be distrained for a tenant's rent ? Act XII of 1881.

6. What remedy has a tenant under Act XII of 1881 if his landlord—

(1) exacts more than the rent specified in his lease,

(2) withholds a receipt for rent paid,

(3) extorts rent by duress ?

7. What were the main alterations introduced into the existing Rent Law of Oudh by Act XXII of 1886 ?

8. What rent is payable in Oudh by a tenant admitted to the occupation of a holding of which the rent immediately before his admission has been paid in kind ? To what provisions is this rule subject ?

9. Under what circumstances may the transfer of a share under Act XVII of 1876 for arrears of revenue become absolute ?

10 What power is given by Act XVIII of 1881 to make progressive assessments of land revenue ? Are there any such provisions in the N-W P and Oudh, and if so, what are they ?

11 How may a landlord enforce his lien in the Central Provinces on the produce of a holding when such produce is under attachment by order of a Court.

12 In what cases does an ex proprietor become an occupancy tenant of his *sir* land under the Rent Law of the Central Provinces.

13 What is an *istimrari* estate ? What are the provisions as regards the alienation of such estates ?

CONTRACTS, &c.

W. K. PORTER, Esq., Bar. at Law   *Examiner*

1 Explain—illustrating your meaning by examples—the following terms—

   (1) *Measure of damages*

   (2) *Vendor's lien*

   (3) *Donatio Mortis Causâ*

   (4) *Devastation*

   (5) *Contribution* (in relation to contracts)

2. Give a brief sketch of the duties of an agent as regards his principal Can an agent ever personally enforce or be bound by a contract entered into on behalf of his principal, and if so, under what circumstances ?

3 Give some account of the principal restrictions imposed by the Transfer of Property Act, 1882, upon the power of disposition of an owner of immovable property ?

4 What are the statutory rights and liabilities of a lessee of immovable property ?

5. (a) *A* sells his house in Calcutta and leaves the day after
   executing the sale for America. How does he obtain
   registration of the sale-deed?

   (b) *A*, a Zamindar in the N.-W. P., sells two of his villages,
   but, before the sale-deed is registered, is arrested on a
   charge of complicity in a riot and remains in jail for
   two years. How is registration of the sale-deed
   effected?

   (c) *A* executes and registers a mortgage of his property in
   favour of *B*. Subsequently to its execution *C*, the
   holder of a prior unregistered mortgage-deed over
   the same property, obtains a decree on his un-
   registered mortgage-deed and brings the property to
   sale in execution thereof. *D* purchases at the sale.
   B then sues to have the sale to *D* set aside. To
   what decree is *B* entitled and why?

6. Under what circumstances may registration of a document
be refused? And, if registration is refused, what remedies are
open to the person who presented the document for registration?

7. What is the difference between a *special*, a *general* and a
demonstrative legacy? Which would you prefer, as legatee, to
have, and why?

8. What will happen upon the death of the testator in the
following cases?

   (a) The testator bequeathes " Rs.1,000 to each of the
   three children of *A*. " At the date of the will *A* has
   four children.

   (b) *A* bequeathes to *B* "his marsh lands lying in *L*, and
   in the occupation of *X*, comprising 1,000 bighas of
   land." The testator had marsh lands lying in *L*,
   some of which were in the occupation of *X* and some
   not in the occupation of *X*. The measurement is
   wholly inapplicable to the marsh lands of either
   class, or to the whole taken together.

(c) *A* by his will bequeathed to *B* all his household furni-
ture, plate, linen, china, books, pictures and all other
goods of whatever kind, and afterwards bequeathed
to *B* a specified part of his property

(d) *A* at the commencement of his will gives his house to
A, and at the close of it directs that it shall be sold
and the proceeds invested for the benefit of *B*

(e) *A* bequeaths his house and compound at Alipur to *B*
and his issue

9   To what extent is the principle of self redress recognized
in the law of torts ?

10   State in general terms what is the liability in tort of—

(a) A master for the acts of his servant.

(b) A principal for the acts of his agent.

(c) One of several joint tort feasors for the acts of the
others.

THE LAW OF EVIDENCE AND PLEADING

A E. RIVES, ESQ., BAR. AT LAW   ..   Examiner

(N B.—*Give the reasons for all your answers except in questions 9
and 10   No marks will be given for answers merely
amounting to ' yes ' and ' no')*

1   Under what circumstances, for what purposes and with
what restrictions (if any), can a witness be asked questions on
a previous statement made by him, by the party calling him or
by the opposite party ?

Is it material whether the proceedings in which the witness
is giving evidence, are of a civil or criminal nature

2   What do you mean by "hearsay evidence" ? Is such
evidence always inadmissible ?

3. *A* sues *B* on a bond the genuineness of which *B* denies. *A* in the witness-box is asked in cross-examination by *B's* counsel whether he (*A*) offered a bribe to *X* a public servant wholly unconnected with the present case.

   (*a*) Is the question a proper one ?

   (*b*) Assuming that it is, is *A* bound to answer it ?

   (*c*) If *A* says " no, " can either *A* or *B* call *X* to admit or deny the incident ?

4. *A* hearing the noise of a scuffle ran up to the spot and found *X* wounded surrounded by a number of men. *X* told *A* in the hearing of *Z* that *Z* had beaten him. *Z* remained silent.

Z was put on his trial on a charge of attempting to murder *X*, and *A* was called as a witness for the Crown. How many of the above facts is *A* entitled to depose to ? Is it material whether *X* is examined as a witness ?

5. What is meant by ' *a legal presumption* '?

What presumption, if any, attaches or may attach to a document purporting to be forty years old which is tendered in evidence in a Court of Justice and which *primâ facie* is relevant to the inquiry ?

6. Can evidence be given to show that a transaction which is evidenced by a document which on the face of it appears to be a sale-deed, was in fact not a sale but a mortgage ?

7. *A* sues *B* to recover the balance due on a bond. The bond is not stamped as required by law. On its back are indorsements in *B's* handwriting of payments on account of principal and interest. *B* denies the date altogether. Can *A* prove the bond or the indorsements for *any* purpose ; and in this case is he entitled to give other evidence of the date ?

8   What is meant by " onus of proof " ?

The point at issue between *A* and *B* is whether *X* is alive or dead. *A* says he is dead, *B* says he is alive. It is admitted he was alive 25 years ago, on whom does the onus lie to prove that he is dead ?

9   *A* and *B* are husband and wife. Are they competent and compellable witnesses for or against each other ?

Has any alteration in the law in this particular been made in India ?

10.   Draw up a plaint in a suit by *A* against *B* for the specific performance of a contract to convey a house. Then draw up a written statement on *B*'s behalf, and fix the issues which you consider arise out of the pleadings.
